Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary substantially depending upon the perception of the fund manager, the intention being at all times to seek to protect the interests of the Unit holders. Change in the investment pattern for defensive considerations will be in the interest of unit holders and for short term only. The Fund Manager will restore asset allocation in line with the asset allocation pattern within 30 days.

In case the portfolio is not re-balanced within the specified time frame, justification for the same shall be recorded in writing and will be placed before the investment committee. The investment committee will then decide on further course of action.

Investment Strategy of the Scheme

The investment objective of the Scheme would be achieved by investing in a portfolio of debt and money market instruments maturing on or before the date of maturity of the Scheme.

Under normal circumstances, passive portfolio management strategy would be adopted.

The fund manager will follow a strict disciplined investment process to meet the investment objective of the Scheme. The fund manager will carry out rigorous in depth credit evaluation of the money market and debt instruments proposed to be invested in. The credit evaluation includes a study of the operating environment of the issuer, the past track record as well as the future prospects of the issuer and the short term/ long term financial health of the issuer. Internal research and ratings issued by credit rating agencies will be used as the guide to credit quality.

Additional disclosure pursuant to SEBI circular dated August 1, 2011:

a) Credit Evaluation Policy:

Credit Evaluation Policy for investment in debt securities evaluates various factors which determine the repayment ability of the borrower/issuer. Investment team has two dedicated credit analysts for conducting the due-diligence and thorough analysis of each company. The due diligence process includes studying economic risk, industry risk, business risk, financial risk and management risk. For evaluating industry risk, some key factors pertinent across industries which are evaluated include size, historical growth, competitive scenario, demand/supply dynamics, entry barriers (if any), profitability, cyclicality, vulnerability to technological changes, regulatory environment & political environment etc. The credit analyst prepares a detailed research report based on the

credit evaluation model which takes into account both qualitative and quantitative parameters. The research report includes a detailed analysis of the financial data of the previous 3 years and qualitative factors like the sector in which the company operates, the management track record, internal control systems, acceptability of the products of the company in the market, past track record of any defaults to their creditors etc. Further conference calls/meetings with the management of the company are arranged in order to seek further clarifications about the business and financial performance of the company and understand its strategies going forward. The financial analysis of the company is also compared against its peers to measure relative strengths and weaknesses. The report from the credit analyst is an independent opinion based on the credit risk analysis.

- b) The Scheme shall not invest in debt securities issued by corporate operating in Airlines, gems & jewellery.
- c) Floors and ceilings within a range of 5% of the intended allocation against each sub asset class/credit rating will be as follows:

Instruments\ Credit Rating	AAA	A1+	AA *	A *	Not Applicable
Certificate of Deposits (CDs)	0-5%				
Commercial Papers (CPs)					
Non-Convertible Debentures (NCDs)					
Tri-party Repo, G-Sec, T-Bills	95-100%				

*Securities with rating A and AA shall include A+ and A- & AA+ and AA- respectively.

(The floors and ceilings within a range of 5% of the intended allocation (%) against each sub asset class/credit rating will be decided at the time of filing the final Scheme Information Documents with SEBI before launch of each Fixed Maturity Plan under this Scheme Information Document.)

- d) Positive variation in investment towards higher credit rating in the same instrument shall be allowed.
- e) In case of non-availability of and taking into account the risk-reward analysis of CPs, NCDs (including securitised debt), the Scheme may invest in Government Securities, highest (i.e. A1+) rated CDs, Tri-party Repo, Treasury Bills and Cash Management Bills and such deviations may exist till suitable NCDs (including securitised debt), CPs of desired credit quality are not available.
- f) At the time of building up the portfolio post NFO and towards the maturity of the Scheme, there may be a higher allocation to money market instruments and cash and cash equivalents. Such deviation may continue upto 30 days from the date of close of NFO and upto 3 months prior to maturity of the scheme.
- g) Subsequent to the initial portfolio construction, during the tenure of the Scheme, the above allocation may vary due to instances like (i) Inflows on account of coupons or any corporate actions; (ii) the instrument is called or bought back by the issuer; (iii) in anticipation of any adverse credit event. In such cases, the Scheme as an alternate would invest in CDs of highest credit ratings (A1+ or equivalent) / Treasury Bills / Cash Management Bills / Tri-party Repo/ till such time as suitable instruments of desired credit quality is/ are not available.
- h) All investment shall be made based on the rating prevalent at the time of investment. However, in case of an instrument having dual ratings, the most conservative publicly available rating would be considered.
- i) In the event of any deviations from the floor and ceiling of credit ratings specified for any instrument including deviations mentioned in point (d), (e), and (g) above, the same shall be rebalanced within 30 days from the date of the said deviation.
- Security selection criteria: The process of security selection would go through following criteria:
 - Investment objective and asset allocation mandate of the scheme as specified in the Scheme Information Document.
 - Credit quality of the security judged by using internal research and rating assigned by the credit rating agency.
 - Liquidity of the asset in the secondary market (based on historical traded volumes in secondary market).
 - Impact of the security on the portfolio duration/residual maturity and yield.

Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Risks associated with investing in Fixed Income & Money Market Instruments:

In addition to the factors that affect value of securities, the NAV of the Units of the debt schemes will fluctuate with the movement in the broader fixed income market and may be influenced by factors influencing such markets in general including but not limited to economic conditions, changes in interest rates, price and volume volatility in fixed income markets, changes in tax laws, political, economic or other developments. Further, the investments made by the debt schemes will also be affected by interest rate / price risk, credit risk or default risk, reinvestment risk and settlement risk.

Risk Factors associated with Trading of Units on Stock Exchange(s):

- Although Units of the Scheme as mentioned in this Scheme Information Document are to be listed on the Exchange, there can be no assurance that an active secondary market will develop or be maintained.
- The Units of the Scheme may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holdings. The trading prices of Units of the Scheme will fluctuate in accordance with changes in their NAV as well as demand and supply of the Units of the Scheme in the market.
- Trading in Units of the Scheme on the Exchange may be halted because of market conditions or for reasons that in view of exchange authorities or SEBI, trading in Units of the Scheme is not advisable. In addition, trading in Units of the Scheme is subject to trading halts caused by extraordinary market volatility and pursuant to Exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of Exchange necessary to maintain the listing of Units of the Scheme will continue to be met or will remain unchanged.
- In case of units issued in demat form, the records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund on the Maturity Date / Final Redemption Date will depend upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control.
- As the Units allotted under Scheme will be listed on the Exchange, the Mutual Fund shall not provide for redemption / repurchase of Units prior to Maturity Date / Final Redemption Date of the Scheme.

Risk Factor associated with Close-ended scheme:

The Scheme mentioned under this Scheme Information Document is a close ended scheme and will not provide redemption facility prior to Maturity Date / Final Redemption Date of Scheme. Therefore, Units of Scheme cannot be redeemed (including switch-outs) by the investors directly with the Fund until the Maturity Date/ Final Redemption Date. Unit holders who wish to sell the Units before the Maturity Date / Final Redemption Date can sell Units only on the Stock Exchange on which the Units of Scheme are listed. Further Units of Scheme will also be subject to risks associated with trading of Units on the Stock Exchange(s) viz. lack of active secondary market, Units may trade above or below their NAV, trading halts caused by extraordinary market volatility and pursuant to Exchange and SEBI 'circuit filter' rules etc.

Risks associated with Securities Lending:

As with other modes of extensions of credit, there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

Risks associated with Short Selling:

The Scheme may enter into short selling transactions, subject to SEBI and RBI Regulations. Short positions carry the risk of losing money and these losses may grow unlimited theoretically if the price of the stock increases without any limit. This may result in major loss to the Scheme. At times, the participants may not be able to cover their short positions, if the price increases substantially. If numbers of short sellers try to cover their position simultaneously, it may lead to disorderly trading in the stock and thereby can briskly escalate the price even further making it difficult or impossible to liquidate short position quickly at reasonable prices. In additions, short selling also carries the risk of inability to borrow the security by the participants thereby requiring the participants to purchase the securities sold short to cover the position even at unreasonable prices.

Risks associated with Investing in Securitised Debt:

Risks associated with investing in Securitised Debt involve interest rate risk, prepayment risk, credit or default risks. Further, Asset Backed Security (ABS) has structure risk due to a unique characteristic known as early amortization or early payout risk.

Additional risks associated with the CE rated papers:

In addition to all the risks associated with the plain vanilla instruments like NCDs / Money market instruments etc., any instrument rated with the suffix (CE) is exposed to various additional risks on the basis of the explicit underlying Credit enhancement (CE) from a third party/ parent/ group company, in the form of corporate guarantee/ letter of comfort/ pledge of shares etc. The risk involved are:

- if the Credit Enhancement is in the form of Corporate Guarantee / Letter of Comfort, then there is a legal risk of enforcing the Corporate Guarantee / Letter of Comfort along with the credit risk pertaining to the Credit Enhancement provider.
- If the Credit Enhancement is in the form of pledge of shares, then the additional risks are those associated with equity price movement, share collateral cover, liquidity of shares pledged as collateral in the secondary market, availability of free shares with the CE provider to be provided as additional collateral. Further there is also a legal risk of enforcing the pledge of shares, operational risk in selling the shares in secondary market & the underlying impact cost.
- If the Credit Enhancement is in any other form, then there is a risk pertaining to legal enforceability of the credit enhancement and credit risk of the credit enhancement provider.

