## **I. INTRODUCTION**

### **A. RISK FACTORS**

#### **Standard Risk Factors:**

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down depending on various factors and forces affecting the capital markets. Such factors may include, inter-alia, trading volumes, settlement periods, transfer procedures etc.
- Past performance of the Sponsor /AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1,50,000/- (Rupees One Lakh Fifty Thousand Only) made by it towards setting up the Mutual Fund.
- The present Scheme is not a guaranteed or assured return scheme.

#### **Scheme Specific Risk Factors / Risk Mitigation Measures:**

##### **Risk Factors of a Fund of Funds Scheme**

- The Scheme will invest primarily in Underlying Fund and the performance, risk profile and liquidity of the Scheme will be directly related to those of the Underlying Fund.
- Any change in the investment policies or fundamental attributes of Underlying Fund may affect the performance of the Scheme.
- Investments in Underlying Fund, which is an overseas exchange traded fund, will have all the risks associated with investments in equity, offshore markets and exchange risk, etc.
- Portfolio disclosure of the Scheme will be largely limited to units of Underlying Fund and investments by the Scheme in money market instruments. Therefore, Unit holders may not be able to obtain specific details of the Scheme in respect of portfolio of Underlying Fund.
- In addition to recurring expenses of the Scheme, the Unit holders shall also bear the applicable expenses of Underlying Fund. Therefore, the returns that the Unit holder of the Scheme may receive shall be substantially impacted or may, at times, be lower than the returns that a Unit holder could obtain by directly investing in Underlying Fund.
- The liquidity of the Scheme's investments may be inherently restricted by trading volumes, settlement periods and transfer procedures. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. In the event of an inordinately large number of redemption requests, or of a re-structuring of the Scheme's investment portfolio, these periods may become significant.

##### **Risks associated with investing in Overseas Mutual Fund Units**

- Within the investment objective of the Scheme, the Scheme will be investing in overseas markets (i.e. in units of Underlying Fund). As the units of Underlying Fund are denominated in foreign currency, the value of those investments, distributions, income and net assets when converted to Indian Rupee (INR) may fluctuate due to changes in exchange rate of base currency of Underlying Fund vis-à-vis INR. Investments in overseas markets carry risks related to fluctuations in foreign exchange rates, nature of securities market of the country, restrictions on repatriation of capital due to exchange controls and the political environment.
- As the Scheme will be predominantly investing in overseas mutual fund, the Scheme will be exposed to fluctuations in currency of Underlying ETF vis-à-vis INR. As per the current regulations, the Scheme is not allowed to use currency derivatives to hedge against currency risk and hence currency risk would be inherent risk of the scheme.
- Further the repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances. The Scheme's NAV may also be affected by a fluctuation in the general and specific level of interest rates internationally or change in credit profiles of the issuer.

- The liquidity of the Scheme will be affected if there is a non-Business Day of Underlying Fund. The Scheme shall have non-Business Day on all the days on which Underlying Fund has non-Business Day.
- In case of unforeseen events like system breakdown, natural calamities etc. which could delay NAV of Underlying Fund, NAV of the Scheme may also be delayed and the AMC shall suitably intimate AMFI / SEBI in this regard.
- In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilisation of overseas financial assets and prevalent tax laws of the respective jurisdictions for the execution of trades or otherwise.

#### **Settlement Risk**

The Scheme will purchase units of the Underlying Fund on stock exchange where such units are listed through broker(s). There is no assurance or guarantee that the units so purchased will be fully settled within the stipulated time and there could be delay in the getting physical delivery of units. The physical settlement of units will depend on trading volume and settlement period. In certain cases, the settlement periods may be extended significantly by unforeseen circumstances. To the extent the units purchased are not physically settled, the Scheme will not be able to sell such units. This may impact the Scheme's ability to meet its redemption obligations in case there are very large redemptions in the Scheme and the units available for sell are not sufficient to meet such redemption obligations

**The performance of Underlying Fund will be affected by a number of risk factors including the following:**

#### **Risk associated with Equity and Equity Related Instruments**

Investments in the equity shares of the Companies constituting the Index are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of Equity and Equity Related Instruments may fluctuate due to factors affecting the securities markets such as volume and volatility in the capital markets, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, general decline in the global markets, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAVs of units issued under Underlying Fund and in turn of the Scheme may be adversely affected.

