SCHEME RISKOMETER

SCHEME BENCHMARK

NIFTY 100 ESG TRI

BENCHMARK RISKOMETER

“ESG is the consideration of Environmental, Social and Governance factors in the investment process”

Climate change, burgeoning pollution, resource’s scarcity, inequality, among others are some of the defining issues of our time, and we are at a turning point which could change the future.

The companies are increasingly focusing on ESG initiatives as businesses face a new set of challenges in today’s socially conscious economy.

With risks emanating from environment, social and governance (ESG) factors increasing; it is important to assess where the company faces risk on account of ESG parameters as ignoring these risks can have far reaching consequences, including impact on the shareholder value.

Why ESG risks can have a material impact on businesses?

ESG issues can impact company’s positioning and have financial impacts. In the past, continuity of several businesses has been risked due to disregarding ESG practices, which in turn impacted their business operations, reputation and the shareholder value.

Environmental	Social	Governance
Breaching environment norms may lead to heavy tax implications, penalties, delay in project approvals, etc.	Poor social parameters can affect the productivity; labour unrest, lead to employee dissatisfaction. Deal with social stigma which can make it difficult for company to attract talent.	Poor governance standards lead to high reputation risk.

Disclaimer - The above parameters are provided for explaining key material ESG issues which have the potential to impact the enterprise value. The ESG issues selected may not be an exhaustive list of issues and there can be other set of issues / methodology which may affect the ESG Scores.

Although ESG issues often get highlighted owing to extreme events, we feel that an [inclusive approach of evaluating businesses on ESG parameters can go a long way in reducing the investment risk and enhancing trust quotient of investors.](#)

The advantages of proactively dealing with ESG issues not only help companies to alleviate the shareholders concerns but can also provide access to a large pool of capital, build a strong brand, create value, and encourage long-term sustainable growth.

The companies with strong ESG propositions may create value through:

Increased top-line growth

Lower costs of production

Better financing terms

Government support and subsidies

Motivated employees

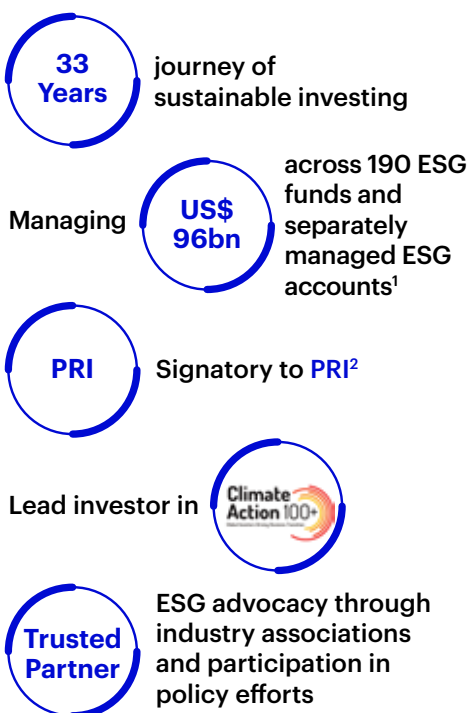

Enhanced returns on capital invested

Invesco and ESG

'What we believe is what we do'

Invesco truly believes in merits of 'responsible investing' and for more than 30 years, globally we have been demonstrating our commitment to responsible investing by actively encouraging ESG inclusive practices across every area of the business.

Presenting Invesco India ESG Equity Fund

Investment Strategy & Portfolio Construction Guidelines

- Investments in companies which are selected based on Environmental, Social & Governance (ESG) criteria as defined by our proprietary investment framework.
- Follows an exclusions strategy wherein it will not invest in companies associated with following sectors: thermal coal extraction, unconventional oil & gas extraction (shale oil, shale gas, and Arctic drilling), power production based on coal, unconventional weapons (including nuclear weapons systems, biological weapons etc.), tobacco – production & trading, gambling etc.
- Invests primarily in Largecap stocks. (~64.7% of overall portfolio) Limited exposure to midcap & smallcap stocks ~33.1% allocation of overall portfolio³.
- Bottom-up approach to select stock. Portfolio will be a blend of growth & value stocks.
- Portfolio weighted average **ESG Risk score is 1.25**⁴.

Note - ³The above strategy is based on current views and is subject to change from time to time. Large cap: 1st – 100th company in terms of full market capitalization; Mid cap: 101st – 250th company in terms of full market capitalization; Small cap: 251st company onwards in terms of full market capitalization.⁴ The above mentioned ESG score is subject to change based on the changes within the overall ESG framework. Source: Invesco internal. Data as of March 31, 2022.

Why Invesco India ESG Equity Fund?

- Profit with Purpose - We see ESG funds as a vehicle to invest in companies, which help make the world a better place.
- Deep commitments to running ESG anchored portfolios through our actions involving investment, divestment and engagement.
- Our belief that ESG considerations represent material economic information that helps explain a company's future beyond what can be deciphered through typical financial statements.

Disclaimer - The use of word 'Profit' does not in any manner imply or suggest the performance of the Scheme of Invesco Mutual Fund. It should not be construed as a promise for returns and safeguard of capital. It does not guarantee protection against a loss in a declining market. The readers should exercise due caution and/or seek independent professional advice before making any investment decision or entering into any financial obligation based on information, statement or opinion which is expressed herein.
