*Mr. Amit Nigam is also the dedicated Fund Manager for making investments in foreign securities.

Presently, the AMC has Nine Fund Managers, Seven Analysts, One Fund Manager cum Dealer and Four Dealers. Further, Fund Managers also have responsibility for research. All Key Personnel of the AMC are based at the registered office of the AMC.

Investment Decisions:

The investment decisions for the Scheme(s) will be taken by the fund manager which will be consistent with the regulatory requirements and the investment objectives of the Scheme(s). The Fund Manager may additionally observe such internal guidelines as may be prescribed by the Boards of the AMC / Trustee or any internal committee. Subject to above, the day to day investment management decision will solely be the responsibility of the fund manager of the scheme. All investment decisions shall be recorded. The CEO does not play any role in the day-to-day investment decisions. The CEO of the AMC shall ensure that the investments made by the fund managers are in the interest of the Unitholders. Where an investment is proposed to be made for the first time in any scrip/security issued by a company, this will be preceded by making a detailed report justifying such investment by a member of the investment management team. With regard to investments in securities based on a mathematical model, the list of securities generated by the model shall be construed as the research report. In case of Arbitrage Fund, investment decisions will be based on the mis-pricing between cash and derivatives segment and opportunities available in these respective markets. In case of Fund of Funds scheme investing in Overseas Fund, the respective FoF scheme will invest in underlying fund as per its investment mandate and asset allocation pattern. The stock selection process followed by Equity Investment Team is given below:

Stock Selection Process:

Based on the respective Schemes' objective, we start filtering down the possible investment universe to more attractive opportunities. The process involves company, industry, economic and technical analysis in alignment with the

investment objective of the underlying fund. The Scheme's investment objective has implications for definition of the universe, company selection, industry and asset allocation.

▪ **Matrix Analysis**

As part of the Matrix approach we analyze, bottom up, the fundamentals of the companies that are part of the universe. We use external research and find it useful as a source of information and financial models. However, we believe our direct and in-depth interaction with a company and its competitors, suppliers and buyers-wherever feasible and possible, helps us arrive at our own unique insight into the company. The maximum inefficiency in the markets is at the company level and an in-depth research effort can generate a knowledge advantage and superior performance.

To this, we add our top down economic views and industry views - leading to industry and asset allocation decisions. The economic and industry analysis also has its implications on company selection. Technical analysis is another input for asset allocation decisions. All of this is in keeping with the investment objective of the specific scheme.

▪ **Security Selection**

To help select stocks for the portfolio, we use a proprietary stock categorization system. The objective of our stock categorization system is to enable us to identify stocks that are likely to be the best investments from within our universe. Each category of stock has a description of fundamental attributes that we expect the company to possess. The categorizations are as follows:

Stock Category	Descriptions (eg.)	Growth Prospects (eg.)	Company Attribute (eg.)	Financial Parameter (eg.)
Star	Young companies	High growth	Entrepreneur vision, scalability	Operating Leverage
Leader	Established companies	In line or better than industry	Track record of leadership, globally competitive	Industry leading margin / ROE
Warrior	Young / established companies	Better than industry	Unique proposition and / or right place, right time	Margin & ROE expansion
Diamond	Company with valuable assets	Low growth	Management intent to unlock value	Value of asset / business
Frog Prince	Company in a turnaround situation	Back to growth	Intrinsic strengths in core business	P2P, ROE expansion*
Shotgun	Opportunistic investment	Positive surprise	Corporate event, restructuring, earnings news	Event visibility
Commodities	Call on the cycle is paramount	Positive	Integration, cost efficiency, globally competitive	Profit leverage

* P2P – Path to Profit, ROE – Return on Equity

Stocks that fit into one of these categories typically display superior return profiles, but more importantly this enables fund managers to focus on the attributes that drive stock price performance and keep a watch for red flags.

The financial parameters under stock selection process are explained as follows:

- Margin - EBITDA margin or PAT Margin
 - ✓ EBITDA - Earnings before interest, taxes, depreciation and amortization.
 - ✓ EBITDA Margin - Earning before interest, taxes, depreciation and amortization / Revenues
 - ✓ PAT- Profit after Tax
 - ✓ PAT margin- Profit after Tax / Revenues
- Return on Equity (ROE) - Profit after Tax / Net Worth.
- Net worth - Equity share capital + Reserves.

- ROE Expansion - increasing trend in ROE over time.
- Value of Asset or business - Market or replacement value of the assets after accounting for liabilities.
- Operating Leverage - Sensitivity of margins to increase in revenues.
- Profit Leverage - Sensitivity of Profits (EBITDA or PAT) to changes in unit price or total revenues.
- Path 2 Profit - refers to the various levers such as, but not limited to, cost reduction, revenue growth, revenue mix, discontinuing of a product/business, asset sales, change in capital structure that a company might adopt to improve profitability / reduce losses.

▪ **Portfolio Construction**

The fund manager has the primary responsibility for portfolio construction based on the investment objective of the Scheme. Portfolio construction guidelines are laid down for each fund and reviewed on a need basis and otherwise regularly on a quarterly basis. Every investment decision we make is by keeping in mind the investment objective of the Scheme and how the security will affect the overall portfolio. In addition, we also look into the current economic / industry views that impact industry and asset allocation decisions for the fund. Technical views which are relevant to asset allocation, if applicable are also taken into consideration. Our preference is for companies with the characteristics as defined in our stock categorization framework.

▪ **Sell Discipline**

We may sell a stock because the fundamentals of a company, industry or economy have changed or a company's competitive advantage appears to have deteriorated. It could also be a function of alternative opportunities being available at a more attractive valuation or an inability to justify prevailing valuations.

▪ **Oversight**

The role of monitoring and reviewing is undertaken by the investment committee which meets on a periodic basis. The committee is empowered to establish internal norms such as industry allocation, asset allocation etc. for each fund and to monitor and review this on an ongoing basis.

Fixed Income Investment Process

IAMI Fixed Income investment process comprises qualitative as well as quantitative measures. Macro-economic analysis helps taking view on interest rate direction. This includes a detailed analysis of various influencing factors like inflation, money supply, private sector borrowing, government borrowing, currency market movement, central bank policy, local fiscal and monetary policy, global interest rate scenario and market sentiment. Interest rate direction call is supplemented by analysis of market and short term influencing factors like market positioning, auction/issuance of securities, release of economic data, fund flows in mutual funds, etc. View on the direction of interest rate movement and anticipation of yield curve movement forms the basis of portfolio positioning in duration terms.

Credit research is conducted on an ongoing basis for all approved issuers. Credit research includes sector analysis, internal analysis of financial reports, management meetings etc as well as getting the perspective of the rating agencies through the rating rationale and inputs from other external agencies. Internal credit rating is a pre-requisite for all investments. Credit research is also used to minimize credit migration risk and for generating relative value trade ideas.

Asset allocation is determined based on horizon period return analysis and expected spread movement across different asset class. In-house system Galaxy is used to determine relative value opportunities between sovereign bonds and corporate issuers as well as between corporate issuers.

Investment team comprising of Head Fixed Income, Fund Managers, dealers, risk manager and credit analysts aim to meet at frequent intervals to discuss market movement and analyze events and news. The team works in an informal environment to maintain flexibility and responsiveness.

Following are the details of the above investment process:

i. Defining risk tolerance for each scheme

Each Fund has been positioned on a risk-return profile and therefore the Funds are to be managed keeping this in mind. This is reflected in the Potential Risk Class (PRC) matrix in which the fund is placed. In addition, internal risk limits are discussed and set for each fund with independent risk team. PRC and internal limits form boundaries within which each fund has to operate with respect to interest rate, credit and liquidity risk.

ii. Macro research and defining duration views

Macro economic analysis helps taking view on interest rate direction. On a regular basis, the fixed income team discuss macro economic variables on global and domestic level to determine views on interest rates. The discussion entails various factors like inflation, money supply, private sector borrowing, government borrowing, currency market movement, central bank policy, local fiscal and monetary policy, global interest rate scenario and market sentiment. Interest rate direction call is supplemented by analysis of market and short term influencing factors like market positioning, auction/issuance of securities, release of economic data, fund flows in mutual funds, etc. View on the direction of interest rate movement and anticipation of yield curve movement forms the basis of portfolio positioning in duration terms.

iii. Credit Assessment

The credit assessment process follows an analytical approach to generate a view / recommendation on the strength of an issuer's credit profile. The analysis focuses on the overall credit quality of the issuer under contemplation, for investment, encompassing significant credit events in terms of default risk as well as variation in credit quality over time.

Investments in the debt securities can be made by IAMI schemes only in those issuers which are part of the Approved Credit Universe. Approved Credit Universe is maintained and kept updated at all times in the in-house Credit application system and in Bloomberg system. The process for addition of new issuers to the Approved Credit Universe involves a detailed discussion on credit profile of the issuer at multiple levels and is as detailed below. The decision of the Credit team to approve or reject an issuer is independent of the decision of the other members of FI team.

- A new issuer could be referred to Credit team by dealers / fund managers depending upon the various factors like frequency of the issuance of securities, outstanding quantum with mutual funds, relative valuation with similar rated securities etc. At times, Credit team can also take initiative on its own to assess a new credit if they are approached by any issuer or a broker directly, or if they find a potential external rating upgrade in an issuer over the medium term.
- At the initial stage, the credit analyst evaluates the issuer on various parameters including corporate governance, market feedback, historical track record, business profile, financial health etc. As a part of initial credit assessment, credit analyst will have a discussion with external rating agencies who have rated that particular issuer to understand the credit strengths & sensitivities in detail. Credit analyst may also undertake a discussion with issuer's management to understand the business philosophy and other strategic issues. Other sources of information for assessing credit worthiness may include discussion with IAMI equity team and third party equity research reports (on a case by case basis). Peer comparison with respect to financial and other relevant data of the issuer may also be done to help in understanding relative credit quality of the issuer. Credit analyst also evaluates additional criteria like debt/market capitalization of listed issuers, promoter pledge of listed issuers, mutual fund holdings of issuer's debt, equity price performance of listed issuers, yield movement of the any outstanding debt of the issuer amongst other things while performing their credit analysis which helps in capturing the equity market as well as debt market feedback through price movements. As a part of internal credit assessment, special emphasis is given to any near to medium term credit sensitivity which can have negative as well as positive implications on the credit metrics of

issuer. Once the credit analyst is convinced about credit comfort on issuer, he/she would discuss it with the Head of Credit Research to reach to a unanimous credit view on the issuer. At this stage, again a detailed credit assessment of issuer is undertaken within the Credit team (comprising of credit analyst and Head of Credit Research) and if the issuer fits the internal investment criteria, then the Credit team prepares a detailed assessment report of the issuer to be presented to the entire FI team. IAMI has incorporated a stringent internal credit selection parameter based upon the external rating threshold at AA-. Additionally, the internal credit rating of the issuer has to be higher than A for it to be eligible to be approved.

- At second stage, issuer's credit assessment is discussed within the entire FI team comprising of Head of Fixed Income, fund managers, dealers and Credit team in the Credit meeting. Credit analyst presents the credit proposal to the FI team with specific focus on credit strengths, credit weaknesses and credit sensitivities going forward. If any of the FI team members have any queries on the issuer's credit assessment, the same is discussed at length. If the query cannot be resolved, the discussion is deferred to the later date so that the Credit team can work upon it. In these team meetings, internal credit rating on the issuer is also assigned based upon the discussion between Credit team and FI team & relative benchmarking with the existing approved issuers. Internal ratings form the basis for the internal risk limits. Dealers and fund managers provide their feedback on secondary market liquidity of issuer's securities and relative valuation vis-à-vis similar peers to identify the investment opportunities on risk-reward metrics. Once all the FI team members are comfortable on the issuer to be covered only then it advances to the next stage of approval. Credit Research team will maintain the minutes of the meeting which will reflect whether FI team supports the addition of new issuer to approved universe. The minutes will also capture if any further credit assessment needs to be carried out by the Credit Research team. The decision of the Credit team to approve or reject an issuer is independent of the decision of the other members of FI team.
- At the third stage of approval, Credit team sends a detailed credit assessment report of the issuer to the CEO, CIO and Head Fixed Income for their observations, if any. Approval from all the three is required for the issuer to be approved to become a part of Approved Credit Universe. Approval at third stage is obtained over email and the approval emails will be saved by the Credit team to maintain an audit trail.
- Once the issuer is approved by all as above, the Credit team will add the approved issuer in the Credit application system with details like issuer name, group name, credit limits, etc. The Credit team will also send the issuer name, sector, internal ratings and internal limits to the Compliance team for it to be added to the front office trading system. Compliance team seeks the confirmation from Head of Fixed Income before adding the issuer in front office trading system which acts as a final layer of check before officially adding the issuer in trading system. Once the issuer is added onto the front office trading system only then the fund managers can take any exposure within the assigned limits.
- Any such new approved issuer is placed in the quarterly Investment Committee meeting along with a brief investment rationale, for noting.
- Similarly, as and when an issuer is removed from the Approved Credit Universe, Credit team sends details of issuer to Compliance team. Once the deletion is acknowledged in writing by the Head of Fixed Income, Compliance team removes the issuer from the Bloomberg system and the fund managers can't take any exposure to such issuer. The issuer will also be made inactive in the Credit application system. Deletion of issuers from approved issuers is also placed before the Investment Committee for noting.
- The details pertaining to the approved issuer e.g. internal rating / external ratings, limit assigned, watchlist status etc. are stored in the Credit Model System. FI Fund Managers and Dealers have 'read only' access to Credit Model System.

Based on evaluation of qualitative and quantitative parameters, Credit team assigns its own internal credit rating to every issuer assessed through the credit assessment process. These credit ratings range from AAA to CCC.

After the credit assessment process and assignment of internal ratings, every issuer is assigned a specific limit. Assigning limits to each issuer is based on the judgement of the Credit team and takes into account the internal credit rating assigned to the issuer, outstanding debt / equity / rated instrument amount of the company, frequency of issuance, liquidity of the underlying issuance, IAMI AuM across fixed income schemes and any other relevant aspect. The limits are set in absolute amounts per issuer and are considered as IAMI level limits for fixed income. Limits for each approved issuer are set up in Bloomberg system by Compliance team. Without this the dealers are not allowed to input any trade. In case of names being put on Watchlist by the credit research team, the decision is communicated to Compliance team.

Compliance team then puts the name on Watchlist in Bloomberg system. This ensures that dealers are not able to buy any additional amounts in the name which is put on Watchlist.

For each issuer, the Credit team monitors news and events, analyses financial results, meets company management / reviews analyst call transcripts as well as leverages other sources of information such as newspaper, rating agency reports, equity research reports, etc. This information is used to refresh views about the company and material changes if any are reflected through changes in internal credit ratings / outlook and / or change in credit limits / watchlist status of the company. This ensures, internal ratings, credit limits and approved status of the issuer are dynamic in nature. In addition to the ongoing monitoring process, credit analysts conduct credit assessment of each issuer annually.

iv. Investible universe

Investment Universe comprises of rupee debt securities including government securities, Public Sector Undertaking bonds, Public Financial Institution bonds, Central Government Guaranteed bonds, Private sector Corporate debt, Commercial Paper, Certificates of Deposit, Reverse Repo, Corporate Bond Repo, Term Money market, Notice Money market, Call Money market, Bills rediscounting, Securitised debt, structured obligations and derivative instruments including interest rates swaps and interest rate futures and any other instrument which may be approved by the SEBI.

No investment is to be done in instruments rated below investment grade by external rating agencies. In addition, based on PRC classification of the fund and internally identified risk tolerance, no investment can be made in issuers below a certain internal rating. Thus, the combination of PRC matrix and minimum internal and external rating act as filters for eligible issuers. Derivative Instruments are to be used as per SEBI regulations for portfolio hedging and balancing.

v. Security selection process

Interest rate direction call is used for portfolio positioning in duration terms. Instruments of approved credits from the approved list are added in the portfolio. The funds should seek to generate optimal returns.

The Credit Analyst maintains a list of approved credits with internal rating. Gross Fund exposure is maintained within the overall limit set in the approved list.

Liability side of the funds is ascertained from the feedback given by the sales department. Asset side liquidity is measured if available from the monthly volumes in the debt market. On-the-run Gilts are used for duration management. Cash holding is part of investment strategy and is used for implementing a defensive strategy.

As required by SEBI, IAMI has adopted comprehensive stress testing policy. Accordingly, a regular stress test for liquidity risk, credit risk and interest rate risk is carried out on monthly basis to provide sufficient signals and early warnings on health and underlying risks in the fixed income schemes.

The performance of the Scheme(s) shall be reviewed by Investment Committee comprising of Chief Executive Officer, Chief Investment Officer, Head - Equity, Head - Fixed Income, Chief Operating Officer, Chief Financial Officer, Head - Compliance, Chief Risk Officer and by any additional member which may be included / nominated to the committee at periodic intervals. Performance review of the Scheme(s) includes comparison of performance of the Scheme vis-à-vis benchmark indices / peer group on a regular basis. Further, Boards of the AMC and the Trustee will also review performance vis-à-vis benchmark indices and peer group.

IV. RISK FACTORS:

1. Standard Risk Factors:

(i) Standard Risk Factors for investments in Mutual Fund:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down depending on various factors and forces affecting the capital markets.
- Past performance of the Sponsor /AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1,50,000/- (Rupees One Lakh Fifty Thousand Only) made by it towards setting up the Mutual Fund.
- The present Scheme is not a guaranteed or assured return scheme.