Further, the Equity and Equity Related Instruments are risk capital and are subordinate in the right of payment to other securities including debt securities.

Equity and Equity Related Instruments listed on the stock exchange carry lower liquidity risk; however Underlying Fund's ability to sell these investments is limited by overall trading volumes on the stock exchanges. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of Underlying Fund to make intended securities purchases due to settlement problems could cause Underlying Fund to miss certain investment opportunities. Similarly, the inability to sell securities held in Underlying Fund's portfolio may result, at times, in potential losses to Underlying Fund, should there be a subsequent decline in the value of securities held in Underlying Fund's portfolio.

As the Underlying Fund will invest only in constituents of NASDAQ 100 index, investment in unlisted equity securities is not envisaged.

#### **Index related risk**

The Underlying ETF would invest in the securities comprising the Index in the same proportion as the securities have in the Index. Hence, the risk associated with the corresponding Index would be applicable to the Underlying ETF. The Index has its own criteria and policy for inclusion/exclusion of securities from the Index, its maintenance thereof and effecting corporate actions. The Underlying ETF would invest in the securities of the Index regardless of investment merit, research, without taking a view of the market and without adopting any defensive measures. The Underlying ETF would not select securities in which it wants to invest but is guided by the Index. As such the Underlying ETF is not actively managed but is passively managed. There is no guarantee that the Underlying ETF will achieve a high degree of correlation to the Underlying Index and therefore achieve its investment objective and may also lead to tracking error.

In addition, as the Scheme will invest in Underlying ETF, tracking error may arise due to various reasons that the Scheme has to incur expenses, regulatory policies, lack of liquidity, etc. The Scheme's returns may therefore deviate from those of its Underlying Fund. However, the Fund would endeavour to keep the tracking error as low as possible.

#### **Currency Risk**

- Underlying Fund's assets may be invested in securities denominated in currencies other than the base currency of Underlying Fund and any income from these investments will be received in those currencies. The performance of Underlying Fund may therefore be affected by movements in exchange rate between the currencies the assets are held and the base currency of Underlying Fund and hence there can be the prospect of additional gain or loss for the Unit holder than what may be normally derived from the assets in which Underlying Fund invests. The performance of Underlying Fund may also be affected by change in exchange control regulations. Accordingly, the investors will be exposed to the risk of global markets arising out of investment by Underlying Fund in securities which are denominated in foreign currencies.
- Conversion into foreign currency or transfer of proceeds received from the sale of securities cannot be guaranteed.
- Exchange rate fluctuations may also occur between the trade date for a transaction and the date on which the currency is acquired to meet settlement obligations.
- Movements in currency can adversely affect the return on the investments. The currency hedging that may be used to minimize the effect of currency movements may not be always successful.
- The value of assets of Underlying Fund may be affected by uncertainties such as fluctuations in foreign exchange rates, the imposition of currency repatriation restrictions, changes in legislation relating to level of foreign ownership in countries in which Underlying Fund may invest.

#### **Political and Economic Risks**

- Economic and/or political instability could lead to legal, fiscal and regulatory changes or the reversal of legal/fiscal/regulatory/market reforms. Assets could be compulsorily re-acquired without adequate compensation.
- Administrative risks may result in the imposition of restrictions on free movement of capital.
- A country's external debt position could lead to sudden imposition of taxes or exchange controls.
- High interest and inflation rates can mean that businesses have difficulty in obtaining working capital.
- Local management may be inexperienced in operating companies in free market conditions.
- A country may be heavily dependent on its commodity and natural resource exports and is therefore vulnerable to weaknesses in world prices for these products.

