Name of the Scheme

Invesco India Fixed Maturity Plan - Series 31 - Plan B

Tenure of the Scheme is 1,143 days from the date of allotment (including the date of allotment)

Investment Objective

To generate income by investing in a portfolio of debt and money market instruments maturing on or before the date of maturity of the Scheme. However, there is no assurance or guarantee that the investment objective of the Scheme will be achieved. The Scheme does not assure or guarantee any returns.

Asset Allocation Pattern of the Scheme

Under normal circumstances the asset allocation of the Scheme would be as follows:

Instruments	Indicative allocation (% of total assets)		Risk Profile High / Medium / Low
	Minimum	Maximum	
Debt Instruments	80	100	Low to Medium
Money Market Instruments	0	20	Low

The Scheme will not invest in securitized debt, un-rated debt instruments and will not participate in repo in corporate debt securities. The Scheme will not participate in Credit Default Swaps (CDS) for corporate bonds. The total exposure of the Scheme in a particular sector (excluding investments in Bank CDs, CBLO, G-Secs, T-Bills, short term deposits of scheduled commercial banks and AAA rated securities issued by Public Financial Institutions and Public Sector Banks) shall not exceed 25% of the net assets of the Scheme. Further an additional exposure to financial services sector (over and above the limit of 25%) not exceeding 15% of the net assets of the Scheme will be allowed by way of increase in exposure to AA and above rated securities issued by Housing Finance Companies (HFCs) registered with National Housing Bank (NHB). The total investment / exposure in HFCs will not exceed 25% of the net assets of the Scheme. The AMC shall utilize the "Sector" classification prescribed by AMFI. In case AMFI classification is not available for an issuer, AMC will classify the issuer internally based on the "Sector" categories specified by AMFI. The Scheme will not undertake overseas investments / invest in foreign securities.

Investment Strategy of the Scheme

The investment objective of the Scheme would be achieved by investing in a portfolio of debt and money market instruments maturing on or before the date of maturity of the Scheme.

Under normal circumstances, passive portfolio management strategy would be adopted.

The fund manager will follow a strict disciplined investment process to meet the investment objective of the Scheme. The fund manager will carry out rigorous in depth credit evaluation of the money market and debt instruments proposed to be invested in. The credit evaluation includes a study of the operating environment of the issuer, the past track record as well as the future prospects of the issuer and the short term/long term financial health of the issuer. Internal research and ratings issued by credit rating agencies will be used as the guide to credit quality.

Additional disclosure pursuant to SEBI circular dated August 1, 2011:

a) Credit Evaluation Policy:

Credit Evaluation Policy for investment in debt securities evaluates various factors which determine the repayment ability of the borrower / issuer. Investment team has two dedicated credit analysts for conducting the due-diligence and thorough analysis of each company. The due diligence process includes studying economic risk, industry risk, business risk, financial risk and management risk. For evaluating industry risk, some key factors pertinent across industries which are evaluated include size, historical growth, competitive scenario, demand / supply dynamics, entry barriers (if any), profitability, cyclicity, vulnerability to technological changes, regulatory environment & political environment etc. The credit analyst prepares a detailed research report based on the credit evaluation model which takes into account both qualitative and quantitative parameters. The research report includes a detailed analysis of the financial data of the previous 3 years and qualitative factors like the sector in which the company operates, the management track record, internal control systems, acceptability of the products of the company in the market, past track record of any defaults to their creditors etc. Further conference calls/meetings with the management of the company are arranged in order to seek further clarifications about the business and financial performance of the company and understand its strategies going forward. The financial analysis of the company is also compared against its peers to measure relative strengths and weaknesses. The report from the credit analyst is an independent opinion based on the credit risk analysis.

b) The Scheme shall not invest in debt securities issued by corporate operating in gem & jewellery.

c) Floors and ceilings within a range of 5% of the intended allocation against each sub asset class/credit rating will be as follows:

Instruments / Credit Rating	AAA	A1+	AA ¹	A ¹	Not Applicable
Certificate of Deposits (CDs)					
Commercial Papers (CPs)					
Non-Convertible Debentures (NCDs)	95% -100%				
CBLO, G-Sec, T-Bills					0 - 5%

¹Securities with rating A and AA shall include A+ and A- & AA+ and AA- respectively.

d) Positive variation in investment towards higher credit rating in the same instrument shall be allowed.

e) In case of non availability of and taking into account the risk-reward analysis of CPs, NCDs, the Scheme may invest in highest rated (i.e. A1+) CDs, CBLO, Treasury Bills and Cash Management Bills, such deviations may exist till suitable NCDs, CPs of desired credit quality are not available.