(ii) Minimum Assets under Management (AUM) for Open-Ended Debt Oriented Schemes

Pursuant to provisions of Para 6.12 of SEBI Master Circular dated May 19, 2023, Scheme is required to maintain an Average Assets under Management (AUM) of Rs. 20 Crores on half yearly rolling basis. If average AUM of the Scheme on half yearly rolling basis is below Rs. 20 Crores, the AMC will scale up the AUM of the Scheme within a period of six months so as to comply with the requirements of Average AUM of Rs.20 Crores on half yearly rolling basis, failing which the provisions of Regulation 39(2) (c) of the Regulations would become applicable. Accordingly, the Scheme would be wound up and the Unit under the Scheme would be redeemed at applicable NAV. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

(iii) Requirement of Minimum Investors in the Scheme (not applicable for ETFs):

- **Applicable for NFO (For an open-ended scheme):** The Scheme(s) shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme(s) complies with these two conditions. In case the Scheme(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV.
- **Applicable for NFO (For Close ended scheme/Interval scheme):** The Scheme / Individual Fixed Maturity Plan(s) under the Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). These conditions will be complied with immediately after the close of the NFO itself i.e. at the time of allotment. In case of non-fulfillment with the condition of minimum 20 investors, the Scheme/Plan(s) shall be wound up in accordance with Regulation 39(2)(c) of SEBI (MF) Regulations automatically without any reference from SEBI. In case of non-fulfillment with the condition of 25% holding by a single investor on the date of allotment, the application to the extent of exposure in excess of the stipulated 25% limit would be liable to be rejected and the allotment would be effective only to the extent of 25% of the corpus collected. Consequently, such exposure over 25% limits will lead to refund within 5 Business Days from the date of closure of the New Fund Offer. For interval scheme the aforesaid provision will be applicable at the end of NFO and specified transaction period

- **Applicable on Ongoing Basis (For open ended schemes):** Pursuant to provisions of Para 6.11 of SEBI Master Circular dated May 19, 2023, the Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall be complied within each subsequent calendar quarter, on an average basis, as specified by SEBI. If there is a breach of 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

The requirements of minimum investors in the scheme and maximum holding by a singled investors will be applicable at the portfolio level.

(iv) Risks associated with different derivative strategies (Applicable for schemes using derivatives)

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly.

Other risks include risk of mispricing or improper valuation and the inability of the derivative to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby the Scheme may not be able to sell or purchase derivative quickly enough at a fair price.

(v) Other Risk Factors

a) Risk associated with investing in Corporate Debt Market Development Fund (CDMDF) (Applicable only for specified debt schemes)

In accordance with the requirement of Regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund, the Scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

b) Liquidity risk management practices adopted by the AMC are as under (Applicable only for specified debt schemes):

Liquidity Management Tool	Brief Description	Practice followed by AMC
Potential Risk Matrix (PRC) & Risk-o-meter	The maximum risk that a scheme will run as per design and a measurement of that risk on a regular basis. Remedial measures in place in case any of the design boundaries are breached.	<p><u>Potential Risk Class Matrix</u></p> <p>The PRC Matrix of scheme is defined in order to determine the maximum risk that a fund manager can take in the Scheme. PRC Matrix consists of parameters based on maximum interest rate risk (measured by Macaulay Duration of the Scheme) and maximum credit risk (measured by Credit Risk Value of the Scheme). The PRC Cell of the Scheme is also included in the type of the Scheme. AMC monitors PRC of the Scheme regularly to ensure that the Scheme does not exceed maximum risk depicted by PRC. In case of any breach, remedial measures will be taken in accordance with the requirements of SEBI Circulars.</p> <p><u>Risk-o-meter</u></p> <p>Risk-o-meter in product label of the Scheme dynamically captures the actual risk taken by fund manager and consists of six levels of risk from low risk to very high risk. Risk-o-meter is evaluated on a monthly basis based on Scheme's portfolio holding and disclosed along with the portfolio disclosure. Any change in risk-o-meter is communicated by way addendum uploaded on the website of the fund and by way of email / SMS to the unitholders of the Scheme.</p>
Liquidity Risk Management Framework and Risk Management Framework	Defines Liquidity Risk arising from the liability side and covers all potential liquidity risk scenarios upto 99% confidence interval and remedial measures both for managing this risk on an ongoing basis (LRaR & LCRaR) as well as action plan in case there is a difference between actual outcome and projected outcome.	<p>The Scheme(s) will maintain adequate liquidity as required by the two liquidity ratios - Redemption at Risk (LRaR) and Conditional Redemption at Risk (LCRaR) at 100% of the requirements on a daily basis. However, to meet redemptions, the Scheme(s) may have to periodically dip into their liquid assets which may result in the liquidity ratio dropping below the required threshold. In case the exposure in liquid assets / eligible securities falls below the threshold, then the net inflows in the Scheme(s) will be first used to restore both the liquidity ratios to 100% of the requirements before making fresh purchases outside eligible assets. In case the ratios remain below 100% of the requirement for more than 15 consecutive days, then the information will be highlighted to Trustee on a weekly basis till such the ratios are restored to require levels.</p> <p>Both the above ratios (LRaR and LRCRaR) are reset at a monthly basis based on the immediate previous month's redemption.</p> <p>Further, the back-testing analysis is carried out which involves capturing actual outflow data on a rolling 30-day basis for each day and comparing the same with the predicted outflow for that 30-day period. Cases of breach of back-test are analyzed. In case of large number of back-test failure, the Trustee board shall recommend higher buffer to be applied to minimize the back-test failures in future.</p>
Stress Testing Circular	Addresses the asset side risk from an Interest Rate, Credit and Liquidity Risk perspective at an aggregate portfolio level in terms of its impact on NAV.	Stress Testing is conducted at least on a monthly basis using common methodology to check the annualized impact on NAV of the scheme for each component of stress testing i.e. interest, credit, liquidity risk. Any breach of threshold of stress testing results shall be given cure period of 30 days. In case of any breach of the prescribed thresholds, remedial measures will be taken.

Liquidity Management Tool	Brief Description	Practice followed by AMC
Swing Pricing Circular	In case of severe liquidity stress at an AMC level or a severe dysfunction at market level, the Swing Pricing guidelines get triggered which offers the contingency plan in case all else fails.	Swing Pricing Framework is applicable only in scenarios related to net outflows from the Schemes. Swing Pricing guidelines will get triggered in case of severe liquidity stress at an AMC level or in case of a severe dysfunction at market level. When swing pricing framework is triggered and swing factor is made applicable (in accordance with the disclosures made in the SID), applications of both the incoming and outgoing investors shall be processed at applicable NAV adjusted for swing factor.

VI. Systematic Transfer Plan (STP)

A Unit holder may enroll for Systematic Transfer Plan (STP) and choose to switch from one scheme of Invesco Mutual Fund to another scheme of Invesco Mutual Fund, which is available for investment at that time.

This facility enables the Unit holder to transfer specified amount periodically from the Source scheme (“**Transferor scheme**”) to Target scheme (“**Transferee scheme**”) by redeeming units of the source scheme at Applicable NAV, subject to Exit Load, if any and investing the same amount in target scheme at Applicable NAV.

The amount to be transferred (switched) will be converted into Units on the scheduled date and such number of units will be subtracted from the unit balance in the Unit holder account in the Source (Transferor) scheme. The amount so switched will be invested in the Target (Transferee) scheme. Accordingly, systematic transfer to be effective must comply with the redemption rules of source/transferor scheme and issue rules of target /transferee scheme.

To check whether the scheme offers STP facility and whether the scheme is a Source (Transferor) scheme or Target (Transferee) or both for STP, please refer to Scheme Information Document(s) of respective scheme(s).

The Fund offers following options under STP:

- a. Fixed STP;
- b. Flex STP; and
- c. Appreciation STP.

The features and terms & conditions of STP are as under:

A. Fixed STP:

1. Fixed STP offers daily, weekly, fortnightly, monthly and quarterly (April/ July/ Oct/ Jan) frequency.

7. If the start month is not specified, the STP application would be processed from the succeeding month on the date specified by the investor at the time of enrolment, provided the condition for minimum number of instalment's is met. If the end month is not specified, the Fund would continue the STP till it receives termination notice from the investor. In case the start month and end month both are not specified, the STP application would be registered for the minimum number of instalment's.

- d. The first Flex STP installment will be processed for the installment amount specified by the investor at the time of enrolment. For the second Flex STP installment onwards, the transfer amount shall be computed as per formula stated below.
- e. Calculation of Flex STP installment amount:
 The amount to be transferred in the Transferee (Target) Scheme on the date of transfer shall be **higher** of:

 Fixed amount to be transferred per installment as specified by the investor;

 Or

 The amount determined by using following formula:

 Fixed amount to be transferred per installment as specified by the investor x number of installments (including the current installment) minus market value of investments through Flex STP.

 If the amount (as specified by the formula) to be transferred under STP is not available in the Transferor Scheme in the unit holder's account, the residual amount will be transferred to the Transferee Scheme and Flex STP will be closed.
- f. If the NAV falls continuously during the Flex STP Option period, number of actual installments may be less than those mentioned in the Flex STP Option enrolment form.
- g. The total amount invested in the Transferee (Target) Scheme through Flex STP Option shall not exceed the total amount of investment specified by the investor at the time of enrolment of Flex STP Option i.e. amount per installment x number of enrolled installments.
- h. In case, other financial transactions (i.e. purchase, redemption or switch) are requested by the investor in the Transferee (Target) Scheme in the same folio during the tenure of Flex STP, the balance installments under Flex STP Option will be processed as Fixed STP Option for total investment amount as specified by the investor at the time of enrollment subject to clause (h) above.

An Illustration: Flex STP will work as follows:

Instalment amount to be transferred	Rs. 3,000/-
No. of Instalments	12
STP period	September 2023 - August 2024
STP Start Date	3 rd of the month

Calculation of Flex STP installment amount on the date of the fifth installment i.e. January 3, 2024.

- Total units allotted up to the date of last (fourth) installment i.e. December 3, 2023 is assumed as 823;
- NAV as on January 3, 2024 of Growth option of Transferee Scheme is assumed as Rs. 12/- per unit;
- Hence the market value of investment in the Transferee Scheme on the date of transfer of fifth installment i.e. January 3, 2024 will be Rs 9,876/- i.e. (823*12).

The installment amount for fifth installment will be calculated as follows:

- Fixed amount to be transferred per installment: Rs. 3,000/-.
 - Or
 - As determined by the formula: $(3,000 \times 5) - 9,876 = \text{Rs. } 5,124/-$.
- (a) Or (b) whichever is higher:

Hence, the installment amount to be transferred in the Transferee Scheme on January 3, 2024 will be Rs. 5,124/-

C. Appreciation Option:

Under this option, the unit holder can transfer Rs. 500 and above on monthly/quarterly (April/ July/ Oct/ Jan) basis by transferring appreciation, if any, in the value of units of the Scheme to designated open-ended equity scheme(s) ("**Transferee Scheme/Target Scheme**") of the Fund except Invesco India ELSS Tax Saver Fund*. Capital appreciation, if any, will be calculated from the enrolment date of the STP till first transfer date. Subsequent capital appreciation, if any, will be the capital appreciation between the previous STP date (where STP has been processed and transferred) and the current STP date.

In case of Appreciation Option, if on the date of transfer, there is no appreciation or appreciation is less than Rs. 500, the redemption / transfer under this option will not be made.

*Note - An open ended equity linked saving scheme with a statutory lock in of 3 years and tax benefit.

To check whether the scheme offers ETP Transfer, please refer to Scheme Information Document(s) of respective scheme(s).

Under this facility, the Unit holders may opt for withdrawal/ switch of units to any other plan/ scheme on the occurrence of any one of the following events under trigger option:

- A.** NAV reaches or crosses a particular value: e.g. NAV reaches or crosses Rs. 12.00. If NAV on the date of allotment of investment is less than Rs. 12.00, the trigger will be activated when the NAV rises to Rs. 12.00 or more on close of any day on which NAV is computed.

If NAV on the date of allotment of investment is more than Rs.12.00, the trigger will be activated when the NAV falls to Rs. 12.00 or below on close of any day on which NAV is computed. All transactions linked with trigger will be on the basis of the Applicable NAV of the transaction day on which NAV reaches, crosses or falls below Rs. 12.00.

- B.** Change in the value of units held by Unit holders at least by certain percentage: e.g. change in the value of investment by at least by (+ or – or +/-) 10%

The trigger will be activated when value of the unit holding rises to 10% or more at the close of any day on which the NAV is declared or the trigger will be activated when value of the unit holding falls by 10% or more at the end of any day on which the NAV is declared or the trigger will be activated when value of the unit holding either rises by 10% or more or falls by 10% or more on any day on which the NAV is declared.

- C.** Specific Date Trigger: e.g. The trigger will be activated on the specific date stated by the Unit holder.

Under this facility investor may opt for the following action to be triggered: (Alert notification by Email or SMS)

- Switch out of all / partial Units / specific amount;
- Total amount or percentage of capital appreciation.

The following are the other conditions for ETP:

1. Investors are requested to select any one trigger condition / action mentioned under section A, B & C above. Multiple trigger condition / action will render the application as invalid.
2. In case investor opts for an “Alert”, a notification will be sent by SMS or e-mail, as opted, on the day the “Trigger” condition is satisfied. Any subsequent transaction has to be submitted by investor as per terms and conditions of normal transaction.
3. In case “Switch” option is selected, the same will be executed subject to the minimum purchase / redemption criteria of the respective schemes being satisfied. Else the trigger will not be executed.
4. Units marked under lien or pledged in the Scheme shall not be eligible for ETP.
5. NAVs of the schemes are declared at the close of the Business Day and hence value of the Unit holder’s investments based on the end of day NAV will be considered as a base for activating the trigger. Accordingly, all the redemptions / switches will be executed on the Business Day on which the event occurs.
6. If the Plan / Option / Sub-Option of the Target scheme where the units will be switched is not indicated, units will be switched to the default option of the target scheme.
7. Switch will be implemented on the day the trigger condition is satisfied. The trigger is a one-time operation and will cease once it is exercised.
8. Once a transaction is processed exercising trigger option, the same will not be reversed and it will be final and binding.
9. If a trigger is not achieved and/or implemented due to reasons which are beyond the control of the AMC, the AMC would not be held responsible. Trigger facility is only a facility extended by the AMC for the convenience of the Unit holder and does not form part of any scheme / fund objective.

B. DEFAULT SCENARIOS AVAILABLE TO THE INVESTORS UNDER PLANS/OPTIONS OF THE SCHEMES

The Scheme(s) offers two plans as follows:

- a. Existing / Regular Plan
- b. Direct Plan

Direct Plan will have a lower expense ratio excluding distribution expenses, commission for distribution of Units etc. Direct Plan is only for investors who purchase /subscribe Units directly with the Fund (i.e. application not routed through Distributor). Investments under Direct Plan can be made through various modes offered by the Fund for investing directly with the Fund (except Stock Exchange Platform(s) and all other Platform(s) where investors’ applications for subscription of units are routed through Distributors). Further Registered Investment Advisors (RIAs) can also purchase units of Direct Plan on behalf of their clients through NMF-II platform of National Stock Exchange of India Ltd. and/or BSE StAR MF System of BSE Ltd.

The portfolio of Direct Plan will form part of portfolio of the Scheme and there will be no separate portfolio for Direct Plan. Further, both the options i.e. Growth and IDCW will have common portfolio under the Scheme.

Growth option

IDCW will not be declared under this option. The income attributable to Units under this option will continue to remain invested in the Scheme and will be reflected in the Net Asset Value of Units under this option.

IDCW option

Under this option, IDCW will be declared at the discretion of the Trustees, subject to availability of distributable surplus calculated in accordance with SEBI (MF) Regulations. The amounts can be distributed out of investors capital (Equalization Reserve) which is part of sale price that represents realized gains. On payment of IDCW, the NAV of the Units under IDCW option will fall to the extent of the IDCW payout and applicable statutory levies, if any.

It must be distinctly understood that the actual declaration of IDCW and frequency thereof is at the sole discretion of Board of Trustee. There is no assurance or guarantee to the Unit holders as to the rate of IDCW distribution nor that the IDCW will be paid regularly.

Payout of Income Distribution cum Capital Withdrawal option ('IDCW Payout'):

Under this facility, IDCW declared, if any, will be to those Unit holders, whose names appear in the register of Unit holders on the notified record date.

If IDCW payable under Payout of Income Distribution cum Capital Withdrawal option is equal to or less than Rs. 100/-, then the IDCW would be compulsorily reinvested in the option of the Scheme.

Reinvestment of Income Distribution cum Capital Withdrawal option ('IDCW Reinvestment'):

Under this facility, the IDCW due and payable to the Unit holders will be compulsorily and without any further act by the Unit holder, reinvested in the IDCW option at a price based on the prevailing ex-IDCW Net Asset Value per Unit on the record date. The amount of IDCW re-invested will be net of tax deducted at source, wherever applicable, statutory levies and stamp duty. The IDCWs so reinvested shall constitute a constructive payment of IDCWs to the Unit holders and a constructive receipt of the same amount from each Unit holder for reinvestment in Units.

On reinvestment of IDCWs, the number of Units to the credit of Unit holder will increase to the extent of the IDCW reinvested divided by the Applicable NAV. **There shall, however, be no Exit Load on the IDCW so reinvested.**

The investors should indicate option for which subscription is made by indicating the choice in the appropriate box provided for this purpose in the application form. In case of valid application received without any choice of option, the default option will be considered. For details on default options, refer respective SID(s).