#### **Legal Environment**

- The interpretation and application of decrees and legislative acts can be often contradictory and uncertain particularly in respect of matters relating to taxation.
- Legislation could be imposed retrospectively or may be issued in the form of internal regulations not generally available to the public.
- Judicial independence and political neutrality cannot be guaranteed.
- State bodies and judges may not adhere to the requirements of law and relevant contract. There is no certainty that Unit holders will be compensated in full or at all for any damages incurred.
- Recourse through the legal system may be lengthy and protracted.
- In certain circumstances, Underlying Fund or certain share classes of Underlying Fund may be liquidated or merged which are detailed in the prospectus of Underlying Fund. In such cases, the costs and expenses of any such liquidation or merger may be borne by Underlying Fund or share class of Underlying Fund up to the limit specified in the prospectus of Underlying Fund. Any unamortized costs resulting from closure may be charged as an expense in full against the assets of Underlying Fund. In such a case, the amount distributed to shareholders of Underlying Fund (including the Scheme) may be less than their original investment.
- In certain circumstances as specified in the prospectus of Underlying Fund, the right of investors of Underlying Fund (including the Scheme) to redeem their units may be suspended.

- The Underlying Fund is offered under Invesco Markets III public limited company. An open-ended investment company with variable capital and is structured as an umbrella fund with segregated liability between its funds. It qualifies and is authorised in Ireland by the Central Bank of Ireland (the “Central Bank”) as a UCITS for the purposes of the Regulations and therefore is subject to investment supervision.

#### **Accounting Practices**

- The accounting, auditing and financial reporting system may not accord with international standards.
- Even when reports have been brought into line with international standards, they may not always contain correct information.
- Obligations on companies to publish financial information may also be limited.
- Accounting, auditing and financial reporting standards, practices and disclosure requirements applicable to some countries in which Underlying Fund may invest may differ from those applicable in India or Ireland that less information is available to investors and such information may be out of date.

#### **Shareholder Risk**

- Existing legislation may not yet be adequately developed to protect the rights of minority shareholders.
- There is generally no concept of any fiduciary duty to shareholders on the part of management.
- Liability for violation of what shareholder rights of Underlying Fund there are, may be limited.

#### **Market and Settlement Risks**

- The Underlying ETF will react to stock market movements. Therefore, value of investments in the Scheme may go down over a short or long period due to fluctuations in Underlying ETF’s NAV in response to factors such a performance of companies whose stock comprises the Underlying index, economic and political developments, changes in government policies, changes in interest rates, inflation and other monetary factors causing movement in prices of such investments.
- Lack of liquidity may adversely affect the ease of disposal of assets. The absence of reliable pricing information in a particular security held by Underlying Fund may make it difficult to assess reliably the market value of assets.
- The liquidity of Underlying ETF shares is determined through the interplay of share creation and redemption, market-making and secondary market trading. Disruptions to ETF liquidity could be, for example, market conditions, operational glitches, and also through any trading halts in Underlying securities etc.
- The share register of Underlying Fund may not be properly maintained and the ownership or interest may not be (or remain) fully protected.
- Registration of securities may be subject to delay and during the period of delay it may be difficult to prove beneficial ownership of securities.
- The provision for custody of assets may be less developed than in other more mature markets and thus poses an additional level of risk for Underlying Fund.
- Settlement procedures may be less developed and still be in physical as well as in dematerialised form.

#### **Risk associated with Listing and Trading of units on Stock Exchange(s)**

1. Although shares of Underlying Fund are listed on the Stock Exchange(s), there can be no assurance or guarantee that an active secondary market will develop or be maintained.
2. Trading in shares of Underlying Fund on the Stock Exchange(s) may be halted because of market conditions or for reasons that in view of Exchange authorities or Regulators, trading in shares of Underlying Fund is not advisable. In addition, trading in shares of Underlying Fund is subject to trading halts caused by extraordinary market volatility and / or pursuant to ‘circuit filter’ rules of Exchange and Regulators. There can be no assurance or guarantee that the requirements of Stock Exchange(s) necessary to maintain listing of shares of Underlying Fund will continue to be met or will remain unchanged. Further any change(s) in trading rules, regulations and policy of the Exchanges / Regulators governing the listing of shares of Underlying Fund may impact the trading of shares of Underlying Fund and its prices.
3. The shares of Underlying Fund may trade at a premium/discount to its NAV. The NAV of shares of Underlying Fund will fluctuate with changes in the market value of its holding. The

- trading prices of shares of Underlying Fund will fluctuate in accordance with changes in their NAV as well as demand and supply of shares of Underlying Fund in the market(s) and perceived trends in the market(s). However, any changes in the trading regulations by Stock Exchange(s) / Regulators may affect the ability of the Authorized Participants / market makers to create / redeem shares of Underlying Fund resulting into wider premium or discount to NAV.
4. As the shares of Underlying Fund are listed, the exchanges on which those shares are listed will have no responsibility for contents of any prospectus issued by Underlying Fund or will make no representations as to its accuracy or completeness and expressly disclaim any liability whatsoever for any kind of loss arising from or in reliance upon any part of any such prospectus.