f) At the time of building up the portfolio post NFO and towards the maturity of the Scheme, there may be a higher allocation to cash and cash equivalent and highest rated CDs.

g) Subsequent to the initial portfolio construction, during the tenure of the Scheme, the above allocation may vary due to instances like (i) Inflows on account of coupons or any corporate actions; (ii) the instrument is called or bought back by the issuer; (iii) in anticipation of any adverse credit event. In such cases, the Scheme as an alternate would invest in CDs of highest credit ratings (A1+ or equivalent) / Treasury Bills / Cash Management Bills / CBLO) till such time as suitable instruments of desired credit quality is / are not available.

h) All investment shall be made based on the rating prevalent at the time of investment. However, in case of an instrument having dual ratings, the most conservative publicly available rating would be considered.

i) In the event of any deviations from the floor and ceiling of credit ratings specified for any instrument, the same shall be rebalanced within 30 days.

There will not be any variation between the intended portfolio allocation and the final portfolio allocation except the exceptions mentioned in d, e, f & i above.

- Fixed Income Securities (Debt Instruments): Fixed income securities or debt instruments are financial claims with promised cash flows of fixed amount paid at fixed dates. It is a contractual or written assurance to repay a debt. Fixed income securities/debt instruments include but not limited to Government securities, treasury bills, corporate bonds, debentures, commercial papers, floating rate notes, asset backed securities / mortgage backed securities, pass through certificates etc.
- Diversification: The Scheme will try to achieve diversification by having at least 9 issuers in case of debt instruments comprising of money market instruments and non-money market instruments. Further the total exposure of the Scheme in a Group (excluding investments in securities issued by Public Sector Units, Public Financial Institutions and Public Sector Banks) is restricted to 20% of net assets of the Scheme. Such investment limit may be extended to 25% of the net assets of the Scheme with prior approval of the Board of Trustees.
- Security selection criteria: The process of security selection would go through following criteria:
 - Investment objective and asset allocation mandate of the Scheme as specified in the Scheme Information Document.
 - Credit quality of the security, judged by using internal research and rating assigned by the credit rating agency.
 - Liquidity of the asset in the secondary market (based on historical traded volumes in secondary market)
 - Impact of the security on the portfolio duration/residual maturity and yield.

Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

- Risks associated with investing in fixed income and money market instruments involve interest - rate risk, credit risk, liquidity or marketability risk, re-investment risk etc.
- Risks associated with trading of Units on Stock Exchange(s) involve absence of prior active market, trading in Units on Stock Exchange(s) may be halted because of market conditions or for other reasons, the Units of the Scheme may trade above or below their NAV etc.
- The Scheme is a close ended scheme and will not provide redemption facility prior to Maturity Date / Final Redemption Date. Therefore Units of the Scheme cannot be redeemed (including switch-outs) by the investors directly with the Mutual Fund until the Maturity Date / Final Redemption Date. Unit holders who wish to sell the Units before the Maturity Date / Final Redemption Date can sell Units only on the Stock Exchange on which the Units of the Scheme are listed. Further Units of the Scheme will also be subject to risks associated with trading of Units on the Stock Exchange(s) viz. lack of active secondary market, Units may trade above or below their NAV, trading halts caused by extraordinary market volatility and pursuant to Exchange and SEBI 'circuit filter' rules etc.

Risk Mitigation Strategies:

Type of Risk	Measures to mitigate risk
Volatility	As the Scheme would follow passive investment strategy (i.e. buy and hold), the AMC do not foresee volatility risk in the portfolio.
Liquidity	The Scheme allows redemption of units only on maturity date/final redemption date. Investment will be made only in debt and money market instruments maturing on or before the maturity of the Scheme.
Concentration	<p>As the total exposure to a single sector is restricted to 25% of net assets of the Scheme, the sectoral concentration risk is mitigated to a substantial extent. Further, to mitigate issuer concentration risk, the Scheme would have at least 9 issuers in case of debt instruments comprising money market instruments and non-money market instruments.</p> <p>(Sectorial restriction of 25% is not applicable for investments made in Bank CDs, CBLD, G-Secs, T-Bills, short term deposits of scheduled commercial banks and AAA rated securities issued by Public Financial Institutions and Public Sector Banks).</p> <p>Further, as the total exposure of the Scheme in a Group (excluding investments in securities issued by Public Sector Units, Public Financial Institutions and Public Sector Banks) is restricted to 20% of net assets of the Scheme (such investment limit may be extended to 25% of the net assets of the Scheme with prior approval of the Board of Trustees), the concentration risk with respect to Group is also mitigated.</p>