Investors subscribing Units under Direct Plan of a Scheme should indicate "Direct Plan" against the scheme name in the application form. Investors should also mention "Direct" in the ARN column of the application form. The table showing various scenarios for treatment of application under "Direct/Existing" Plan is as follows:

2	Not mentioned	Direct	Direct
3	Not mentioned	Existing	Direct
4	Mentioned	Direct	Direct
5	Direct	Not Mentioned	Direct
6	Direct	Existing	Direct
7	Mentioned	Existing	Existing
8	Mentioned	Not Mentioned	Existing

Pursuant to AMFI best practices guidelines dated February 2, 2024, in case of invalid ARN code mentioned on the application form, the application will be processed under Direct Plan. In case of transactions received from the stock exchange platforms or through any other online platforms with invalid ARN, then the transaction shall be rejected instead of processing under Direct Plan.

In case the EUIN is invalid / missing, the transaction shall be processed in Regular / Existing plan and the distributor / investor shall be given the period of 30 days from the date of transaction for remediation of EUIN and investor shall provide either different EUIN linked to the ARN or switch to Direct Plan.

VII. INVESTMENT VALUATION NORMS FOR SECURITIES AND OTHER ASSETS

1. Introduction:

The Securities and Exchange Board of India (SEBI) has outlined investment valuation norms and accounting policies under SEBI (Mutual Funds) Regulations, 1996 ('**MF Regulations**') as amended from time to time. The Investment Valuation Norms are prescribed in the Eighth Schedule of the regulations and circulars / guidelines issued by SEBI from time to time. Regulation 25(19) of MF Regulations mandate that AMC shall compute and carry out valuation of investments of its mutual fund schemes in accordance with the investment valuation norms specified in Eighth Schedule of MF Regulations.

SEBI vide its Gazette Notification No. LAD-NRO/GN/2011-12/38/4290 dated February 21, 2012 has introduced overarching '**Principles of Fair Valuation**' in Eighth Schedule of the MF Regulations by amending Investment Valuation norms. SEBI has directed that a Mutual Fund should value its investments in good faith and true and fair manner so as to reflect realizable value of the securities / assets and to ensure fair treatment to all investors including existing investors as well as investors seeking to purchase or redeem units of mutual funds in all schemes at all points of time. In the event of conflict of interest between the principles of fair valuation and valuation guidelines prescribed by SEBI, the principles of fair valuation shall prevail. Further SEBI vide Circular dated September 24, 2019 (Para 9.2.3.c. as per SEBI Master circular for Mutual funds dated May 19, 2023) also mandated that waterfall approach for valuation of debt and money market instruments followed by the Valuation Agencies for arriving at security level pricing shall also form part of valuation policy.

Further, AMFI has issued best practice guidelines circular no.135/BP/29/2012-13 dated May 15, 2012 on valuation methodology for valuing Debt and Money Market instruments thereby providing guiding principle for valuation. AMFI vide its circular dated November 18, 2019 has also prescribed waterfall mechanism to be followed by Valuation Agencies for valuation of money market and debt securities.

Additionally, SEBI vide circulars dated March 10, 2021 and March 22, 2021 prescribed norms for valuation of bonds issued under Basel III framework (i.e. AT-1, Tier 2 bonds) as well as perpetual bonds. Pursuant to SEBI circular dated March 22, 2021, AMFI vide its circular dated March 24, 2021 issued guidelines for valuation of AT-1 & Tier II bonds issued under Basel III framework. (Para 9.4 of SEBI Master circular for Mutual funds dated May 19, 2023, prescribes Valuation of Perpetual Bonds.)

Annexure I

VALUATION NORMS FOR SECURITIES / ASSETS

A. Equity and Equity Related Securities:

1	Traded: Equity and Equity Related Securities (Including Redeemable Preference shares and Cumulative Convertible Preference Share (CCPS), Partly Paid-up Equity Shares, Rights & Warrants, Infrastructure Investment Trust (InvIT) & Real Estate Investment Trust (REIT):	<p>Traded Securities will be valued at the last quoted closing price on the selected Stock Exchange. Where security is not traded on the selected stock exchange on a particular valuation date, the last quoted closing price on another Stock Exchange may be used. If a security is not traded on any stock exchange on a particular valuation day, the value at which it was traded on the selected stock exchange or any other stock exchange, as the case may be, on the earliest previous day may be used, provided such date is not more than thirty (30) days prior to valuation date.</p> <p>In case preference shares ,CCPS, REITs and InvITs are not traded for more than 30 days, the same shall be valued in good faith by AMC and appropriate illiquidity discount will be applied.</p> <p>The selected Stock exchange would be the National Stock Exchange of India Limited (NSE). If a security is not traded on NSE, the price on Bombay Stock Exchange (BSE) would be considered.</p> <p>Reasons for change of the stock exchange selected for valuation of security will be recorded in writing by AMC.</p>
1A	Compulsory Convertible Debentures (CCDs)	<p>Until listing, if prices are not available from AMFI approved valuation agencies, it will be valued at cost and appropriate illiquidity discount may be provided.</p>

		<p>On Listing, Valuation will be at the last quoted closing price on NSE Stock Exchange.</p> <p>Where security is not traded on the NSE on a particular valuation date, the last quoted closing price on BSE may be used.</p> <p>If Security is not traded on NSE or BSE on a particular valuation day and the prices from AMFI approved valuation agencies are available, then the average prices provided by AMFI approved agencies will be used.</p> <p>In case the securities do not get traded for a period of 30 days or prices of AMFI approved agencies are not available, CCDs will be valued at fair value as per procedures # determined by the Valuation Committee.</p> <p># Procedure & Methodology for valuation of CCDs</p> <ol style="list-style-type: none"> Each CCD shall be converted into such number of Equity Shares based on the conversion price arrived in accordance with the offer documents. In case the CCD has two components viz. one component having bond carrying a coupon rate and second component having an embedded forward contract for compulsory conversion into equity, at a pre-determine formula, linked to the underlying price of the stock on the exchange, the valuation derived would be a summation of the bond valuation and the Net present value (NPV) of the gain / loss on the embedded forward contract for conversion into equity shares. Valuation of bonds: The same will be valued as per the framework for debt securities/instruments provided by AMFI until the prices are provided by AMFI approved agencies. Valuation of embedded forward contract for equity conversion: The embedded forward contract has three elements – time value, price movement of the underlying stock and illiquidity risk. The time value (NPV) is the discounting factor, as derived from the bond valuations (from AMFI valuation agencies). In case the conversion is scheduled after completion of specified period/years as mentioned in the offer documents, the value arrived will be reduced by appropriate illiquidity discount on the gain, if any, as may be specified by SEBI under the applicable guidelines or as may be decided by Valuation Committee. <p>The Valuation Committee may exercise its discretion to value the security at a conservative value i.e. at cost or as per the above methodology whichever is lower to ensure fair valuation.</p>
2	Non-traded / Thinly traded Equity and Equity Related Securities (Including Redeemable Preference shares and Cumulative Convertible Preference Share (CCPS), Partly Paid-up Equity Shares & Warrants)	<p>A security will be treated as non-traded if it is not traded on any selected stock exchange for a period of thirty days prior to the valuation date.</p> <p>Thinly traded equity/equity related security is defined as, when trading in an equity/equity related security (such as convertible debentures, equity warrants, etc.) in a month is both less than Rs. 5 lacs and the total volume is less than 50,000 shares. In order to determine whether a security is thinly traded or not, the volumes traded in all recognized stock exchange in India may be taken into account. (SEBI Circular Ref. No. MFD/CIR/14 /088 / 2001 dated March 28, 2001) (Para 9.1.2 of SEBI Master circular of Mutual funds dated May 19, 2023 for Thinly Traded Securities)</p>

		<p>Non-traded/ Thinly traded securities shall be valued in 'good faith' on the basis of appropriate valuation based on principles of fair valuation.</p> <p>As per SEBI Circular MFD/CIR/ 8 / 92 / 2000 dated September 18, 2000 (Para 9.2.2 of SEBI Master circular for Mutual funds dated May 19, 2023) non-traded / thinly traded equity is to be valued as follows:</p> <ol style="list-style-type: none"> Based on the latest available Balance Sheet, net worth shall be calculated as follows: Net Worth per share = [share capital + reserves (excluding revaluation reserves) – Misc. expenditure and Debit Balance in P&L A/c] Divided by No. of Paid up Shares. Average capitalization rate (P/E ratio) for the industry based upon either BSE or NSE data (which should be followed consistently and changes, if any noted with proper justification thereof) shall be taken and discounted by 75% i.e. only 25% of the Industry average P/E shall be taken as capitalization rate (P/E ratio). Earnings per share (EPS) of the latest audited annual accounts will be considered for this purpose. The value as per the net worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 10% for illiquidity so as to arrive at the fair value per share. In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalized earning. In case where the latest balance sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero. In case such an individual security accounts for more than 5% of the total assets of the scheme, an independent valuer shall be appointed by Board of Trustee for the valuation of the said security. To determine if a security accounts for more than 5% of the total assets of the scheme, it should be valued by the procedure above and the proportion which it bears to the total net assets of the scheme to which it belongs would be compared on the date of valuation. <p>Further, partly paid-up equity shares shall be valued at Underlying Equity price as reduced by the balance call money payable. Suitable illiquidity discount, if deemed necessary, may be applied with approval from valuation committee.</p> <p><u>Valuation of Thinly Traded / Non – traded Warrants:</u></p> <ol style="list-style-type: none"> Warrants are the entitlements to subscribe for the shares at a predetermined price at a later date in future. In respect of warrants to subscribe for shares attached to instruments, the warrants will be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. Accordingly warrants will be valued using following formula: <p>Value of Warrant = [Value of underlying shares - exercise price]</p>
--	--	--

		<p>iii. An appropriate illiquidity discount will be applied to account for the period which must elapse before the warrant can be exercised.</p> <p>iv. If the amount payable on exercise of the warrants is higher than the value of the share, the value of the warrants should be taken as zero.</p> <p><u>Non - traded Preference Shares:</u> Non-traded preference shares shall be valued in good faith depending upon the type of the preference share and after considering illiquidity discount, if any.</p>
3	Unlisted shares / preference shares/ warrants (excluding instruments issued by listed Companies and due for listing and primary market issue)	<p>Unlisted Equity Shares As per the MF Regulations, schemes of Invesco Mutual Fund will invest only in listed or to be listed equity and equity related instruments. However, if unlisted equity shares are received / allotted pursuant to scheme of arrangement and / or resolution plan approved under insolvency proceedings or any other corporate action / circumstances, then the unlisted equity shares will be valued “in good faith” as per the Methodology of Valuation given in para 9.8 of SEBI master circular for Mutual funds dated May 19, 2023. as follows:</p> <p>a) Based on the latest available audited balance sheet, Net Worth shall be calculated as the lower of item (1) and (2) below:</p> <ol style="list-style-type: none"> 1. Net Worth per share = [Share Capital + Free Reserves (excluding revaluation reserves) - Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] / Number of Paid up Shares. 2. After taking into account the outstanding warrants and options, Net Worth per share shall again be calculated and shall be = [Share Capital + consideration on exercise of Option and/or Warrants received/receivable by the Company + Free Reserves (excluding Revaluation Reserves) - Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] / Number of Paid up Shares plus Number of Shares that would be obtained on conversion and/or exercise of Outstanding Warrants and Options. 3. The lower of (1) and (2) above shall be used for calculation of Net Worth per share and for further calculation in (c) below. <p>b) Average capitalisation rate (P/E ratio) for the industry based upon either BSE or NSE data (which shall be followed consistently and changes, if any, noted with proper justification thereof) shall be taken and discounted by 75 per cent. i.e. only 25 per cent of the industry average P/E shall be taken as capitalisation rate (P/E ratio). Earnings per share (EPS) of the latest audited annual accounts will be considered for this purpose.</p> <p>c) The value as per the Net Worth value per share and the capital earning value calculated as above shall be averaged and further</p>

		<p>discounted by 15 per cent for illiquidity so as to arrive at the fair value per share.</p> <p>The above valuation methodology shall be subject to the following conditions:</p> <ol style="list-style-type: none"> All calculations shall be based on audited accounts. If the latest Balance Sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero. If the Net Worth of the company is negative, the share would be marked down to zero. In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalised earning. In case an individual security accounts for more than 5 per cent of the total assets of the scheme, an independent valuer shall be appointed for the valuation of the said security. To determine if a security accounts for more than 5 per cent of the total assets of the scheme, it shall be valued in accordance with the procedure as mentioned above on the date of valuation. <p>At the discretion of the AMCs and with the approval of the Trustees, unlisted equity shares may be valued at a price lower than the value derived using the aforesaid methodology.</p> <p><u>For Unlisted Preference shares and warrants:</u> The same shall be valued in good faith by AMC and appropriate illiquidity discount will be applied.</p>
4	Right entitlements	<ol style="list-style-type: none"> Right entitlements both fully paid and partly paid will be valued as follows: $V_r = n/m \times (P_{ex} - P_{of})$ <p>Where V_r = Value of rights n = No. of rights offered m = No. of original shares held P_{ex} = Ex-rights price P_{of} = Rights Offer Price</p> In case the Rights Offer Price is greater than the ex-rights price, the value of the rights share is to be taken as zero. If the rights are derived out of non-traded shares or unlisted shares then the rights would be valued at zero market price. <p>If the rights are traded on stock exchange, then the valuation guidelines for listed securities shall be applicable.</p> <p>Further suitable illiquidity discount will be applied on Right entitlement from Ex-date till the date of listing/traded price is available.</p> <p>Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.</p>

5	Derivatives: Equity / Index Options & Equity / Index Futures	The Exchanges give daily settlement prices in respect of all derivatives positions. These settlements prices shall be used for the purpose of valuation of derivatives i.e. futures and options.
6	ADR / GDR / Offshore Securities	<ul style="list-style-type: none"> • ADR / GDR / Offshore Securities will be valued at the last quoted closing price on the Stock Exchange on which the respective security is listed. In case an security is listed on more than one stock exchange, then the AMC shall select the appropriate stock exchange for valuation and record the same in writing. Any subsequent change in the stock exchange selected for valuation of securities will also be recorded in writing by the AMC and approved by the Valuation Committee. • In case the security is not traded on the above mentioned days, price of previous day should be used provided the price is not prior than 30 days. • In case the security is not traded for more than 30 days, the same shall be valued in good faith by AMC and appropriate illiquidity discount will be applied.
7	Application Money for Primary Market Issue:	Application money for primary market issue should be valued at cost up to 30 days from the closure of the issue and / or allotment. If the security is not allotted within 30 days from the closure of the issue or listed within 30 days from the date of allotment, application money is to be valued as per the directives of valuation committee.
8	Equity shares invested as an Anchor Investor:	At the discretion of the AMC and with the approval of the valuation committee, post listing, equity shares invested on Anchor basis may be valued at a price lower than the listed market price available on NSE/BSE by applying a suitable illiquidity discount (If such shares are in lock-in period).
9	Shares on De-merger / Merger and Other Corporate Action Events	<p>Demerger</p> <ol style="list-style-type: none"> 1. In case one entity is demerged into 2 or more entities and the shares of all the resulting entities as well as the demerged entity are traded immediately on de-merger, then the last quoted closing price on the stock exchange will be considered for valuation, provided such closing price is not more than 30 days old prior to valuation date. 2. In case of demerger where the shares of the demerged entity continue to be listed and shares of resulting entity are unlisted, then the value of shares of resulting entity will be calculated as follows: Closing price of shares of demerged entity on immediately preceding trading day before demerger (i.e. cum demerger price) minus Closing price of shares of demerged entity on the trading day immediately after demerger (i.e. ex-demerger price) <p>In case the value derived using above formula is zero or negative then the shares of resulting entity will be valued at zero.</p> <p>In case there are two or more unlisted entities resulting due to a demerger, then the market value of shares of unlisted entity arrived as above will be allocated to the resulting entities in the ratio of cost of shares till they are listed and traded on a stock exchange. The cost</p>

		<p>price of new entity/entities would be derived proportionately from the cost price of parent entity.</p> <p>If a company provides any method / ratio for cost allocation as a part of scheme of arrangement, the same will be considered.</p> <p>3. In case of demerger where shares of all the entities (i.e. demerged entity as well as resulting entities) are unlisted, then the last quoted closing price of demerged entity on the trading day immediately preceding the demerger (i.e. cum demerger price) will be considered for valuation of shares of all the entities for a period of 30 days from the date of demerger and such value will be allocated over demerged entity and resulting entities in the ratio of cost of shares.</p> <p>If a company provides any method / ratio for cost allocation as a part of scheme of arrangement, the same will be adopted.</p> <p>In case there are no details available for the company, the same will be valued at fair value as determined by the valuation committee.</p> <p>Merger Where company 'X' is merged with company 'Y' and company 'Y' continues to be listed post the merger, then the shares of company 'Y' allotted against shares of company 'X' (based on merger ratio) will be valued at the last quoted closing price of company 'Y' on the stock exchange. The aggregate cost of shares of company 'X' will be added to the aggregate cost of shares of company 'Y'.</p> <p>In case where company 'X' and company 'Y' which are listed are merged to form company 'Z' and company 'Z' is unlisted, then the value of shares of company 'Z' will be aggregate of last quoted closing price of shares of company 'X' and shares of company 'Y' on immediate preceding trading day (i.e. cum-merger date) adjusted for merger ratio.</p> <p>The aggregate cost of company 'X' and company 'Y' shares will be added to derive the cost of company 'Z' shares.</p> <p>Further while valuing shares pursuant to corporate action like merger / demerger, appropriate illiquidity discount may be provided with the approval of Valuation Committee.</p> <p>In case of the demerger or any other corporate action where special price discovery session (pre-open session) is held by the stock exchanges, then price of the resulting company will be the difference in closing price of residual entity on NSE or BSE on day immediately prior to ex-date and closing price determined at the end of special session (pre-open session) on NSE or BSE. Appropriate illiquidity discount may be provided with the approval of Valuation Committee.</p> <p>This is explained by way of example as follows:</p> <ol style="list-style-type: none"> 1. Company X ('Residual Company') demerges its financial services business into Company Y ('Resulting Company') and ex-date for the said corporate action was July 20, 2023. 2. The closing price of Company X on July 19, 2023 on NSE was Rs.2,841.85.
--	--	---