#### **Taxation**

- Investors should note in particular that the proceeds from the sale of securities in some markets or the receipt of any Dividends and other income may be or may become subject to tax, levies, duties or other fees or charges imposed by the authorities in that market, including taxation levied by withholding at source. As a result, Underlying Fund (and therefore the Scheme) could become subject to additional taxation in such countries that is not anticipated either at the date of this SID or when investments are made, valued or disposed of.
- Prospective investors should note that there may be additional taxes, charges or levies applied in respect of the Scheme's investment in Underlying Fund depending on the location of assets of Underlying Fund and the jurisdiction in which Underlying Fund is located, registered or operated. Investors should also note that Underlying Fund's investment managers and the Scheme's ability to provide tax information and audited accounts in respect of Underlying Fund to Unit holders of the Scheme is dependent on relevant tax and other information being provided by Underlying Fund in timely fashion. Accordingly, delays may occur in respect of delivery of such information to the Scheme's Unit Holders.

#### **Hedging Risk**

The investment manager of Underlying Fund is permitted, but not obliged, to use hedging techniques to attempt to offset market and currency risks. There is no guarantee that hedging techniques will achieve the desired result.

#### **Risks Associated with Derivatives**

- Underlying Fund may use derivatives in connection with its investment strategies. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the investment manager of Underlying Fund to identify such opportunities. Identification and execution of strategies to be pursued by the investment manager of Underlying Fund involve uncertainty and decision of the investment manager of Underlying Fund may not always be profitable. No assurance can be given that the investment manager of Underlying Fund will be able to identify or execute such strategies.
- The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments. Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic or market conditions than other types of investments and could result in losses that significantly exceed Underlying Fund's original investment. Certain derivatives may give rise to a form of leverage. Due to low margin deposits normally required in trading financial derivative instruments, an extremely high degree of leverage is typical for trading in financial derivative instruments. As a result, Underlying Fund may be more volatile than if Underlying Fund had not been leveraged because the leverage tends to exaggerate the effect of any increase or decrease in the value of Underlying Fund's portfolio. A relatively small price movement in a derivative contract may result in substantial losses to the investor.
- Derivatives are also subject to risk that changes in value of a derivative may not correlate perfectly with the underlying asset, rate or index. The use of derivatives for hedging or risk management purposes or to increase income or gain may not be successful, resulting in losses to Underlying Fund and cost of such strategies may reduce Underlying Fund's returns and increase Underlying Fund's potential for loss.
- Underlying Fund may use derivatives to hedge market and currency risk and for the purposes of efficient portfolio management. The use of derivatives may expose Underlying Fund to a higher

degree of risk. In particular, derivative contracts can be highly volatile and the amount of initial margin is generally small relative to size of contract so that transactions are geared.

- Underlying Fund may take short positions on a security through the use of financial derivative instruments in the expectation that their value will fall in the open market. The possible loss from taking a short position on a security differs from the loss that could be incurred from a cash investment in the security, the former may be unlimited as there is no restriction on the price to which a security may rise, whereas the latter cannot exceed the total amount of the cash investment. The short selling of investments may also be subject to changes in regulations, which could impose restrictions that could adversely impact returns to investors.

#### **Right of Exchange to Suspend Trading in Securities listed**

The securities exchange on which shares of Underlying Fund may be listed may have right to suspend or limit trading in all securities which it lists. Such suspension would expose Underlying Fund to losses and delays in its ability to redeem shares of Underlying Fund.

#### **Warrants**

Underlying Fund may invest in warrants and the value of these warrants is likely to fluctuate more than the prices of underlying securities because of greater volatility of warrant prices.

#### **Futures and Options**

Underlying Fund may use options and futures on securities, indices and interest rates for the purpose of efficient portfolio management. Transactions in futures and options carry a high degree of risk. A relatively small market movement will have a proportionately larger impact which may work for or against the investor. The placing of certain orders which are intended to limit losses to certain amounts may not be effective because market conditions may make it impossible to execute such orders.