Risks associated with segregated portfolio:

- Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
- Security(ies) held in segregated portfolio may not realize any value.
- Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risk Mitigation Strategies:

Type of Risk	Measures to Mitigate risk
Volatility	As the Scheme would follow passive investment strategy (i.e. buy and hold), the AMC do not foresee volatility risk in the portfolio.
Liquidity	The Scheme allows redemption of units only on maturity date/final redemption date. Investment will be made only in debt and money market instruments maturing on or before the maturity of the Scheme.
Concentration	As the total exposure to a single sector is restricted to 20% of net assets of the Scheme, the sectoral concentration risk is mitigated to a substantial extent. Further, to mitigate issuer concentration risk, the Scheme would have at least 9 issuers in case of debt instruments comprising money market instruments and non-money market instruments. (Sectorial restriction of 20% is not applicable for investments made in Bank CDs, Tri Party Repo, G-Secs, T-Bills, short term deposits of scheduled commercial banks and AAA rated securities issued by Public Financial Institutions and Public Sector Banks). Further, as the total exposure of the Scheme in a Group (excluding investments in securities issued by Public Sector Units, Public Financial Institutions and Public Sector Banks) is restricted to 20% of net assets of the Scheme (such investment limit may be extended to 25% of the net assets of the Scheme with prior approval of the Board of Trustees), the concentration risk with respect to Group is also mitigated.

Annual recurring expenses including investment management and advisory fees that can be charged to the Scheme shall be subject to limit prescribed by Regulation 52 of the SEBI Regulations, as amended from time to time, which is presently 1.00% of daily net assets of the Scheme.

The additional expenses on account of inflows from such cities charged will be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment

The additional expenses charged in case of inflows from such cities will be utilized for distribution expenses incurred for bringing inflows from such cities.

The additional TER in terms of Regulation 52(6A)(b) of SEBI (Mutual Funds) Regulations, 1996 shall be charged upto 30 basis points on daily net assets of the scheme based on inflows only from retail investors beyond Top 30 cities (B 30 cities). Top 30 cities shall mean top 30 cities based on Association of Mutual Funds in India (AMFI) data on 'AUM by Geography - Consolidated Data for Mutual Fund Industry' as at the end of the previous financial year.

The additional commission for B 30 cities shall be paid as trail only.

(iv) Brokerage and Transaction Cost

All Scheme related expenses including commission paid to distributors, by whatever name it may be called and in whatever manner it may be paid, shall necessarily be paid from the Scheme only within the regulatory limits and not from the books of the AMC, its Associate, Sponsor, Trustee or any other entity through any route.

However, expenses that are very small in value but high in volume may be paid out of AMC's books at actuals or not exceeding 2 bps of Scheme AUM, whichever is lower. A list of such miscellaneous expenses will be as provided by AMFI in consultation with SEBI.

The Fund will update the current expense ratios on its website atleast three working days prior to the effective date of the change. The investors can refer to <https://www.invescomutualfund.com/about-us?tab=Statutory> for Total Expense Ratio (TER) details.

Stamp Duty

Pursuant to Part I of Chapter IV of Notification dated February 21, 2019 issued by Legislative Department, Ministry of Law and Justice, Government of India on the Finance Act, 2019 read with subsequent Notification No. S.O. 1226 (E) and G.S.R. 226(E) dated March 30, 2020 issued by Department of Revenue, Ministry of Finance, Government of India, a stamp duty @ 0.005% of the Transaction Value will be levied on applicable mutual fund transactions i.e. purchases (including switch-in, IDCW Reinvestment etc.). Accordingly, pursuant to levy of stamp duty, the number of units allotted on purchase and switch-in to the unitholders will be lower to that extent. The stamp duty will be arrived at using inclusive method of calculation. For applying stamp duty, Transaction Value will be calculated after deducting transaction charges and such other charges as may be applicable from time to time. The calculation of stamp duty is explained as follows:

If an investor subscribes units for Rs.1,00,000/- through a distributor and transaction charges payable to distributor are Rs.100/-, then stamp duty will be calculated as follows:

$$\begin{aligned} \text{Transaction Value} &= \text{Subscription Amount} - \text{Transaction Charges (i.e. 1,00,000-100)} = 99,900/- \\ \text{Stamp Duty} &= (\text{Transaction Value} / 100.005) * 0.005 \\ &= (99,900/100.005) * 0.005 \\ &= 4.99 \end{aligned}$$

Accordingly, the amount of stamp duty of Rs. 4.99 will be deducted from the transaction value and for the balance amount, units will be allotted at applicable NAV.