		<p>3. On July 20, 2023, stock exchanges conducted special pre-open session to discover price of Company X after demerger.</p> <p>4. At the end of Pre-open session on July 20, 2023, the price of Company X was Rs.2,580.00</p> <p>5. The value of Company Y (‘Resulting Company’) will be arrived as follows: Rs.2,841.85 minus Rs.2,580.00 = Rs. 261.85</p> <p>Accordingly, the equity shares of Company Y will be valued at Rs 261.85 subject to illiquidity discount as may be approved by the Valuation Committee till the said shares are listed.</p> <p>In case of any other corporate action, the AMC shall value the security at fair value in good faith on a case to case basis and approval from valuation committee will be sought for the valuation</p>
10	Suspended Security	<p>In case trading in an equity security is suspended upto 30 days, then the last traded price would be considered for valuation of that security.</p> <p>If an equity security remains suspended for trading on the stock exchange for more than 30 days, then it would be valued as non-traded security.</p>
11	Listed Equity Shares with lock-in period greater than one month	<p>Will be valued at the last quoted closing price on the NSE. Where a security is not traded on the NSE on a particular valuation date, the last quoted closing price on BSE may be used. If a security is not traded on NSE / BSE on a particular valuation day, the value at which it was traded on the NSE / BSE, as the case may be, on the earliest previous day may be used, provided such date is not more than thirty (30) days prior to valuation date.</p> <p>Further, for a lock-in period in excess of one month, an illiquidity discount of 1% per month will be levied for each calendar month.</p> <p>For Example: Equity shares having lock in period of 12 months, illiquidity discount applicable in the first month will be 11%.</p>

In case one Trigger Date is available, then valuation would be done as to the said Trigger Date. In case both Trigger Dates are available, then valuation would be done to the earliest date. <p>If a put option is not exercised by a Mutual Fund when exercising such put option would have been in favour of the scheme, in such cases the</p>

5	Interest Rate Futures	<p>The Exchanges give daily settlement prices in respect of all derivatives positions. These settlement prices shall be used for the purpose of valuation.</p>
6	Bank Fixed Deposits and Repurchase (repo) transactions including Corporate Bond Repo	<p>Repurchase (repo) transactions including tri-party repo i.e. TREPS, Clearcorp Repo Order Matching System i.e. CROMS and Repo in Corporate Debt Securities with tenor of up to 30 days and investment in short-term deposits with banks (pending deployment) shall be valued on cost plus accrual basis.</p> <p>Repurchase (repo) transactions including tri-party repo i.e. TREPS, Clearcorp Repo Order Matching System i.e. CROMS and Repo in Corporate Debt Securities of maturity above 30 days will be valued at average of security level prices provided by valuation agencies. In case security level prices given by valuation agencies are not available, then such securities would be valued at purchase yield on the date of purchase. The security shall be amortized from 31st day price to redemption price on straight line basis from the 30th day before maturity.</p>
7	AT-1 and Tier II issued under Basel III framework	<p>AT-1 / Tier II bonds will be valued at average of the security level prices provided by Valuation Agencies. For arriving at security level pricing, waterfall approach to be followed by Valuation agencies is annexed as Annexure III.</p>

ii. Valuation of Money Market and Debt Securities rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security assigned by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “Default” if the interest and / or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “Default” grade by a CRA. In this respect, Invesco Mutual Fund shall promptly inform the Valuation Agencies and the CRAs, any instance of non-receipt of payment of interest and / or principal amount (part or full) in any security

In case of instruments with dual rating the same would be considered below investment grade if any of the rating agencies rating that instrument downgrades it to sub investment grade.

All such money market and debt securities rated below investment grade shall be valued at the average of the security level prices provided by Valuation Agencies.

Till such time the Valuation Agencies compute the valuation of securities classified as below investment grade, such securities shall be valued on the basis of indicative haircuts provided by Valuation Agencies. These indicative haircuts shall be applied on the date of credit event i.e. migration of the security to sub-investment grade and shall continue till the Valuation Agencies compute the valuation price of such securities. These haircuts shall be updated and refined as and when there is availability of material information which impacts the haircuts.

In case of trades during the interim period between date of credit event and receipt of valuation price from Valuation Agencies, the AMC shall consider such traded price for valuation if it is lower than the price post standard haircut. The said traded price shall be considered for valuation till the valuation price is determined by the Valuation Agencies.

In case of trades after the valuation price is computed by the Valuation Agencies as referred above and where the traded price is lower than such computed price, such traded price shall be considered for the purpose of valuation and the valuation price may be revised accordingly.

The indicative haircut communicated by AMFI vide its communication dated April 30, 2019 is as follows:

1. Haircuts for senior, secured securities **

Rating / Sector	Infrastructure, Real Estate, Hotels, Loan against shares and Hospitals	Other Manufacturing and Financial Institutions	Trading, Gems & Jewellery and Others
BB	15%	20%	25%
B	25%	40%	50%
C	35%	55%	70%
D	50%	75%	100%

2. Haircuts on subordinated and unsecured (or both) securities **

Rating / Sector	Infrastructure, Real Estate, Hotels, Loan against shares and Hospitals	Other Manufacturing and Financial Institutions	Trading, Gems & Jewellery and Others
BB	25%	25%	25%
B	50%	50%	50%
C	70%	70%	70%
D	100%	100%	100%

The indicative haircuts mentioned in table above are currently recommended by Valuation Agencies and shall be subject to change from time to time based on the indicative haircuts provided by agencies.

iii. Treatment of accrued interest, future interest accrual and future recovery in case of money market and debt securities classified as below investment grade or default:

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

iv. Treatment of any future recovery

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

v. Inter-Scheme Transfer (IST)

Inter-scheme Transfer (IST)

- IST of any money market or debt security (irrespective of maturity) will be done using the prices sourced from the Valuation Agencies.
- If prices from the Valuation Agencies are received within the pre-agreed turn-around-time (TAT) an average of the prices so received shall be used for IST pricing. The TAT is currently 30 minutes for CP, CD, T-Bills and 45 minutes for G-Sec, SDL, corporate bonds and may be amended from time to time by AMFI.

- If price from only one valuation agency is received within the agreed TAT, then that price will be used for IST pricing
- If prices are not received from any of the Valuation Agencies within the agreed TAT, the IST would be at the price derived from the weighted average yield / price of traded securities at the time of the IST for which the below mentioned process will be followed

a) For instruments maturing above 1 year:

The weighted average yield / price of traded securities (excluding inter scheme transfers of others and own trades of Invesco Mutual Fund) will be considered if there are at least two trades, with each trade being of a minimum Rs. 25 crores face value, aggregating to Rs. 25 crores or more for same or similar security on a public platform*

b) For instruments maturing below 1 year:

The weighted average yield / price of traded securities (excluding inter scheme transfers of others and own trades of Invesco Mutual Fund) will be taken if there are at least three trades, with each trade being of a minimum Rs. 25 crores face value, aggregating to Rs. 100 crores or more for same or similar security on a public platform*

Criteria for identifying similar securities in case of securities having residual maturing above 30 days:

Similar security should be identified by the following waterfall logic, provided that the maturity date of the security is within the same calendar quarter:

- Same issuer and same type of asset, with maturity date within ± 15 working days of maturity date of security shall be considered first. If no such instance is available, then Step ii. will be followed:

Example: For Punjab National Bank CD maturing on March 6, 2019, all secondary market trades of Punjab National Bank CDs maturing within February 12, 2019 to March 28, 2019 will be considered first.

- Similar security from a different issuer within the same category (PSU Bank, Private Bank or Financial Institution etc.) and similar long term credit rating**, with maturity date within ± 15 working days of maturity date of security will be considered.

Example: For Punjab National Bank CD maturing on March 6, 2019, all secondary market trades of similar public sector bank CDs maturing within February 12, 2019 to March 28, 2019 will be considered.

**In case of banks CDs -

- Issuer of the Securities having long term rating of AAA and/or AA+ and short term rating of A1+ will be considered as comparable.
- Issuer of the Securities having long term rating of AA and/or AA- and short term rating of A1+ will be considered as comparable.
- Issuer of the Securities having long term rating of A+ and below and short term rating of A1+ will be considered as comparable.

Criteria for identifying similar securities in case of securities having residual maturing below 31 days:

Similar security should be identified by the following waterfall logic, provided that the maturity date of the security is within the same calendar quarter and should have a residual maturity upto 30 days:

- Same issuer and same type of asset, with maturity date within ± 7 calendar days of maturity date of security shall be considered first and should have a residual maturity upto 30 days. If no such instance is available, then Step ii. will be followed.

Example: For Punjab National Bank CD maturing on March 6, 2019, all secondary market trades of Punjab National Bank CDs maturing within February 27, 2019 to March 13, 2019 will be considered first.

- ii. Similar security from a different issuer within the same category (PSU Bank, Private Bank or Financial Institution etc.) and similar long term credit rating**, with maturity date within ± 7 calendar days of maturity date of security will be considered and should have a residual maturity upto 30 days.

Example: For Punjab National Bank CD maturing on March 6, 2019, all secondary market trades of similar public sector bank CDs maturing within February 27, 2019 to March 13, 2019 will be considered first.

** In case of banks CDs -

- Issuer of the Securities having long term rating of AAA and/or AA+ and short term rating of A1+ will be considered as comparable.
- Issuer of the Securities having long term rating of AA and/or AA- and short term rating of A1+ will be considered as comparable.
- Issuer of the Securities having long term rating of A+ and below and short-term rating of A1+ will be considered as comparable.

For the purpose of determining similar security, the data available on 'Bloomberg' will be used as the source for credit ratings.

Further, the classification of the issuers for similar securities will be into three sectors viz. Banking, Manufacturing and Non-Banking Finance Companies (NBFC). Bank CDs will be compared against bank CDs (within bank CDs, PSU Bank CDs will be compared to PSU Bank CDs and Private / Foreign bank CDs will be compared to Private / Foreign bank CDs), Manufacturing papers will be compared against manufacturing papers and NBFC will be compared against NBFC.

Further, for the purpose of identification of similar securities, in case of security embedded with 'Put and Call' option, only those securities with 'Put and Call' option on the same day and the same 'Put and Call' option price shall be deemed to mature on such Put / call date. . All other securities with a "Put and a Call" option not meeting these criteria would have the final maturity date of the security considered for the purpose of identification of similar securities

Note:

Outlier trades, if any, will be ignored after recording suitable justification.

If due to the non-availability of traded securities, at the time of the IST, the above mentioned criteria cannot be fulfilled, the IST would be done at the previous day's price/yield.

Notes:

1. *Public Platform refers to:

F-TRAC / Corporate Bond Reporting Platform (CBRICS) / Indian Corporate Debt Market (ICDM) / Negotiated Dealing System - Order Management (NDS-OM) / MSE FIRST: For corporate bonds / debentures, commercial papers, certificate of deposits and securitized debt. (Applicable only for pricing of IST and not for valuation)

Order of preference of public platforms for Bonds will be as follows:

- CBRICS
- ICDM
- MSE FIRST

2. Weighted average yield shall be rounded up to two digits after decimal point.

Deviations where the prices given by Valuation Agencies are not considered for valuation

In case AMC decides to deviate from the valuation prices or indicative haircut given by the Valuation Agencies, the detailed rationale for each instance of deviation shall be recorded by the AMC. The rationale for deviation along-with

details such as information about the security (ISIN, issuer name, rating etc.), price at which the security was valued vis-a-vis the price as per the Valuation Agencies and the impact of such deviation on scheme NAV (in amount and percentage terms) shall be reported to the Board of AMC and Trustees. The rationale for deviation along-with details mentioned above shall be disclosed immediately and prominently, under a separate head on website of AMC. Further, while disclosing the total number of instances of deviation in the monthly and half-yearly portfolio statements, AMC shall also provide the exact link to the website for accessing the information mentioned above.

C. Other securities:

1	Convertible Debentures	The non-convertible and convertible components of convertible debentures and bonds shall be valued separately. The non-convertible component would be valued on the same basis as would be applicable to a debt instrument. The convertible component shall be valued on the same basis as would be applicable to an equity instrument. If, after conversion the resultant equity instrument would be traded pari passu with an existing instrument, which is traded, the value of later instrument can be adopted after an appropriate discount for the non-tradability of the instrument during the period preceding conversion. While valuing such instruments, the fact whether the conversion is optional will also be factored in.
2	Valuation of Mutual Fund Unit (MFU)/ Valuation of Exchange Traded Fund (ETF)	<p>As per the guidelines issued by AMFI vide letter no 1 / Valuation / 16/10-11 dated December 28, 2010 for valuation of mutual fund units:</p> <p>Listed: MFU and ETF listed and Traded would be valued at the closing price on the stock exchange as on the valuation date.</p> <p>In case on the valuation date if traded price is not available for listed MFU / ETF, then such MFU / ETF would be valued at applicable NAV of the respective scheme as on the valuation date.</p> <p>Unlisted: Unlisted MFU would be valued at the NAV as on the valuation date.</p>
3	Gold	<p>Since physical gold and other permitted instruments linked to gold are denominated in gold tonnage, it will be valued based on the market price of gold in the domestic market and will be marked to market on a daily basis. The market price of gold in the domestic market on any business day would be arrived at as under:</p> <p>Domestic price of gold = (London Bullion Market Association AM fixing in US\$ / ounce X conversion factor for converting ounce into kg for 0.995 fineness X rate for US\$ into INR) + custom duty for import of gold and other taxes/levies and charges, as applicable + notional premium & fixing that may be charged for delivery of gold to the place where it is stored on behalf of mutual fund.</p> <p>Premium / Discount may be reviewed and applied by the fund manager on an ongoing basis to ensure valuation of Gold reflects the fair value in comparison with MCX spot price which reflects domestic price. In case MCX spot price is not available, any other appropriate source may be used as agreed upon by valuation committee to determine the domestic price.</p> <p>On any day, the LBMA AM fixing or reference rate issued by Financial Benchmarks India Ltd (FBIL) is not available due to a holiday, then the previous day price is applied for the purpose of calculating the value of gold.</p>
4	Valuation of Units of Overseas Mutual Fund including Units of Overseas	<p>Units of Overseas Mutual Fund Units of Overseas Mutual Fund will be valued at last published Net Asset Value ("NAV") of underlying Overseas Mutual Fund security.</p>

	Exchange Trade Fund (ETF):	<p><u>Units of Listed Overseas Exchange Trade Funds (ETF)</u></p> <p>Units of Overseas Exchange Traded Fund will be valued at the last quoted closing price on the Stock Exchange on which the respective Overseas ETF is listed. In case an Overseas ETF is listed on more than one stock exchange, then the AMC shall select the appropriate stock exchange for valuation and record the same in writing. Any subsequent change in the stock exchange selected for valuation of Overseas ETF will also be recorded in writing by the AMC.</p> <p>In case on the valuation date if the traded price (i.e. last quoted closing price) is not available for units of Overseas ETF on the selected stock exchange, then such units will be valued at available NAV of the respective underlying Exchange Trade Fund on the valuation date.</p>
5	Security Lending & Borrowing (SLB)	Security Lending & Borrowing (SLB) will be valued on the basis of amortization.
6	Corporate Debt Market Development Fund (CDMDF)	Units of Corporate Debt Market Development Fund (CDMDF) would be valued at the published NAV as on the valuation day.

D. Conversion of prices in foreign currency to Indian Rupees ('INR'):

The prices of securities which are denominated in foreign currencies (i.e. ADR/GDR/Offshore securities/units of overseas mutual funds) need to be converted into INR. For conversion, the Bid Rate of foreign currency INR exchange rate available on Reuters at 5.00 p.m. IST would be used.

In case, the Reuters exchange rate is not available, then the following sources will be used for exchange rate in the order of priority:

- ☐ Exchange rate (Bid Rate) available on Bloomberg at 5.00 p.m. IST;
- ☐ Reference rate issued by Financial Benchmarks India Ltd (FBIL) as at the close of banking hours on the relevant business day in India;
- ☐ Any other publicly available source.

If the Exchange rate is not available in any of the above source then previous day exchange rate would be used.

ANNEXURE II - WATERFALL MECHANISM

Part A: Valuation of Money Market and Debt Securities other than G-Secs

1. Waterfall Mechanism for valuation of money market and debt securities:

The following shall be the broad sequence of the waterfall for valuation of money market and debt securities:

- i. Volume Weighted Average Yield (VWAY) of primary reissuances of the same ISIN (whether through book building or fixed price) and secondary trades in the same ISIN
- ii. VWAY of primary issuances through book building of same issuer, similar maturity (Refer Note 1 below)
- iii. VWAY of secondary trades of same issuer, similar maturity
- iv. VWAY of primary issuances through fixed price auction of same issuer, similar maturity
- v. VWAY of primary issuances through book building of similar issuer, similar maturity (Refer Note 1 below)
- vi. VWAY of secondary trades of similar issuer, similar maturity.
- vii. VWAY of primary issuance through fixed price auction of similar issuer, similar maturity
- viii. Construction of matrix (polling may also be used for matrix construction)
- ix. In case of exceptional circumstances, polling for security level valuation (Refer Note 2 below)

Note 1

Except for primary issuance through book building, polling shall be conducted to identify outlier trades. However, in case of any issuance through book building which is less than INR 100 Cr, polling shall be conducted to identify outlier trades.