For additional risk factors of Underlying Fund, investors are requested to refer to the offering document or the website (<https://etf.invesco.com>) of Underlying Fund.

#### **Risk associated with Debt and Money Market Instruments:**

- Investment in debt and Money Market Instruments would have credit risk. Credit risk or default risk refers to the risk that the issuer of a fixed income security may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of security may be affected because of change in the credit rating of issuer/instrument and the price of security goes down if the credit rating agency downgrades the rating of the issuer. In case of T-Bills, there is minimal credit risk to that extent.
- Debt and Money Market Instruments also have liquidity or marketability risk. This refers to the ease with which a security can be sold at or near to its valuation, i.e. yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between bid price and offer price quoted by a dealer.
- The NAV of the Units, to the extent the corpus of the Scheme is invested in debt and Money Market Instruments, will be affected by changes in the level of interest rates. When interest rate in the market rise, the value of a portfolio of debt and Money Market Instruments can be expected to decline. The extent of rise or fall in the price is a function of existing coupon, days to maturity, increase or decrease in level of interest, credit quality, demand and supply.
- Investments in debt securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the debt security. Consequently, the proceeds may get invested at a lower rate.
- Securities which are not quoted on the Stock Exchange(s) may be illiquid and can carry higher liquidity risk in comparison with securities which are listed on the Stock Exchange(s) and offer exit option to the investor including put option. The Scheme would invest in the securities which are not listed but offer attractive yields. This may however increase the risk of the portfolio.

#### **Risk Factor associated with investing in Securities Segment and Tri-party Repo trade settlement**

Clearing Corporation of India Ltd. ('CCIL') is providing clearing and settlement services, for Triparty Repo trades in Government Securities, under its Securities Segment. CCIL would act as a Central Counterparty to all the borrow and lend Triparty Repo trades received by it for settlement. CCIL would also be performing the role responsibilities of Triparty Repo Agent, in terms of Repurchase transactions (Repo) (Reserve Bank) Directions, 2018 as amended from time to time. CCIL would settle the Triparty Repo trades, in terms of its Securities Segment Regulations.

The funds settlement of members is achieved by multilateral netting of the funds position in Triparty Repo with the funds position in Outright and Market Repo and settling in the books of RBI for members who maintain an RBI Current Account. In respect of other members, funds settlement is achieved in the books of Settlement Bank. Securities settlement for Triparty Repo trades shall be achieved in the Gilt Account of the Member maintained with CCIL. Securities obligation for outright and market repo trades shall be settled in the SGL / CSGL account of the Member with RBI.

Invesco Mutual Fund is a member of securities segment and Tri-party Repo trade settlement of the CCIL. Since all transactions of the Fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL, it reduces the settlement and counterparty risks considerably for transactions in the said segments.

To mitigate the potential losses arising in case any member defaults in settling the transactions routed through CCIL, CCIL maintains a Default Fund. CCIL shall maintain two separate Default Funds in respect of its securities segment, one to meet the losses arising out of any default by its members from outright and repo trades and other for meeting losses arising out of any default by its members from Triparty Repo trades.

In case any clearing member fails to honor his settlement obligations, the Default Fund is utilized to complete the settlement applying the Default Waterfall Sequence. As per the said waterfall mechanism, after the defaulter's margins and defaulter's contribution to default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution, if there is still a loss to be met, then contribution of non-defaulting members to Default Fund is utilized to meet the said loss.

The Scheme is subject to the risk of losing initial margin and contribution to Default Fund in the event of failure of any settlement obligation. Further the Scheme's contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

Further, CCIL periodically prescribes a list of securities eligible for contribution as collaterals by members. Presently, all Central Government Securities and Treasury Bills are accepted as collaterals by CCIL. The above risk factor may undergo a change in case the CCIL notifies securities other than Government of India Securities as eligible for contributions as collateral.

**Risks associated with segregated portfolio**

- a) Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.
- b) Security(ies) held in segregated portfolio may not realize any value.
- c) Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

**Risks associated with Securities Lending**

Not Applicable. The Scheme will not undertake Securities Lending.

**Risks associated with Short Selling**

Not Applicable. The Scheme will not undertake short selling.

