SCHEME BENCHMARK

MSCI World Index -
Net Dividend

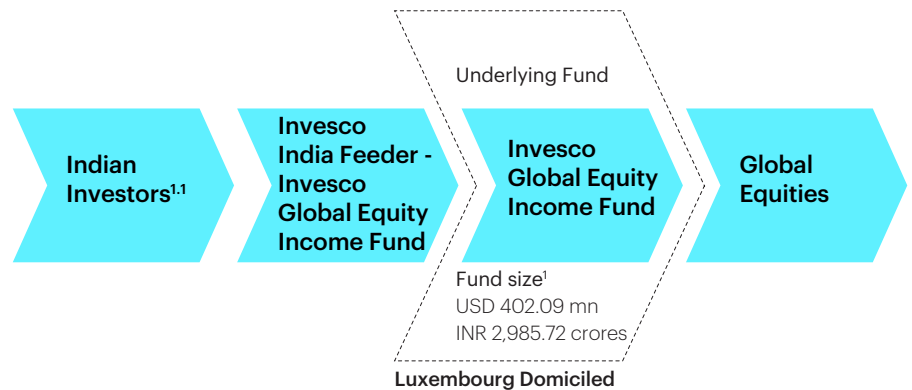

Key reasons for investing globally

- **Diversification** - Investing across different markets provides investors an opportunity to diversify their portfolio and eliminate country specific risk. A diversified portfolio invested across various countries ensures that risk is spread across companies, sectors and geographies. Investment in global markets helps investors to reduce portfolio volatility given their low correlation to Indian equity market and can also provide an opportunity to tap the growth potential of different geographic regions.

- **Low correlation** - As an investor, one would want to diversify to markets that not only have strong fundamentals, but also share a low correlation with home country (India). Low correlation means that returns from two or more asset classes or countries are not moving exactly in tandem, for example, when the returns from an asset class or a country go up those from the other asset class or country are subdued and vice versa. Thus, investing in low correlated markets helps to improve risk/reward characteristic of a portfolio. Historically, world equity markets have exhibited low correlation with Indian equity market and provide an opportunity for diversification.

- **Exposure to companies not available in India** - Investors can gain exposure to global equity markets and benefit by investing in world class companies having global presence and run by quality management teams.

Invesco India Feeder - Invesco Global Equity Income Fund - Structure

¹Note: Kindly refer to Section- 'Who can Invest ' in the Scheme Information Document for details.

Underlying Fund Details - Invesco Global Equity Income Fund

- **Fund Manager:** Stephen Anness
- **Fund AuM:** USD 402.09 mn (as of September 30, 2021)
- **Base Currency:** USD
- **No. of Holdings:** Typically 40-50 diverse holdings
- **Investment Philosophy²**
 - Markets are broadly efficient, anomalies are rare
 - To outperform you need to be different
 - Anomalies can take a long-time to resolve
 - Risk management must be considered through the entire process
 - Dividends and dividend growth are key drivers of return

Short term investor behaviour can create a wide divergence between perception and reality. This creates opportunity for the long term investor
- **Portfolio Approach²**
 - Focused Portfolio
 - Active approach to stock selection
 - Long term horizon
 - Focus on capital preservation
 - Focus on growing real dividends

²Source: Invesco as at 30 June, 2021.

The fund seeks to deliver a combination of rising income as well as capital growth. It is invested in what the fund manager believes to be strongly cash generative businesses, paying above average dividend yields, with sustainable business models. Driven by stock selection, the fund manager seeks to minimise risks arising from global macroeconomic themes, and instead seeks to identify well-managed companies with strong business franchises and lower than average financial leverage.