Note 2

Some examples of exceptional circumstance would be stale spreads, any event/news in particular sector/issuer, rating changes, high volatility, corporate action or such other event as may be considered by Valuation Agencies. Here stale spreads are defined as spreads of issuer which were not reviewed/updated through trades/primary/polls in same or similar security/issuers of same/similar maturities in waterfall approach in last 6 months.

Further, the exact details and reasons for the exceptional circumstances which led to polling shall be documented and reported to AMCs. Further, a record of all such instances shall be maintained by AMCs and shall be subject to verification during SEBI inspections.

Note 3

All trades on stock exchanges and trades reported on trade reporting platforms till end of trade reporting time (excluding Inter-scheme transfers) should be considered for valuation on that day.

Note 4

It is understood that there are certain exceptional events, occurrence of which during market hours may lead to significant change in the yield of the debt securities. Hence, such exceptional events need to be factored in while calculating the price of the securities. Thus, for the purpose of calculation of VWAY of trades and identification of outliers, on the day of such exceptional events, rather than considering whole day trades, only those trades shall be considered which have occurred post the event (on the same day).

The following events would be considered exceptional events:

- i. Monetary / Credit Policy
- ii. Union Budget
- iii. Government Borrowing / Auction Days
- iv. Material Statements on Sovereign Rating
- v. Issuer or Sector Specific events which have a material impact on yields
- vi. Central Government Election Days
- vii. Quarter end days

In addition to the above, Valuation Agencies may determine any other event as an exceptional event. All exceptional events along-with valuation carried out on such dates shall be documented with adequate justification.

2. Definition of tenure buckets for Similar Maturity

When a trade in the same ISIN has not taken place, reference should be taken to trades of either the same issuer or a similar issuer, where the residual tenure matches the tenure of the bond to be priced. However, as it may not be possible to match the exact tenure, it is proposed that tenure buckets are created and trades falling within such similar maturity be used as per table below.

Residual Tenure of Bond to be priced	Criteria for similar maturity
Upto 1 month	Calendar Weekly Bucket
Greater than 1 month to 3 months	Calendar Fortnightly Bucket
Greater than 3 months to 1 year	Calendar Monthly Bucket
Greater than 1 year to 3 years	Calendar Quarterly Bucket
Greater than 3 years	Calendar Half Yearly or Greater Bucket

In addition to the above:

- a. In case of market events, or to account for specific market nuances, Valuation Agencies may be permitted to vary the bucket in which the trade is matched or to split buckets to finer time periods as necessary. Such changes shall be auditable. Some examples of market events / nuances include cases where traded yields for securities with residual tenure of less than 90 days and more than 90 days are markedly different even though both may fall within the same maturity bucket, similarly for less than 30 days and more than 30 days or cases where yields for the last week v/s second last week of certain months such as calendar quarter ends can differ.

- b. In the case of illiquid/ semi liquid bonds, it is proposed that traded spreads be permitted to be used for longer maturity buckets (1 year and above). However, the yield should be adjusted to account for steepness of the yield curve across maturities.
- c. The changes / deviations mentioned in clauses a and b, above, should be documented, along with the detailed rationale for the same. Process for making any such deviations shall also be recorded. Such records shall be preserved for verification.

3. Process for determination of similar issuer

Valuation Agencies shall determine similar issuers using one or a combination of the following criteria. Similar issuer do not always refer to issuers which trade at same yields, but may carry spreads amongst themselves & move in tandem or they are sensitive to specific market factor/s hence warrant review of spreads when such factors are triggered.

- i. Issuers within same sector/industry and/or
- ii. Issuers within same rating band and/or
- iii. Issuers with same parent/ within same group and/or
- iv. Issuers with debt securities having same guarantors and/or
- v. Issuers with securities having similar terms like Loan Against Shares (LAS)/ Loan Against Property (LAP)

The above criteria are stated as principles and the final determination on criteria, and whether in combination or isolation shall be determined by the Valuation Agencies. The criteria used for such determination should be documented along with the detailed rationale for the same in each instance. Such records shall be preserved for verification. Similar issuers which trade at same level or replicate each other's movements are used in waterfall approach for valuations. However, similar issuer may also be used just to trigger the review of spreads for other securities in the similar issuer category basis the trade/news/action in any security/ies within the similar issuer group.

4. Recognition of trades and outlier criteria

i. Volume criteria for recognition of trades (marketable lot)

As required under Para 1.1.1.1(a) of SEBI vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019, marketable lot is defined as under:

The following volume criteria shall be used for recognition of trades by Valuation Agencies:

Parameter	Minimum Volume Criteria for marketable lot
Primary	INR 25 cr for both Bonds/NCD/CP/ CD and other money market instruments
Secondary	INR 25 cr for CP/ CD, T-Bills and other money market instruments
Secondary	INR 5 Cr for Bonds/NCD/ G-secs

Trades not meeting the minimum volume criteria i.e. the marketable lot criteria as stated above shall be ignored.

ii. Outlier criteria

It is critical to identify and disregard trades which are aberrations, do not reflect market levels and may potentially lead to mispricing of a security or group of securities. Hence, the following broad principles would be followed by Valuation Agencies for determining outlier criteria.

- a. Outlier trades shall be classified on the basis of liquidity buckets (Liquid, Semi-liquid, Illiquid). Price discovery for liquid issuers is generally easier than that of illiquid issuers and hence a tighter pricing band as compared to illiquid issuers would be appropriate.
- b. The outlier trades shall be determined basis the yield movement of the trade, over and above the yield movement of the matrix. Relative movement ensures that general market movements are accounted for in determining trades that are outliers. Hence, relative movement over and above benchmark movement shall be used to identify outlier trades.
- c. Potential outlier trades which are identified through objective criteria defined above will be validated through polling from market participants. Potential outlier trades that are not validated through polling shall be ignored for the purpose of valuation.
- d. The following criteria shall be used by Valuation Agencies in determining Outlier Trades

Liquidity Classification	Bps Criteria (Yield movement over Previous Day yield after accounting for yield movement of matrix)		
	Upto 15 days	15-30 days	Greater than 30 days
Liquid	30 bps	20 bps	10 bps

Semi-liquid	45 bps	35 bps	20 bps
Illiquid	70 bps	50 bps	35 bps

The above criteria shall be followed consistently and would be subject to review on a periodic basis by Valuation Agencies and any change would be carried in consultation with AMFI.

- e. In order to ensure uniform process in determination of outlier trades the criteria for liquidity classification shall be as detailed below.

Liquidity classification criteria - Liquid, semi-liquid and Illiquid definition

Valuation Agencies shall use standard criteria for classifying trades as Liquid, Semi-Liquid and illiquid basis the following two criteria

- Trading Volume
- Spread over reference yield

Such criteria shall be reviewed on periodic basis in consultation with AMFI.

Trading Volume (Traded days) based criteria:

Number of unique days an issuer trades in the secondary market or issues a new security in the primary market in a calendar quarter

- Liquid → $\geq 50\%$ of trade days
- Semi liquid → $\geq 10\%$ to 50% trade days
- Illiquid → $< 10\%$ of trade days

Spread based criteria:

Spread over the matrix shall be computed and based on thresholds defined, issuers shall be classified as liquid, semi liquid and illiquid. For bonds thresholds are defined as upto 15 bps for liquid; $> 15-75$ bps for semi-liquid; > 75 bps for illiquid. (Here, spread is computed as average spread of issuer over AAA Public Sector Undertakings/Financial Institutions/Banks matrix), For CP/ CD- upto 25 bps for liquid; $> 25-50$ bps for semiliquid; > 50 bps for illiquid. (Here, spread is computed as average spread of issuer over A1+/AAA CD Bank matrix).

The thresholds shall be periodically reviewed and updated having regard to the market.

The best classification (liquid being the best) from the above two criteria (trading volume and spread based) shall be considered as the final liquidity classification of the issuer. The above classification shall be carried out separately for money market instruments (CP/ CDs) and bonds.

5. Process for construction of spread matrix

Valuation Agencies shall follow the below process in terms of calculating spreads and constructing the matrix:

Steps	Detailed Process
Step 1	Segmentation of corporates- The entire corporate sector is first categorised across following four sectors i.e. all the corporates will be catalogued under one of the below mentioned bucket: <ol style="list-style-type: none"> Public Sector Undertakings/Financial Institutions/Banks; Non-Banking Finance Companies -except Housing Finance Companies; Housing Finance Companies; Other Corporates
Step 2	Representative issuers - For the aforesaid 4 sectors, representative issuers (Benchmark Issuers) shall be chosen by the Valuation Agencies for only higher rating (I.e. "AAA" or AA+). Benchmark/Representative Issuers will be identified basis high liquidity, availability across tenure in AAA/AA+ category and having lower credit/liquidity premium. Benchmark Issuers can be single or multiple for each sector.

	It may not be possible to find representative issuers in the lower rated segments, however in case of any change in spread in a particular rating segment, the spreads in lower rated segments should be suitably adjusted to reflect the market conditions. In this respect, in case spreads over benchmark are widening at a better rated segment, then adjustments should be made across lower rated segments, such that compression of spreads is not seen at any step. For instance, if there is widening of spread of AA segment over the AAA benchmark, then there should not be any compression in spreads between AA and A rated segment and so on.
Step 3	Calculation of benchmark curve and calculation of spread - <ol style="list-style-type: none"> 1. Yield curve to be calculated for representative issuers for each sector for maturities ranging from 1 month till 20 years and above. 2. Waterfall approach as defined in Part A (1) above will be used for construction of yield curve of each sector. 3. In the event of no data related to trades/primary issuances in the securities of the representative issuer is available, polling shall be conducted from market participants 4. Yield curve for Representative Issuers will be created on daily basis for all 4 sectors. All other issuers will be pegged to the respective benchmark issuers depending on the sector, parentage and characteristics. Spread over the benchmark curve for each security is computed using latest available trades/primaries/polls for respective maturity bucket over the Benchmark Issuer. 5. Spreads will be carried forward in case no data points in terms of trades/primaries/polls are available for any issuer and respective benchmark movement will be given
Step 4	<ol style="list-style-type: none"> 1. The principles of VWAY, outlier trades and exceptional events shall be applicable while constructing the benchmark curve on the basis of trades/primary issuances. 2. In case of rating downgrade/credit event/change in liquidity or any other material event in Representative Issuers, new Representative Issuers will be identified. Also, in case there are two credit ratings, the lower rating to be considered. 3. Residual tenure of the securities of representative issuers shall be used for construction of yield curve.

Part B: Valuation of G-Secs (T-Bill, Cash management bills, G-Sec and SDL)

The following is the waterfall mechanism for valuation of Government securities:

- VWAY of last one hour, subject to outlier validation
- VWAY for the day (including a two quote, not wider than 5 bps on NDSOM), subject to outlier validation
- Two quote, not wider than 5 bps on NDSOM, subject to outlier validation
- Carry forward of spreads over the benchmark
- Polling etc.

Note:

1. VWAY shall be computed from trades which meet the marketable lot criteria stated in Part A of these Guidelines.
2. Outlier criteria: Any trade deviating by more than +/- 5 bps post factoring the movement of benchmark security shall be identified as outlier. Such outlier shall be validated through polling for inclusion in valuations. If the trades are not validated, such trades shall be ignored.

ANNEXURE III - VALUATION OF AT-1 AND TIER II BONDS ISSUED UNDER BASEL III FRAMEWORK

I. Deemed Residual Maturity of Bonds

The Deemed Residual Maturity for the purpose of valuation as well as Macaulay Duration for existing as well as new perpetual bonds issued:

Time Period	Deemed Residual Maturity (Years)
Till March 31, 2022	10
April 01, 2022 - September 31, 2022	20
October 01, 2022 - March 31, 2023	30
March 31, 2023 onwards	100

the residual maturity will always remain above the deemed residual maturity proposed above.

The Macaulay Duration is proposed to be calculated as under for Tier II bonds:

Time Period	Deemed Residual Maturity for all securities (Years)
April 01, 2021 - March 31, 2022	10 years or contractual maturity whichever is earlier
April 01, 2022 onwards	Actual Maturity

1. If the issuer does not exercise call option for any ISIN, then maturity of bonds to be considered as 100 years from the date of issuance of AT-1 bonds and contractual maturity of Tier II Bonds for all the ISINs of the said issuer.
2. If the non-exercise of call option is due to financial stress or in case of adverse news, the same must be reflected in the valuation.

II. Guidelines for Valuation

1. Form two types of ISINs:

- a) Benchmark ISINs (a non-benchmark ISIN can be linked to only one benchmark ISIN. Currently, SBI ISINs happens to be the benchmark ISINs across all maturities for AT-1 Bonds.)
- b) Non-benchmark ISINs (Will be divided into multiple groups based on similar issuer and similar maturity).
- c) The groups will be decided in consultation with valuation agencies. The two main criteria envisaged to be used here would be Tier 1 / Tier 2 ratings of the ISINs / Issuers, and the spread range in which the group of ISINs / Issuer's trade over the benchmark.

2. Take a look back period for trade recognition as under:

- a) 15 working days for benchmark ISINs
- b) 30 working days for non-benchmark ISINs
- c) This will be revised to 7 working days for benchmark ISIN and 15 working days for non- benchmark ISINs from October 01, 2021.

Note 1

- a) If the ISIN gets traded, the traded YTM will be taken for the purpose of valuation.
- b) If 1 ISIN of the issuer trades all other ISINs of issuers will be considered as traded but with necessary adjustment of spread to YTM.
- c) If none of the ISIN of the issuer gets traded, the trade of similar issuer in the group will be taken to valuation however with necessary adjustment of spread to YTM of similar issuer similar maturity. If none of the ISIN in a group gets traded on any particular day, an actual trade in a look back period will be seen.
- d) If there is an actual trade in look back period the security will be considered as traded and valued with necessary adjustment of spread to YTM. According to this valuation will be done based on the trade of issuer, trade of similar issuer and as an additional layer a look back period of is requested. It is confirmed that spread over

YTM will be taken without any adjustment of modified duration to call.

Note 2

As the valuation is based on trade during the look back period, it is confirmed that a spread will be adjusted to reflect adverse news, change in credit rating, interest rate etc., which has bearing on the yield of ISIN being valued.

Note 3

If there is no actual trade of any ISIN of the issuer as well as similar issuer during look back period also then valuation will be done by taking spread over matrix and/or polling in line with the waterfall mechanism prescribed by AMFI.

Note 4

AT-1 bonds and Tier 2 bonds being different categories of bonds, the valuation of these bonds will be done separately (i.e.) ISIN of AT-1 bond traded will not mean that ISIN of Tier-2 bonds of the same issuer have also traded. However, if any issuer does not exercise call option for any ISIN, then the valuation and calculation of Macaulay Duration should be done considering maturity of 100 years from the date of issuance for AT-1 Bonds and Contractual Maturity for Tier 2 bonds, for all ISINs of the issuer.

VIII. COMPUTATION OF NAV

A. Policy of computation of NAV:

The Net Asset Value (NAV) per Unit under the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation day. The Mutual Fund will value its investments according to the Principle of fair valuation as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

The NAV of Units under the Scheme shall be calculated by either of the following methods shown below:

$$\text{NAV (Rs.)} = \frac{\text{Market or fair value of the Scheme's investments} + \text{Current Assets including Accrued Income - Current Liabilities and Provisions}}{\text{No. of Units outstanding under the Scheme on the Valuation Day}}$$

Or

$$\text{NAV (Rs.)} = \frac{\text{Unit Capital + Reserves and Surplus}}{\text{No. of Units outstanding under the Scheme on the Valuation Day}}$$

The AMC will calculate the NAVs of the Scheme on daily basis. The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

In case of Fund of Fund Schemes, the units of Underlying Fund will be valued at NAV declared by Underlying Fund / applicable market rate and converted at the applicable exchange rate.

In case the units of Invesco India Gold ETF get classified as thinly traded / non traded the same may be valued as per the underlying NAV of the Scheme. For the purposes of determination of the thinly traded / non traded securities the definitions in the SEBI regulations pertaining to equity schemes shall be applied, since there are no specific references to Gold based units.

In terms of para 8.3 of SEBI Master Circular for Mutual Fund dated May 19, 2023, the NAV shall be calculated up to two decimal places for all equity oriented and balanced fund schemes and up to four decimal places for index funds and all types of debt oriented schemes. However, the AMC reserves the right to declare the NAVs up to additional decimal places as it deems appropriate. Direct Plan under the Scheme will have separate NAVs. Further, separate NAV will be calculated and disclosed for each option.

The AMC will also calculate intra-day indicative NAV i.e. the per unit NAV based on the current market value of the portfolio of the Scheme during the trading hours and disclose the same on a continuous basis on the stock exchanges where the units of the Scheme are listed as well as on its website within a maximum time lag of 15 seconds. Intra-day indicative NAV will not have any bearing on the creation or redemption of units directly with the AMC by the Market Makers and Large Investors.

- Indicative NAV ('iNAV') of the Scheme i.e. NAV per unit based on the current market value of the portfolio during the trading hours will be disclosed on continuous basis on Stock Exchanges where the Units of the Scheme are listed (currently the National Stock Exchange of India Limited ('NSE') within a maximum time lag of 15 seconds from underlying market.
- The Tracking Error based on the past one year rolling data will be disclosed on a daily basis on the website of the AMC and AMFI.
- The Tracking Difference will be disclosed on the website of the AMC and AMFI on monthly basis for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units of the Scheme.
- Change in constituents of Nifty 50 shall be disclosed on the website of AMC on the day of change.
- While disclosing the portfolio of the Scheme on monthly basis, the name and exposure to top 7 issuers and stocks, top 7 groups and top 4 sectors as a percentage of NAV of the scheme shall also be disclosed.