**Risks associated with Investing in Securitized Debt**

Not Applicable. The Scheme will not invest in securitized debt.

**Risk Mitigation Strategies:**

Type of Risk	Measures to Mitigate Risk(s)
Concentration Risk	As the Scheme will predominantly invest in units of Underlying Fund, the Scheme carries concentration risk. However, Underlying Fund will have diversified portfolio comprising constituents of the Nasdaq-100 in respective weighting and concentration risk to that extent is minimized.
Currency Risk	As the Scheme will be predominantly investing in overseas mutual fund, the Scheme will be exposed to fluctuations in currency of Underlying Fund vis-à-vis

	INR. As per the current regulations, the Scheme is not allowed to use currency derivatives to hedge against currency risk and hence currency risk would be inherent risk of the Scheme.
Liquidity Risk	Units of the Underlying Fund in which the Scheme will invest are listed on overseas stock exchanges. Further, the Underlying Fund also provides for subscription and redemption on all Business Days to Authorised Participants. In addition, the Scheme will maintain some % of its net assets to meet liquidity requirements for the purpose of repurchase or redemptions.
Settlement Risk	As the Underlying Fund allows subscription in creation unit size, the broker through whom the Scheme purchase units can subscribe units of Underlying Fund directly with the Fund and deliver such units to the Scheme. Hence it is expected that the risk of unsettled units will be limited to the extent units outstanding in less than creation unit size.

## B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over 25% limit. Failure on the part of the said investor to redeem his exposure over 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15<sup>th</sup> day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

**D. COMPUTATION OF NAV**

The Net Asset Value (NAV) per Unit of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation day. The Mutual Fund will value its investments according to the Principle of fair valuation as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

The Net Assets Value (NAV) of the Units under the Scheme shall be calculated as shown below:

$$\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Scheme's Investments} + \text{Current Assets including Accrued Income} - \text{Current Liabilities and Provisions}}{\text{No. of Units outstanding under Scheme on the Valuation Day}}$$

Or

$$\text{NAV (Rs.)} = \frac{\text{Unit Capital + Reserves and Surplus}}{\text{No. of Units outstanding under the Scheme on the Valuation Day}}$$

The NAV shall be calculated up to four decimals. However, the AMC reserves the right to declare the NAVs up to additional decimal places as it deems appropriate. Direct Plan under the Scheme will have separate NAV. Separate NAV will be calculated and disclosed for each option.

The AMC will calculate NAV on daily basis. The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

The units of Underlying Fund will be valued at NAV declared by Underlying Fund / applicable market rate and converted at the applicable exchange rate.

There are no specific SEBI guidelines on valuation of foreign securities at present. In the absence of any guidelines, the following policy will be followed:

In case of investment in foreign securities, on the Valuation Day, the securities shall be valued in line with the valuation norms specified by SEBI for Indian debt/equity securities. However, in case valuation

for a specific debt/equity security is not covered by SEBI (MF) Regulations, then the security will be valued on fair value basis.

Due to difference in time zones of different markets, in case the closing prices of securities are not available within a given time frame to enable the AMC to upload the NAVs for a Valuation Day, the AMC may use the last available traded price for the purpose of valuation. The use of the closing price / last available traded price for the purpose of valuation will also be based on the practice followed in a particular market. In case any particular security is not traded on the Valuation Day, the same shall be valued on a fair value basis by the Valuation Committee of the AMC.

On the Valuation Day, all assets and liabilities denominated in foreign currency will be valued in Indian Rupees at the Bid Rate of foreign currency INR exchange rate available on Reuters at 5.00 p.m.

In case, the Reuters exchange rate is not available, then the following sources will be used for exchange rate in the order of priority:

- Exchange rate (Bid Rate) available on Bloomberg at 5.00 p.m. IST;
- Reference rate issued by Financial Benchmarks India Ltd. (FBIL) as at the close of banking hours on the relevant business day in India;
- Any other publicly available source.

The Trustees reserve the right to change the source for determining the exchange rate.

The exchange gain/ loss resulting from the aforesaid conversion shall be recognized as unrealized exchange gain/ loss in the books of the Scheme on the day of valuation. Further, the exchange gain/ loss resulting from the settlement of assets/ liabilities denominated in foreign currency shall be recognized as realized exchange gain/ loss in the books of the scheme on the settlement of such assets/ liabilities.