Illustration of computation of NAV:

The computation of NAV per unit using various components is explained as follows:

Particulars	Amount in Rs.
Market or Fair Value of Scheme's Investments(A)	10,00,00,000.00
Add: Current Assets including Accrued Income(B)	75,34,345.00
Less: Current Liabilities and Provisions(C)	(30,00,000.00)
Net Assets (A+B-C)	10,45,34,345.00

a) For all equity oriented and balanced fund schemes

No. of Units outstanding under Scheme on the Valuation Day: 10,00,000.

The NAV per unit will be computed as follows:

$$10,45,34,345 / 10,00,000 = \text{Rs. } 10.45 \text{ p.u. (rounded off to two decimals)}$$

b) For index funds and all types of debt oriented schemes

No. of Units outstanding under Scheme on the Valuation Day: 100,000.

The NAV per unit will be computed as follows:

$$10,45,34,345.34 / 100,000 = \text{Rs. } 1045.3435 \text{ p.u. (rounded off to four decimals)}$$

B. Policy for computation of NAV in foreign securities

There are no specific SEBI guidelines on valuation of foreign securities at present. In the absence of any guidelines, the following policy will be followed:

In case of investment in foreign securities (excluding overseas mutual funds), on the Valuation Day, the securities shall be valued in line with the valuation norms specified by SEBI for Indian equity/ debt securities. However, in case

valuation for a specific equity/ debt security is not covered by SEBI (MF) Regulations, then the security will be valued on fair value basis.

On the Valuation Day, all assets and liabilities denominated in foreign currency will be valued in Indian Rupees at the Bid Rate of foreign currency INR exchange rate available on Reuters at 5.00 p.m.

In case, the Reuters exchange rate is not available, then the following sources will be used for exchange rate in the order of priority:

- Exchange rate (Bid Rate) available on Bloomberg at 5.00 p.m. IST;
- Reference rate issued by Financial Benchmarks India Ltd. (FBIL) as at the close of banking hours on the relevant business day in India;
- Any other publicly available source.

The Trustees reserve the right to change the source for determining the exchange rate, subject to SEBI Regulations.

The exchange gain / loss resulting from the aforesaid conversion shall be recognized as unrealized exchange gain / loss in the books of the Scheme on the day of valuation. Further, the exchange gain / loss resulting from the settlement of assets / liabilities denominated in foreign currency shall be recognized as realized exchange gain / loss in the books of the scheme on the settlement of such assets / liabilities.

C. Procedure in case of delay in disclosure of NAV

The AMC will calculate the NAVs on daily basis. The AMC shall prominently disclose the NAVs of the Scheme under a separate heading on the website of the Fund (www.invescomutualfund.com) and on the website of AMFI (www.amfiindia.com) before 11.00 p.m. on every Business Day. In case NAV of units of Corporate Debt Market Development Fund ('CDMDF') is not available by 9:30 p.m. of same Business Day, NAV declaration timing shall be 10 a.m. on next business day instead of 11 p.m. on same Business Day.

If the NAVs are not available before the commencement of business hours on the following day due to any reason, the Mutual Fund shall issue a press release giving reasons and explaining when the Mutual Fund would be able to publish the NAVs.

IX. TAX, LEGAL & GENERAL INFORMATION

A. Taxation on Investing in Mutual Funds

The information set out below outlines the tax implications to the unit holders of the scheme and Mutual Fund based on relevant provisions of the Income-tax Act, 1961 ('the Act') and the Finance Act, 2023.

The following information is provided for general information purposes only and is not exhaustive. There can be no assurance that the tax position or the proposed tax position will remain same. It is neither designed nor intended to be a substitute for professional advice. In view of the individual nature of tax implications, each investor is advised to consult his or her own tax adviser with respect to the specific tax implications arising out of his or her participation in the scheme.

I. For the Mutual Fund

1. An Indian Mutual Fund registered with the Securities and Exchange Board of India ('SEBI') or schemes sponsored by specified public sector banks / financial institutions and approved by the Central Government or authorized by the Reserve Bank of India ('RBI') are tax exempt as per the provisions of section 10 (23D) of the Act. The Mutual Fund will receive all income without any deduction of tax at source under the provisions of section 196(iv) of the Act.

2. Invesco Mutual Fund is a Mutual Fund registered with SEBI and as such is eligible for benefits under section 10 (23D) of the Act. Accordingly, its entire income is exempt from tax.

3. Dividend Distribution Tax

Until 31 March 2020, the Mutual Fund was charged with the incidence of Dividend Distribution Tax at the point of distribution of income in the form of Dividend to its investors. With effect from 01 April 2020, the incidence of tax has been shifted from the Mutual Fund to the investors whereby any income in the form of Dividend distributed by the Mutual Fund to its investors will not be subject to Dividend Distribution Tax, rather the same would be taxable in the hands of the investor.

4. Securities transaction tax ('STT')

Transactions in equity shares of companies, derivatives, units of an Equity Oriented Mutual Fund or units of a business trust entered into on a recognized stock exchange or sale of unlisted equity shares under an initial offer for sale to the public attracts STT. In relevant cases, the Fund has to bear the STT.

The applicable rates are given below:

Sr. No.	Taxable Securities Transaction	STT rate	Payable by
1.	Purchase / sale of equity shares (delivery based) or a units of business trust.	0.1%	Purchaser / Seller
2.	Sale of units of an Equity Oriented Mutual Fund (delivery based)	0.001%	Seller

7.	Sale of futures in securities	0.01%	Seller
8.	Sale of unlisted equity shares under an initial offer	0.2%	Seller

II. For the Unit holders

1. Dividend income from Units

Dividend income received in respect of Mutual Fund referred to in section 10 (23D) of the Act by the unit holders is **taxable** in the hands of the unit holders at applicable slab rate or Corporate Tax rate, as the case may be, given that the scheme is not required to pay dividend distribution tax under section 115R of the Act with effect from 01 April 2020.

The general tax rates are tabulated in Note 1 below.

2. Gains from sale or transfer of units

The characterization of gains or losses arising from sale / transfer of units as "capital gains" or "business income" would depend on whether the unit holder holds such units as "capital assets" or as "stock in trade".

Investors may refer to CBDT instruction no. 1827 dated August 31, 1989 read with CBDT Circular no. 4 dated June 15, 2007 and the CBDT Circular No. 6 dated 29 February 2016 for further guidance on the matter.

With effect from 1 April 2014, any security held by a Foreign Institutional Investor (“FII”), invested in accordance with the regulations under the SEBI Act, 1992, will be classified as a capital asset under section 2(14) of the Act.

The following paragraphs outline the broad implications under the Act arising in the hands of the investors under both the scenarios. The tax implications depend upon the characterization of the scheme of the Mutual Fund of which the investor holds the units. Below are the different types of schemes:

a. **Debt Mutual Funds** are a variant of Mutual Funds that invest predominantly in debt securities or bonds. Debt securities include government securities, corporate bonds and commercial paper, money market instruments, certificates of deposits from banks etc. Debt Mutual Funds would include, inter alia, Money Market Mutual Fund, Liquid Fund and Infrastructure Debt Fund.

i. **Money Market Mutual Fund** is defined in explanation to section 115T of the Act which means Money Market Mutual Fund as defined in sub-clause (p) of clause (2) of the SEBI (Mutual Funds) Regulations, 1996.

ii. **Liquid Fund** is defined in explanation to section 115T of the Act which means a scheme or plan of a Mutual Fund which is classified by the SEBI as a Liquid Fund in accordance with the guidelines issued by it in this behalf under the SEBI Act, 1992 or regulations made thereunder.

iii. **Infrastructure Debt Fund Scheme** means an infrastructure debt fund scheme as defined in clause (1) of regulation 49L of the SEBI (Mutual Funds) Regulations, 1996 which means a scheme which invests primarily (minimum 90% of scheme assets) in debt securities or such other permissible assets in accordance with the regulations.

iv. **Fixed Income Maturity Plan** is a Debt Fund Scheme with an investment objective to generate income by investing in a portfolio of debt and money market instruments maturing on or before the date of maturity of the scheme.

The scheme is a close ended scheme. Units of the scheme will be redeemed only on the Maturity Date / Final Redemption Date. The units of the Fixed Maturity Plan scheme will be listed on the National Stock Exchange.

b. **Equity Oriented Fund** as defined in Section 112A of the Act means a fund set up under a scheme of a Mutual Fund specified under section 10(23D) and:

- i. in a case where the fund invests in the units of another fund which is traded on a recognized stock exchange-
 - a minimum of 90% of the total proceeds of such fund is invested in the units of such other fund; and
 - such other fund also invests a minimum of 90% of its total proceeds in the equity shares of domestic companies listed on a recognized stock exchange; and
- ii. in any other case, a minimum of 65% of the total proceeds of such fund is invested in the equity shares of domestic companies listed on a recognized stock exchange.

2.1 Tax Implications where securities are business assets

Profits and Gains of Business or Profession

If the securities in the portfolio are regarded as a business / trading asset, then any gain / loss arising from sale of such securities would be taxed under the head “Profits and Gains of Business or Profession” under section 28

of the Act. The gain / loss is to be computed after allowing normal business expenses (inclusive of the expenses incurred on transfer).

STT paid on securities held as business assets shall be an allowable deduction while computing business income.

Losses under the head Profits and Gains of Business or Profession

Loss under the head 'Profits and Gains of Business or Profession' can be set off against the income from any other source under the same head or income under any other head (subject to certain exceptions) in the same assessment year. If such loss cannot be set off against any other head in the same assessment year, then it will be carried forward and shall be set off against the profits and gains of the business, within the period of 8 subsequent assessment years.

2.2 Tax implications where units are held as Capital Assets

2.2.1 Debt Fund/Liquid Fund/Fixed Maturity Plan

Holding Period

Unit of a Debt Mutual Fund is treated as a short-term capital asset if the unit is held for 36 months or less and considered long-term capital asset if it is held for more than 36 months. Further, as per Finance Act 2023, capital gains resulting from transfer of units of a 'specified mutual fund' acquired on or after April 1, 2023, will be deemed short-term capital gains irrespective of holding period. The term 'specified mutual fund' refers to a mutual fund which invests no more than 35% in equity shares of domestic companies.

Computation of Capital Gains

The capital gains will be computed by deducting expenditure incurred in connection with such transfer and cost of acquisition (COA) of the unit from the sale consideration.

The following amounts shall be deductible from the full value of consideration, to arrive at the amount of capital gains:

- COA of securities which can also be adjusted for inflation in certain cases¹, and
- Expenditure incurred wholly and exclusively in connection with such transfer.

¹ In such cases, the adjustment to the cost is referred to as indexation as it is based on the Cost Inflation Index (CII)

Long Term Capital Gains ('LTCG')

Type of Investors	Rates	Indexation available
Resident Investor	20%	Yes
Non-Resident Investors		
• FPIs	10%	No
• Offshore Funds	10%	No
• Others		
- Listed units	20%	Yes
- Unlisted units	10%	No

In case of individuals / HUFs, being residents, where the total income excluding LTCG is below the maximum amount not chargeable to tax, then the difference between the maximum amount not chargeable to tax and total income excluding LTCG shall be adjusted from LTCG. Therefore, only the balance LTCG will be liable to income tax at the flat rate.

For maximum amount not chargeable to tax and applicable tax rates, please refer to note 1.

Finance Act, 2018 had restricted the scope of exemption under section 54EC (which provides exemption from capital gains upon investment of the proceeds in specified bonds) only to LTCG arising from land or building, or both. Accordingly, LTCG arising on units of Mutual Fund sold after 01 April 2018 will not get the benefit of section 54EC.

Short Term Capital Gains ('STCG')

STCG arising to a unit holder will be taxed at the normal tax rates applicable to that unit holder under the provisions of the Act. These tax rates are set out in note 1.

Set-off / Carry Forward of Losses

The capital loss resulting from sale of units would be available for setting off against other capital gains made by the investor and would reduce the tax liability of the investor to that extent.

However, losses on transfer of long-term capital assets would be allowed to be set-off only against gains from transfer of long-term capital assets and the balance long-term capital loss may be carried forward separately for a period of 8 assessment years and can be set-off against LTCG only.

Short term capital loss is allowed to be set off against short term / long terms capital gains and the balance short term capital loss may be carried forward separately for a period of 8 assessment years and can be set-off against STCG / LTCG.

2.2.2 Equity Oriented Fund

Holding Period

Unit of an Equity Oriented Fund is treated as a short-term capital asset if the unit is held for 12 months or less and considered long-term capital asset if it is held for more than 12 months.

Computation of Capital Gains

The capital gains will be computed by deducting expenditure incurred in connection with such transfer and cost of acquisition (COA) of the unit from the sale consideration.

The following amounts shall be deductible from the full value of consideration, to arrive at the amount of capital gains:

- COA of securities which can also be adjusted for inflation in certain cases², and
- Expenditure incurred wholly and exclusively in connection with such transfer.

Long Term Capital Gains ('LTCG')

- i) STT paid on transfer of units

LTCG arising on transfer of units of an equity-oriented fund was exempt from tax under Section 10(38) of the Act. However, this exemption stands withdrawn with effect from 01 April 2018 as per the Finance Act, 2018 and such gains, if exceeding Rs. 100,000 are taxable at the rate of 10% as per section 112A, provided STT has been paid on transfer of the units.

Further, Finance Act, 2018, provides relief in computation of gains on sale of units of an equity-oriented fund acquired before 1 February 2018 such that the Cost of Acquisition ('COA') of such units is to be considered the **higher of**

- Actual COA of the units; and
- Lower of:
 - ✓ Fair Market Value (FMV) of the unit; and
 - ✓ Redemption value / Sale consideration on transfer of the units

The FMV in case of a listed unit, means the highest price of such unit quoted on a recognized stock exchange on 31 January 2018. However, if there is no trading on 31 January 2018, the FMV will be the highest price quoted on a date immediately preceding 31 January 2018, on which it has been traded.

In the case of a unit which is not listed on a recognized stock exchange on 31 January 2018, the net asset value of such unit on 31 January 2018 will be the FMV.

No benefit of inflation indexation will be available for computing the COA.

² In such cases, the adjustment to the cost is referred to as indexation as it is based on the Cost Inflation Index (CII)

ii) STT not paid on transfer of units

Under section 112 of the Act, LTCG (which is not subject to STT) is taxable @ 20% (plus applicable surcharge and Health and education cess), with indexation benefit.

In case of a non-resident or a foreign company, LTCG arising from the transfer of unlisted securities or shares of a company not being a company in which the public are substantially interested is taxable under section 112 of the Act @ 10% (plus applicable surcharge and Health and education cess), without indexation benefit.

In case of FIIs, LTCG arising from the transfer of securities other than those covered by Section 112A are taxable @ 10% (plus applicable surcharge and Health and education cess), without indexation benefit.

In case of individuals / HUFs, being residents, where the total income excluding LTCG is below the maximum amount not chargeable to tax, then the difference between the maximum amount not chargeable to tax and total income excluding LTCG shall be adjusted from LTCG. Therefore, only the balance LTCG will be liable to income tax at the flat rate.

Finance Act, 2018 had restricted the scope of exemption under section 54EC (which provides exemption from capital gains upon investment of the proceeds in specified bonds) only to LTCG arising from land or building, or both. Accordingly, LTCG arising on units of Mutual Fund sold after 01 April 2018 will not get the benefit of section 54EC.

Short Term Capital Gains ('STCG')

i) STT paid on transfer of units

STCG on transfer of units of equity-oriented fund is taxable at 15% (plus applicable surcharge and Health and Education cess) if STT has been paid on transfer of the units.

ii) STT not paid on transfer of units

STCG arising on transaction undertaken on a recognized stock exchange located in any International Financial Services Centre and where consideration is paid or payable in foreign currency will be taxed at a rate of 15% (plus applicable surcharge and Health and Education cess) even if STT is not chargeable. This benefit is available to all taxpayers.

If STT has not been paid, STCG arising to a unit holder will be taxed at the normal tax rates applicable to that unit holder under the provisions of the Act.

In case of individuals / HUFs, being residents, where the total income excluding STCG is below the maximum amount not chargeable to tax, then the difference between the maximum amount not chargeable to tax and total income excluding STCG, shall be adjusted from STCG. Therefore, only the balance STCG will be liable to income tax at the rate of 15%.

In case of FIIs, STCG arising from the transfer of securities other than those on which STT is paid are taxable @ 30% (plus applicable surcharge and Health and education cess).

The capital gains will be computed by deducting expenditure incurred in connection with such transfer and cost of acquisition of the unit from the sale consideration.

For maximum amount not chargeable to tax and applicable tax rates, please refer to note 1.

Set-off / Carry Forward of Losses

The capital loss resulting from sale of units would be available for setting off against other capital gains made by the investor and would reduce the tax liability of the investor to that extent.

However, losses on transfer of long-term capital assets would be allowed to be set-off only against gains from transfer of long-term capital assets and the balance long-term capital loss may be carried forward separately for a period of 8 assessment years and can be set-off against LTCG only.

Short term capital loss is allowed to be set off against short term / long terms capital gains and the balance short term capital loss may be carried forward separately for a period of 8 assessment years and can be set-off against STCG / LTCG.

3. Switching between schemes

Switching between plans/options of a scheme will result in redemption of units of the relevant plan/option and reinvestment of the redemption proceeds in the other plan/option selected by the unit holder. Hence, switching will give rise to transfer of units.

Section 47(xix) of the Act provides that transfer of units in a consolidating plan of Mutual Fund scheme made in consideration of the allotment of units in the consolidated plan of that scheme is considered tax neutral.

Section 49 read with section 2 (42A) of the Act provides that the cost of acquisition of units of consolidated plan of Mutual Fund scheme shall be cost of units in consolidating plan of Mutual Fund scheme. Period of holding of the units of consolidated plan of Mutual Fund scheme shall include the period for which the units in consolidating plan of Mutual Fund scheme were held by the assessee.

4. Dividend / Bonus Stripping

If any person buys Mutual Fund units (original units) within a period of 3 months prior to date of allotment of bonus units on such original units, and subsequently within nine months, the original units are sold at a loss, then such loss shall be ignored for the purposes of computing income chargeable to tax. However, such loss would be regarded as cost of acquisition for the bonus units.

In cases which do not fall under the aforesaid circumstances, the cost of acquisition of bonus units for the investors would be NIL, as provided by Section 55(2) of the Act.

Similarly, if any person buys securities or units within a period of 3 months prior to the date of declaration of dividend and subsequently such securities are sold within 3 months (9 months in case of units) from the date of declaration of dividend, any loss on the purchase / sale transaction up to the amount of dividend shall be ignored for the purposes of computing income chargeable to tax.

5. Tax Deducted At Source ('TDS')

5.1 For Residents

With effect from 01 April 2020, the Finance Act 2020 had inserted Section 194K as per which any person responsible for paying any income to a resident in respect of units of a Mutual Fund specified under Section 10 (23D) shall deduct income-tax at the rate of 10%.

ISSUE OF BONUS UNITS

In the interest of the Unitholders and smooth functioning of the Fund, at an appropriate time, the Trustee/Asset Management Company may decide to issue bonus Units to all existing Unitholders. For such declaration, the Fund will announce a record date/book closure and all Unitholders whose names appear in the Register of Unitholders as on the record date/book closure shall be eligible to be issued such bonus Units. These Units will be pari-passu with the original Units. Bonus Units so issued will be credited to the Unitholders' account. Pursuant to allotment of Bonus Units, the per Unit NAV would fall in proportion to the Bonus Units allotted and as a result the total value of Units held by the Unitholder would remain the same. The issue of such Units will increase the number of Units held by the Unitholder in the Scheme and so also the total number of Units outstanding in the Scheme.

PLEDGE OF UNITS

The Units under the Scheme may be offered as security by way of a pledge/charge in favour of scheduled banks, financial institutions, non-banking finance companies (NBFCs), or any other body. The AMC and/or the Registrar will note and record such Pledge of Units. The AMC shall mark a lien only upon receiving the duly completed form and documents as it may require. Disbursement of such loans will be at the entire discretion of the bank/financial institution/NBFC or any other body concerned and the Mutual Fund/AMC assumes no responsibility thereof.

The Pledgor will not be able to redeem Units that are pledged until the entity to which the Units are pledged provides written authorisation to the Mutual Fund that the pledge/lien charge may be removed. As long as Units are pledged, the Pledgee will have complete authority to redeem such Units.

In case the units pledged are of close ended scheme and if the units are under pledge at the time of maturity of the scheme, then the AMC reserves the right to pay the maturity amount to the person / bank / financial

institution/non-banking finance companies (NBFCs)/any other body in whose favour the lien has been marked. An intimation of such payment will be sent to the investor. The AMC thereafter shall not be responsible for any claims made by the investor/third party on account of such payments.

The Units held in Demat mode can be pledged and hypothecated as per the provisions of Depositories Act and Depositories Rules and Regulations.

CLOSURE OF UNITHOLDER'S ACCOUNT

There are no minimum balance requirement.

The AMC also has the right, at its sole discretion, to close a Unitholder's account by redemption of units in the account of unitholder, if the unitholder does not submit the requisite proof/documents/information required by the AMC or where the units are held by a unitholder in breach of any Regulation.

FRACTIONAL UNITS

Since a request for purchase or redemption is generally made in rupee amounts and not in terms of a fixed number of Units of a scheme, an investor may be left with fractional Units. Fractional Units will be computed and accounted for up to three decimal places. However, fractional Units will in no way affect the investor's ability to redeem the Units, either in part or in full, standing to the Unitholder's credit.

CONSOLIDATION OF FOLIOS

In case an investor holds investments in multiple folios under the Fund, the AMC has the right to consolidate all the folios belonging to the same investor into one folio. In case of additional purchase in the same Scheme/fresh purchase in new Scheme, if the investor fails to provide the folio number, the AMC reserves the right to allot the units in the existing folio, based on such integrity checks as may be determined by the AMC from time to time.

The balance money, if any, in the investor's specified bank account can be used for other purposes by the investors.
- b) Release/unblocking of blocked funds after allotment is done instantaneously.

Note: If the bank account specified in the ASBA application form does not have sufficient credit balance to meet the application money towards the subscription of units, the Bank will reject the ASBA application form

- iv) On acceptance of physical or electronic ASBA, the SCSB shall block funds available in the specified bank account to the extent of application money specified in ASBA application Form.
- v) ASBA application form will not be accepted by any of the offices of Invesco Mutual Fund or its Registrar and Transfer Agent ie. Kfin Technologies Limited.

- viii) During processing of the ASBA application Forms by RTA, if the application is found to be incomplete or incorrect, the SCSB will be informed of the same who will then unblock the investor account with appropriate remarks in the investor account.
- ix) The list of SCSBs and their DBs where ASBA application form can be submitted is available on the websites of BSE (www.bseindia.com), NSE (www.nseindia.com) and SEBI (www.sebi.gov.in) and shall also be given in the ASBA application form.

5 Portfolio Turnover Details (for equity schemes)

An open ended scheme(s), is expected to have a number of subscriptions and redemptions on a daily basis. The fund management team depending on its view and subject to there being an opportunity, may trade in securities, which will result in increase in portfolio turnover. There may be an increase in transaction cost such as brokerage paid, if trading is done frequently. However, the cost would be negligible as compared to the total expenses of the Scheme. Frequent trading may increase the profits which will offset the increase in costs. The fund manager will endeavor to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. However, it is difficult to estimate with reasonable measure of accuracy, the likely turnover in the portfolio of the Scheme.

10 INFORMATION PERTAINING TO INVESTMENTS BY THE SCHEMES OF THE FUND

a. Derivative strategies (Applicable for schemes using derivatives)

Derivatives are financial contracts of pre-determined fixed duration, like stock futures/options and index futures and options, whose values are derived from the value of an underlying primary financial instrument such as interest rates, exchange rates, commodities, and equities.

Derivatives can be either exchange traded or can be over the counter (OTC). Exchange traded derivatives are listed and traded on stock exchanges whereas OTC derivative transactions are generally structured between two counterparties.

The risks associated with derivatives are similar to those associated with equity investments. The additional risks could be on account of

- Illiquidity;
- Potential mis - pricing of the Futures/Options;
- Inability of derivatives to correlate perfectly with the underlying (Indices, Assets, Exchange Rates)
- Cost of hedge can be higher than adverse impact of market movements;
- An exposure to derivatives in excess of the hedging requirements can lead to losses;
- An exposure to derivatives can also limit the profits from a genuine investment transaction.

Exchange traded derivative contracts in stocks are physical settled and indices in India are currently cash settled at the time of maturity.

The Scheme may invest in various derivative instruments which are permissible under the applicable Regulations and shall also be subject to the investment objective and strategy of the Scheme and the internal limits if any, as laid down from time to time. These include but are not limited to futures (both stock and index) and options (stock and index).

The Scheme will comply with SEBI Regulations / guidelines / circulars with regards to derivatives as amended from time to time. The Scheme may use derivative instruments like interest rate swaps, overnight indexed swaps (OIS), forward rate agreements or such other derivative instruments as may be permitted under the Regulations. Derivatives will be used for the purpose of hedging, increasing the returns of the Scheme and portfolio balancing or such other purpose as may be permitted under the Regulations and Guidelines from time to time.

The Fund will be allowed to take exposure in interest rate swaps only on a non-leveraged basis. A swap will be undertaken only if there is an underlying asset in the portfolio.

In terms of Circular No. MFD.BC.191/07.01.279/1999-2000 and MPD.BC.187/07.01.279/1999-2000 dated November 1, 1999 and July 7, 1999 respectively issued by Reserve Bank of India permitting participation by Mutual Funds in interest rate swaps and forward rate agreements, the fund will use derivative instruments for the purpose of hedging and portfolio balancing. Further, the guidelines issued by Reserve Bank of India from time to time for forward rate agreements and interest rate swaps and other derivative products would be adhered to by the mutual fund.

As per above said RBI circulars, mutual funds are permitted to do interest rate swaps/forward rate agreements, for hedging purposes only. Accordingly, the AMC would undertake the same for similar purposes only. IRS and FRAs do also have inherent credit and settlement risks. However, these risks are substantially reduced as they are limited to the interest streams and not the notional principal amounts.

Investments in derivatives will be in accordance with the extant SEBI regulations / guidelines. Presently derivatives shall be used for hedging and / or portfolio balancing purposes, as permitted under the Regulations. The circumstances under which such transactions would be entered into would be when, using the IRS route it is possible to generate better returns / meet the objective of the scheme at a lower cost. e.g. if buying a 2 Yr Mibor based instrument and receiving the 2 Yr swap rate yields better return than the 2 Yr AAA corporate, the scheme would endeavor to do that. Alternatively, the scheme would also look to hedge existing fixed rate positions if the view on interest rates is that it would likely rise in the future.

Concepts and Examples

The following information provides a basic idea as to the nature of the derivative instruments proposed to be used by the Fund and the benefits and risks attached therewith. Please note that the examples have been given for illustration purposes only.

Using Overnight Indexed Swaps

In a rising interest rate scenario, the Scheme may enhance returns for the investor by hedging the risk on its fixed interest paying assets by entering into an OIS contract where the Scheme agrees to pay a fixed interest rate on a specified notional amount, for a pre determined tenor and receives floating interest rate payments on the same notional amount. The fixed returns from the Scheme's assets and the fixed interest payments to be made by the Scheme on account of the OIS transaction offset each other and the Scheme benefits on the floating interest payments that it receives.

The Scheme may enter into an opposite position in case of a falling interest rate scenario, i.e. to hedge the floating rate assets in its portfolio the Scheme enters into an OIS transaction wherein it receives a fixed interest rate on a specified notional amount for a specified time period and pays a floating interest rate on the same notional amount. The floating interest payments that the Scheme receives on its floating rate securities and the floating interest payments that the Scheme has to pay on account of the OIS transaction offset each other and the Scheme benefits on the fixed interest payments that it receives in such a scenario.

Swap

Assume that the Scheme has a Rs. 20 crore floating rate investment linked to MIBOR (Mumbai Inter Bank Offered Rate). Hence, the Scheme is currently running an interest rate risk and stands to lose if the interest rate moves down. To hedge this interest rate risk, the Scheme can enter into a 6 month MIBOR swap. Through this swap, the Scheme will receive a fixed predetermined rate (assume 12%) and pays the "benchmark rate" (MIBOR), which is fixed by the National Stock Exchange of India limited (NSE) or any other agency such as Reuters. This swap would effectively lock-in the rate or 12% for the next 6 months, eliminating the daily interest rate risk. This usually routed through an intermediary who runs a book and matches deals between various counterparties.

The steps will be as follows:

Assuming the swap is for Rs. 20 Crores for September 1, 2023 to March 03, 2024. The Scheme is a fixed rate receiver at 12% and the counterparty is a floating rate receiver at the overnight rate on a compounded basis (say NSE MIBOR).

On September 1, 2023 the Scheme and the counterparty will exchange only a contract of having entered this swap. This documentation would be as per International Swap Dealers Association (ISDA) norms.

On a daily basis, the benchmark rate fixed by NSE will be tracked by them.

On March 03, 2024 they will calculate the following:

1. The Scheme is entitled to receive interest on Rs. 20 Crores at 12% for 184 days i.e. Rs. 1.21 Crores, (this amount is known at the time the swap was concluded) and will pay the compounded benchmark rate.
2. The counterparty is entitled to receive daily compounded call rate for 184 days & pay 12% fixed.
3. On March 03, 2024, if the total interest on the daily overnight compounded benchmark rate is higher than Rs. 1.21 Crores, the Scheme will pay the difference to the counterparty. If the daily compounded benchmark rate is lower, then the counterparty will pay the Scheme the difference.

4. Effectively the Scheme earns interest at the rate of 12% p.a. for six months without lending money for 6 months fixed, while the counterparty pays interest @ 12% p.a. for 6 months on Rs. 20 Crores, without borrowing for 6 months fixed.

The above example illustrates the benefits and risks of using derivatives for hedging and optimizing the investment portfolio. Swaps have their own drawbacks like credit risk, settlement risk. However, these risks are substantially reduced as the amount involved is interest streams and not principal.

Forward Rate Agreement

Assume that on November 1, 2023, the 30 day commercial paper (CP) rate is 7.75% and the Scheme has an investment in a CP of face value Rs. 50 Crores, which is going to mature on November 30, 2023. If the interest rates are likely to remain stable or decline after January 31, 2024, and if the fund manager, who wants to re-deploy the maturity proceeds for 1 more month does not want to take the risk of interest rates going down, he can then enter into a following forward rate agreement (FRA) say as on November 30, 2023:

He can receive 1 X 3 FRA on November 30, 2023 at 7.75% (FRA rate for 2 months lending in 1 months' time) on the notional amount of Rs. 50 Crores, with a reference rate of 30 day CP benchmark. If the CP benchmark on the settlement date i.e. November 30, 2023 falls to 7.50%, then the Scheme receives the difference 7.75 – 7.50 i.e. 25 basis points on the notional amount Rs. 50 Crores.

Certain risks are inherent to derivative strategies viz. lack of opportunities, inability of derivatives to correlate perfectly with the underlying and execution risks, whereby the rate seen on the screen may not be the rate at which the transaction is executed. For details of risk factors relating to use of derivatives, the investors are advised to refer to Scheme Specific Risk Factors.

Futures

Futures (Index & Stocks) are forward contracts traded on the exchanges & have been introduced both by BSE and NSE. Currently futures of 1 month (near month), 2 months (next month) and 3 months (far month) are traded on these exchanges. These futures expire on the last working Thursday of the respective months.

Illustration with Index Futures

In case the Nifty spot is trading at say, Rs. 11,700, and the fund manager has a view that it will depreciate going forward; the Scheme can initiate a sell transaction of Nifty futures at Rs. 11,736 without holding a portfolio of equity stocks or any other underlying long equity position. Once the price falls to Rs. 11,500 after say, 20 days, the Scheme can initiate a square-up transaction by buying the said futures and book a profit of Rs. 236.

Correspondingly, if the fund manager has a positive view he can initiate a long position in the index / stock futures without an underlying cash/ cash equivalent subject to the extant regulations.

There are futures based on stock indices as mentioned above as also futures based on individual stocks. The profitability of index /stock future as compared to an individual security will inter-alia depend upon:

- The carrying cost,
- The interest available on surplus funds, and
- The transaction cost.

Example of a typical future trade and the associated costs:

Particulars	Index Future	Actual Purchase of Stocks
Index at the beginning of the month	11,700	11,700
Price of 1 Month Future	11,736	

Particulars	Index Future	Actual Purchase of Stocks
A. Execution Cost: Carry and other index future costs	36	
B. Brokerage Costs: (0.05% of Index Future and 0.12% for spot stocks)	5.868	14.04
C. Gains on Surplus Funds: (Assumed 6.00% p.a. return on 85% of the money left after paying 15% margin) (6.00%*11700*85%*30days/365)	49.195	0
Total Cost (A+B-C)	-7.33	14.04

Few strategies that employ stock /index futures and their objectives:

(a) Arbitrage

(1) Buying spot and selling future: Where the stock of a company “A” is trading in the spot market at Rs. 100 while it trades at Rs. 102 in the futures market, then the Scheme may buy the stock at spot and sell in the futures market thereby earning Rs. 2.

Buying the stock in cash market and selling the futures results into a hedge where the Scheme has locked in a spread and is not affected by the price movement of cash market and futures market. The arbitrage position can be continued till expiry of the future contracts when there is a convergence between the cash market and the futures market. This convergence enables the Scheme to generate the arbitrage return locked in earlier.

(2) Selling spot and buying future: In case the Scheme holds the stock of a company “A” at say Rs. 100 while in the futures market it trades at a discount to the spot price say at Rs. 98, then the Scheme may sell the stock and buy the futures.

On the date of expiry of the stock future, the Scheme may reverse the transactions (i.e. buying at spot & selling futures) and earn a risk-free Rs. 2 (2% absolute) on its holdings without any dilution of the view of the fund manager on the underlying stock.

Further, the Scheme can still benefit from any movement of the price in the upward direction, i.e. if on the date of expiry of the futures, the stock trades at Rs. 110 which would be the price of the futures too, the Scheme will have a benefit of Rs. 10 whereby the Scheme gets the 10% upside movement together with the 2% benefit on the arbitrage and thus getting a total return of 12%. The corresponding return in case of holding the stock would have been 10%.

Note: The same strategy can be replicated with a basket of Nifty-50 stocks (Synthetic NIFTY) and the Nifty future index.

(b) Buying/ Selling Stock future:

When the Scheme wants to initiate a long position in a stock whose spot price is at say, Rs.100 and futures is at 98, then the Scheme may just buy the futures contract instead of the spot thereby benefiting from a lower cost.

In case the Scheme has a bearish view on a stock which is trading in the spot market at Rs.98 and the futures market at say Rs. 100, the Scheme may subject to regulations, initiate a short position in the futures contract. In case the prices align with the view and the price depreciates to say Rs. 90, the Scheme can square up the short position thereby earning a profit of Rs.10 visa a vie a fall in stock price of Rs. 8.