The additional expenses charged in case of inflows from such cities will be utilized for distribution expenses incurred for bringing inflows from such cities.

The additional TER in terms of Regulation 52(6A)(b) of SEBI (Mutual Funds) Regulations, 1996 shall be charged upto 30 basis points on daily net assets of the scheme based on inflows only from retail investors beyond Top 30 cities (B-30 cities). **E. TRANSACTION CHARGES**

In terms of SEBI circular no. IMD/ DF/ 13/ 2011 dated August 22, 2011, a transaction charge, as follows, is payable to distributors who have opted to receive transaction charge\*:

- i. For existing investor in a Mutual Fund: Rs. 100/- per subscription of Rs. 10,000/- and above;
- ii. For first time investor in Mutual Funds: Rs. 150/- per subscription of Rs. 10,000/- and above.

\*Distributors shall also have the option to either opt in or opt out of levying transaction charge based on type of the product.

In case of investment through systematic investment plan (SIPs), the transaction charge shall be applicable only if the total commitment through SIP (i.e. amount of each SIP installment X total number of SIP installments) amounts to Rs. 10,000/- and above. In such cases, the transaction charge shall be recovered in 3-4 installments, as may be decided by the AMC

However, there will be no transaction charge on:

- i. Subscription of less than Rs. 10,000/-; or
- ii. Transactions other than purchases / subscriptions relating to new inflows; or
- iii. Direct subscription (subscription not routed through distributor); or
- iv. Subscription routed through distributor who has chosen to 'Opt-out' of charging of transaction charge; or
- v. Transaction routed through Stock Exchange(s).

The transaction charge, if any, will be deducted by AMC from subscription amount and shall be paid to distributor. The balance subscription amount, after deducting applicable transaction charges, will be invested.

It is clarified that upfront commission to distributor will continue to be paid by the investor directly to distributor by a separate cheque.

Calculation of transaction charge and balance subscription amount in case of subscription routed through distributor is explained as follows:

**(In INR)**

Subscription Amount (A)	For existing investors in a Mutual Fund		For first time investor in Mutual Funds	
	Transaction charge (B)	Balance Subscription Amount (A-B)	Transaction charge (C)	Balance Subscription Amount (A-C)
10,000	100	9,900	150	9,850
9,999	Nil	9,999	Nil	9,999
10,00,000	100	9,99,900	150	9,99,850

**Note:** Balance subscription amount will be invested and Units will be allotted at applicable NAV per unit for the balance subscription amount on an on-going basis.

## F. STAMP DUTY

Pursuant to Part I of Chapter IV of Notification dated February 21, 2019 issued by Legislative Department, Ministry of Law and Justice, Government of India on the Finance Act, 2019 read with subsequent Notification No. S.O. 1226 (E) and G.S.R. 226(E) dated March 30, 2020 issued by Department of Revenue, Ministry of Finance, Government of India, a stamp duty @ 0.005% of the Transaction Value will be levied on applicable mutual fund transactions i.e. purchases (including switch-in, etc.). Accordingly, pursuant to levy of stamp duty, the number of units allotted on purchase, switch-in, installment of Systematic Investment Plan, Systematic Transfer Plan to the unitholders will be lower to that extent. The stamp duty will be arrived at using inclusive method of calculation. For applying stamp duty, Transaction Value will be calculated after deducting transaction charges and such other charges as may be applicable from time to time. The calculation of stamp duty is explained as follows:

If an investor subscribes units for Rs.1,00,000/- through a distributor and transaction charges payable to distributor are Rs.100/-, then stamp duty will be calculated as follows:

$$\text{Transaction Value} = \text{Subscription Amount} - \text{Transaction Charges (i.e. 1,00,000-100)} = 99,900/-$$

$$\begin{aligned} \text{Stamp Duty} &= (\text{Transaction Value} / 100.005) * 0.005 \\ &= (99,900/100.005) * 0.005 \\ &= 4.99 \end{aligned}$$

Accordingly, the amount of stamp duty of Rs. 4.99 will be deducted from the transaction value and for the balance amount, units will be allotted at applicable NAV.