(c) Hedging:

The Scheme may use exchange-traded derivatives to hedge the equity portfolio. Both index and stock futures and options may be used to hedge the stocks in the portfolio.

(d) Alpha Strategy:

The Scheme will seek to generate alpha by superior stock selection and removing market risks by selling appropriate index. For example, one can seek to generate positive alpha by buying a bank stock and selling Bank Nifty future.

Risk associated with these strategies:

1. Lack of opportunities;
2. Inability of derivatives to correlate perfectly with the underlying security; and
3. Execution risk, whereby ultimate execution takes place at a different rates than those devised by the strategy.

Execution of these strategies depends upon the ability of the fund manager to identify and execute based on such opportunities. These involve significant uncertainties and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Option Contracts (Stock and Index)

An Option gives the buyer the right, but not the obligation, to buy (call) or sell (put) a stock at an agreed-upon price during a certain period of time or on a specific date.

Options are used to manage risk or as an investment to generate income. The price at which underlying security is contracted to be purchased or sold is called the Strike Price.

Options that can be exercised on or before the expiration date are called American Options while, Options that can be exercised only on the expiration date are called European Options

Options Risk / Return Pay-off Table

Stock/ Index Options	Buy Call	Sell Call	Buy Put	Sell Put
View on Underlying	Positive	Negative	Negative	Positive
Premium	Pay	Receive	Pay	Receive
Risk Potential	Limited to premium paid	Unlimited	Limited to premium paid	Unlimited
Return Potential	Unlimited	Premium Received	Unlimited	Premium Received

Note: The above table is for the purpose of explaining concept of options contract. As per the current Regulations, the Scheme cannot write option or purchase instrument with embedded write option.

Option contracts are of two types - Call and Put

Call Option: A call option gives the buyer, the right to buy specified quantity of the underlying asset at the set strike price on or before expiration date and the seller (writer) of call option however, has the obligation to sell the underlying asset if the buyer of the call option decides to exercise the option to buy.

Put Option: A put option gives the buyer the right to sell specified quantity of the underlying asset at the set strike price on or before expiration date and the seller (writer) of put option however, has the obligation to buy the underlying asset if the buyer of the put option decides to exercise his option to sell.

Index Options / Stock Options

Index options / Stock options are termed to be an efficient way of buying / selling an index/stock compared to buying / selling a portfolio of physical shares representing an index for ease of execution and settlement. The participation can be done by buying / selling either Index futures or by buying a call/put option.

The risks are also different when index /stock futures are bought/sold vis- a- vis index/ stocks options as in case of an index future there is a mark to market variation and the risk is much higher as compared to buying an option, where the risk is limited to the extent of premium paid.

In terms of provision of para 12.25.1 of SEBI Master Circular dated May 19, 2023, the Scheme shall not write options or purchase instruments with embedded written options.

The illustration below explains how one can gain using Index call / put option. These same principals of profit / loss in an Index option apply in toto to that for a stock option.

Call Option

Suppose an investor buys a Call option on 1 lot of Nifty 50 (Lot Size: 75 units)

- ☐ Nifty index (European option).
- ☐ Nifty 1 Lot Size: 75 units
- ☐ Spot Price (S): 11700
- ☐ Strike Price (x): 11800 (Out-of-Money Call Option)
- ☐ Premium: 56

Total Amount paid by the investor as premium $[75 \times 56] = 4200$

There are two possibilities i.e. either the index moves up over the strike price or remains below the strike price.

Case 1- The index goes up

• An investor sells the Nifty Option described above before expiry:

Suppose the Nifty index moves up to 12000 in the spot market and the premium has moved to Rs 250 and there are **15 days more left for the expiry**. The investor decides to reverse his position in the market by **selling** his 1 Nifty call option as the option now is **In the Money**.

His gains are as follows:

- Nifty Spot: 12000
- Current Premium: Rs.250
- Premium paid: Rs.56
- Net Gain: $\text{Rs.}250 - \text{Rs.}56 = \text{Rs.}194$ per unit
- Total gain on 1 lot of Nifty (75 units) = $\text{Rs.}14550$ (75×194)

In this case the premium of Rs.250 has an intrinsic value of Rs. 200 per unit and the remaining Rs. 50 is the time value of the option.

• An investor exercises the Nifty Option at expiry

Suppose the Nifty index moves up to 11900 in the spot market on the expiry day and the investor decides to reverse his position in the market by exercising the Nifty call option as the option now is in the money.

His gains are as follows:

- Nifty Spot: 11900
- Premium paid: Rs.56
- Exercise Price: 11800
- Receivable on exercise: $11900 - 11800 = 100$
- Total Gain: $\text{Rs.}3300 \{ (100 - 56) \times 75 \}$

In this case the realised gain is only the intrinsic value, which is Rs.100, and there is no time value.

Case-2 - The Nifty index moves to any level below 11800

Then the investor does not gain anything but on the other hand his loss is limited to the premium paid:

Net Loss is Rs.4200 (Loss is capped to the extent of Premium Paid) ($\text{Rs } 56 \text{ Premium paid} \times \text{Lot Size: } 75 \text{ units}$).

Put Option

Suppose an investor buys a Put option on 1 lot of Nifty 50.

- Nifty 1 Lot Size: 75 units
- Spot Price (S): 11700
- Strike Price (x): 11600 (Out-of-Money Put Option)
- Premium: 40
- Total Amount paid by the investor as premium $[75 \times 40] = 3000$

There are two possibilities i.e. either the index moves over the strike price or moves below the strike price.

Let us analyze these scenarios.

Case-1 - The index goes down

• An investor sells the Nifty Option before expiry:

Suppose the Nifty index moves down to 11500 in the spot market and the premium has moved to Rs. 140 and there are 15 days more left for the expiry. The investor decides to reverse his position in the market by selling his 1 Nifty Put Option as the option now is in the money. His gains are as follows:

- ☐ Nifty Spot: 11500
- ☐ Premium paid: Rs.40
- ☐ Net Gain: Rs.140 - Rs.40 = Rs.100 per unit
- ☐ Total gain on 1 lot of Nifty (75 units) = Rs.7500 (100*75)

In this case the premium of Rs.140 has an intrinsic value of Rs. 100 per unit and the remaining Rs.40 is the time value of the option.

An investor exercises the Nifty Option at expiry (It is an European Option)

Suppose the Nifty index moves down to 11500 in the spot market on the expiry day and the investor decides to reverse his position in the market by exercising the Nifty Put Option as the option now is in the money.

His gains are as follows:

- ☐ Nifty Spot: 11500
- ☐ Premium paid: Rs.40
- ☐ Exercise Price: 11600
- ☐ Gain on exercise: 11600-11500 = 100
- ☐ Total Gain: Rs.4500 {(100-40)*75}

In this case the realised amount is only the intrinsic value, which is Rs.100, and there is no time value in this case.

Case-2 - If the Nifty index stays over the strike price which is 11600, in the spot market then the investor does not gain anything but on the other hand his loss is limited to the premium paid.

- ☐ Nifty Spot: >11700
- ☐ Net Loss Rs.3000 (Loss is capped to the extent of Premium Paid) (Rs. 40 Premium paid*Lot Size: 75 units).

Risk Associated with these Strategies

- ☐ The risk of mis-pricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- ☐ Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place.

b. Swing Pricing (applicable for specified debt schemes only):

Swing Pricing Framework is applicable only in scenarios related to net outflows from the Schemes. Swing Pricing guidelines will get triggered in case of severe liquidity stress at an AMC level or in case of a severe dysfunction at market level. When swing pricing framework is triggered and swing factor is made applicable (in accordance with the disclosures made in the SID), applications of both the incoming and outgoing investors shall be processed at applicable NAV adjusted for swing factor.

Mandatory Swing Pricing Framework during the market dislocation:

1) Swing Pricing Framework:

Swing pricing refers to a process for adjusting a fund's Net Asset Value ('NAV') to effectively pass on transaction costs stemming from net capital activity (i.e., flows into or out of the fund) to the investors associated with that activity during the life of a fund, excluding ramp-up period or termination. In a liquidity-challenged environment, quoted bid/ask spreads and overall trading cost can widen and may not be representative of the executed prices that can be achieved in the market.

In such circumstances, Swing Pricing can be useful mechanism to contribute to protect the interest of existing investors, specifically from the dilution of their holding and contribute to protect the value of investors capital. It's useful tool to protect the remaining investors when:

- One or more large investors choose to redeem in 'normal times' where their actions would have material impact costs;

- More active trading takes place; and /or
- Funds hold illiquid assets.

2) A mandatory full swing during market dislocation times will apply as follows:

- Swing Pricing Framework will be applicable only for scenarios related to net outflows from the Designated Schemes.
- SEBI will determine 'market dislocation' either based on AMFI's recommendation or suo moto.
- Once market dislocation is declared, SEBI will notify that swing pricing will be applicable for a specified period.
- Subsequent to the announcement of market dislocation, the mandatory Swing Pricing Framework will be applicable for Designated Schemes of the Fund which have:
- ✓ High or Very High risk on the risk-o-meter (as of the most recent period at the time of declaration of market dislocation); **AND**
- ✓ Classify themselves in the cells A-III, B-II, B-III, C-I, C-II and C-III of Potential Risk Class ('PRC') Matrix in terms of para 17.5 of SEBI Master Circular dated May 19, 2023..

3) The Swing factor applicable to the Scheme will be 1%.

4) **Impact on Investors:**

When Swing Pricing Framework is triggered and swing factor is made applicable, both the incoming and outgoing investors will get NAV adjusted downwards for swing factor.

Swing pricing will be applicable to all unitholders at PAN level with an exemption for redemptions upto Rs. 2 lacs for each scheme.

5) **Illustrations:**

The illustrations explaining the impact of swing pricing on NAV as well as on incoming and outgoing investors i.e. subscription & redemption transactions are as follows:

Illustrations for schemes having PRC Matrix as A-III:

a. Adjustment of NAV for swing factor:

Particulars	Schemes having PRC Matrix A-III
NAV before Swing Pricing / Normal NAV (Rs.)	1,200.0000
Swing factor (%)	1.00%
NAV after applying Swing factor / Adjusted NAV (Swung NAV) (Rs.)	1,188.0000

b. Impact of Swing NAV on Redemption transaction where redemption is in terms of amount:

Particulars	Schemes having PRC Matrix A-III
Amount Redeemed (Rs.)	12,000,000.00
NAV before Swing Pricing / Normal NAV (Rs.)	1,200.0000
Units to be redeemed at Normal NAV (Nos.)	10,000.000
NAV after applying swing factor / Adjusted NAV (Rs.)	1,188.0000
Units to be redeemed at Adjusted NAV / Swing NAV (Nos.)	10,101.0101
Impact: Additional Units redeemed due to Swing Pricing Framework (Nos.)	101.0101

c. Impact of Swing NAV on Redemption transaction where redemption is in terms of units:

Particulars	Schemes having PRC Matrix A-III
Units Redeemed (Nos.)	10,000.00
NAV before Swing Pricing / Normal NAV (Rs.)	1,200.0000

Redemption Amount based on Normal NAV (Rs.)	12,000,000.00
NAV after applying Swing Factor / Adjusted NAV (Rs.)	1,188.00
Redemption Amount based on / Adjusted NAV / Swing NAV (Rs.)	11,880,000
Impact: Redemption amount is lower due to Swing Pricing Framework (Rs.)	1,20,000

Note: The above illustration is assuming that there is no exit load. In case exit load is applicable, then the same will be applied on Swung / Adjusted NAV and number of units redeemed will be higher or the amount of redemption will be lower due to exit load. Further, it is also assumed that the above are partial redemption requests and there is sufficient units balance in the investor's folio.

d. Impact of Swing NAV on subscription where subscription is in terms of amount:

Particulars	Schemes having PRC Matrix A-III
Amount of Subscription (Rs.)	12,000,000.00
NAV before Swing Pricing / Normal NAV (Rs.)	1,200.0000
Units to be allotted at Normal NAV (Nos.)	10,000.00
NAV after applying swing factor / Adjusted NAV (Rs.)	1,188.0000
Units to be allotted at Adjusted NAV / Swing NAV (Nos.)	10,101.0101
Impact: Additional Units allotted due to Swing Pricing Framework (Nos.)	101.0101

Note: The above are just illustrations to explain the impact of swing pricing on subscription / redemption transactions when mandatory swing pricing framework is applicable.

c. Creation of Segregated portfolio/Side pocketing (applicable for scheme(s) which have enabling provisions for creation of segregated portfolio):

Creation of segregated portfolio shall be subject to guidelines specified by SEBI from time to time and includes the following:

The term 'segregated portfolio' shall mean a portfolio comprising of debt or money market instrument affected by a credit event, that has been segregated in a mutual fund scheme and the term 'main portfolio' shall mean the scheme(s) portfolio excluding the segregated portfolio. The term 'total portfolio' shall mean the scheme(s) portfolio including the securities affected by the credit event.

- 1) Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:
 - a) Downgrade of a debt or money market instrument to 'below investment grade', or
 - b) Subsequent downgrades of the said instruments from 'below investment grade', or
 - c) Similar such downgrades of a loan rating
- 2) In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as mentioned above and implemented at the ISIN level.
- 3) In case the Scheme is holding any unrated debt or money market instruments of issuer that does not have any outstanding rated debt or money market instruments, segregated portfolio of such unrated debt or money market instruments may be created only in the following circumstances:
 - a) There is actual default of either the interest or the principal amount by the said issuer; or
 - b) Pursuant to dissemination of information by AMFI about the actual default by the said issuer.
- 4) In case the Scheme is holding debt instruments with special features viz. subordination to equity (absorbs losses before equity capital) and /or convertible to equity upon trigger of a pre-specified event for loss absorption, segregated portfolio of such debt instruments may be created in the following circumstances:
 - a. If the said instrument is to be written off or converted to equity pursuant to any proposal, the date of said proposal may be treated as the trigger date.

- b. However, if the said instruments are written off or converted to equity without proposal, the date of write off or conversion of debt instrument to equity may be treated as the trigger date

Note: Additional Tier I bonds and Tier 2 bonds issued under Basel III framework are some instruments which may have above referred special features.

Hereinafter also referred to as 'credit event' for the purpose of creation of segregated portfolio.

- 5) Creation of segregated portfolio is optional and at the discretion of the Invesco Asset Management (India) Pvt. Ltd. ('IAMI / AMC').

Process for Creation of Segregated Portfolio

- 1) On the date of credit event, the AMC shall decide on creation of segregated portfolio and it shall:
 - a) Seek approval of Trustee prior to creation of the segregated portfolio.
 - b) Immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. It shall also be disclosed that the segregation shall be subject to approval of Trustee. Additionally, the said press release shall be prominently disclosed on the website of the AMC.
 - c) Ensure that till the time the Trustee approval is received, which in no case shall exceed 1 (One) business day from the day of credit event, the subscription and redemption in the scheme shall be suspended for processing with respect to creation of units and payment on redemptions.
- 2) Once the Trustee approves:
 - a) Segregated portfolio will be effective from the day of credit event.
 - b) AMC shall issue a press release immediately with all relevant information pertaining to the segregated portfolio. The said information shall also be submitted to SEBI.
 - c) An e-mail or SMS will be sent to all unit holders of the concerned scheme(s).
 - d) The NAV of both segregated and main portfolio(s) will be disclosed from the day of the credit event.
 - e) All existing investors in the scheme(s) as on the day of the credit event will be allotted equal number of units in the segregated portfolio as held in the main portfolio.
 - f) No redemption and subscription will be allowed in the segregated portfolio. In order to facilitate exit to unit holders in segregated portfolio, AMC will enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests.
 - g) After creation of segregated portfolio, investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio. Further investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV.
- 3) If the Trustee do not approve the proposal to segregate portfolio, AMC will issue a press release immediately informing investors of the same and subscription and redemption applications will be processed based on the NAV of total portfolio.
- 4) Notwithstanding the decision to segregate the debt and money market instrument, the valuation shall take into account the credit event and the portfolio shall be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and circular(s) issued thereunder.

Further in case of debt instruments with special features (i.e. AT-1 / Tier 2 bonds), the AMC shall ensure that the financial stress of the issuer and the capabilities of the issuer to repay the dues / borrowing are reflected in the valuation of such securities from the trigger date onwards.

Disclosures:

In order to enable the existing as well as the prospective investors to take informed decision, AMC will comply with the following disclosure requirements:

- a) A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio.

- b) Adequate disclosure of the segregated portfolio shall appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the scheme.
- c) The Net Asset Value (NAV) of the segregated portfolio shall be declared on daily basis.
- d) The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.
- e) The scheme performance required to be disclosed at various places shall include the impact of creation of segregated portfolio. The scheme performance should clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery(ies), if any, shall be disclosed as a footnote to the scheme performance.
- f) The disclosures at point (d) and (e) above regarding the segregated portfolio shall be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.
- g) The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

TER for the Segregated Portfolio

- a) No investment and advisory fees will be charged on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.
- b) The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.
- c) AMC may charge legal charges related to recovery of the investments of the segregated portfolio to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- d) The costs related to segregated portfolio will not be charged to the main portfolio.

Monitoring by Trustee

In order to ensure timely recovery of investments of the segregated portfolio, the Trustees shall ensure that:

- a) The AMC puts in sincere efforts to recover the investments of the segregated portfolio.
- b) Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.
- c) AMC shall place an Action Taken Report (ATR) on the efforts made to recover the investments of the segregated portfolio at every trustee meeting till the investments are fully recovered/ written-off.

Further, in order to avoid mis-use of segregated portfolio, Trustees shall ensure to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers, etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

Risks associated with segregated portfolio

- a) Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.
- b) Security(ies) held in segregated portfolio may not realize any value.
- c) Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.
