PART II - INFORMATION ABOUT THE SCHEME

A. Asset Allocation Pattern

Under normal circumstances, the asset allocation of the Scheme would be as follows:

Instruments	Indicative Allocations (% of total assets)	
	Minimum	Maximum
Shares of Invesco Pan European Equity Fund or other similar Overseas Mutual Funds # ^	95	100
Debt and money market securities (including government and corporate debt) / Units of debt and liquid schemes of Invesco Mutual Fund	0	5

Overseas Mutual Funds having similar objectives, strategy and attributes.

^ Investors are requested to note that shares of Invesco Pan European Equity Fund or other similar Overseas Mutual Funds should be considered similar to units of the Fund.

The Scheme shall have exposure to following instruments as per the percentages prescribed below and actual instrument/percentages may vary subject to applicable circulars:

Sl. No.	Type of instrument	Percentage of exposure	Circular references
1.	Overseas securities	Upto 100% of net assets of the scheme or residual regulatory limit, whichever is lower	Para 12.19.2.10 of SEBI Master circular dated June 27, 2024
2.	Units of debt and liquid schemes of Invesco Mutual Fund	Upto 5% of net assets subject to overall limit of 5% at fund house level	As per Asset Allocation table and Clause 4 of Seventh Schedule of SEBI MF Regulations.
3.	Short term deposits of all the Scheduled Commercial Banks (pending deployment)	Upto 5% of net assets of the Scheme	Para 12.16 as per SEBI Master Circular dated June 27, 2024 and as per Asset Allocation table.
4.	Triparty Repo (TREPS) on Government securities or treasury bills.	Upto 5% of net assets of the Scheme	As per Asset Allocation table
5.	Unlisted non-convertible debentures	Upto 10% of the debt portfolio of the scheme	Para 12.1.1 of SEBI Master Circular dated June 27, 2024

The Scheme will not invest in following instruments:

Sl. No.	Type of Instrument
1.	Debt Instruments having Structure obligation (SO rating) / Credit Enhancement (CE rating)
2.	Securitized Debt
3.	Unrated debt instruments
4.	Debt instruments having special features i.e. Additional Tier I (AT1) / Perpetual Bonds and Tier 2 Bonds
5.	Derivatives
6.	Securities lending and short selling
7.	ReITS and InVITS
8.	Repo/ reverse repo transactions in corporate debt securities
9.	Credit Default Swaps

In line with para 12.24 of SEBI Master Circular on Mutual Funds dated June 27, 2024, the cumulative gross exposure through Units of Invesco Pan European Equity Fund or other similar Overseas Mutual Funds, debt and money market instruments, units of debt and liquid schemes of Invesco Mutual Fund, other permitted securities/assets and such other securities/assets as may be permitted by SEBI from time to time should not exceed 100% of the net assets of the Scheme.

Cash and cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. Point 67 of Policy Related emails issued by SEBI Master Circular dated June 27, 2024 has clarified that Cash Equivalent shall consist of Government Securities, T-Bills and Repo on Government Securities. Subscriptions received in excess of eligible investment amount shall be invested in domestic Debt and Money Market Instruments including government securities or securities which are supported by the Central or a State Government. Further, if the investment proposed to be made by the Scheme in Underlying Fund exceeds any restriction (regulatory or otherwise) or is less than the minimum investment amount requirement imposed by Underlying Fund, the subscription received in the Scheme may be invested in debt and Money Market Instruments. These are temporary measures and the fund manager will restore the asset allocation in line with asset allocation pattern within 30 days.

Underlying Fund will not invest more than 15% of its net assets in Indian equities. If such limit is breached, then a rebalancing period of 3 months will be permitted during which Underlying Fund should bring its exposure to Indian equities below 15% of its net assets. In case the said breach continues even beyond 3 months, then no fresh subscription will be allowed in the Scheme for next 9 months. However, if the said breach of 15% still continues even after 12 months since the initial breach, the Scheme will be wound up after providing intimation of the same to the Unit holders with an exit option for a period of 30 days at the prevailing NAV without any exit load.

Under normal circumstances, the Scheme intends to invest at least 95% of its corpus in shares of Underlying Fund. However, subject to the SEBI Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary substantially depending upon the perception of the fund manager; the intention being at all times to seek to protect the interests of Unit holders. Such changes in investment pattern will be for short term and for defensive considerations only with the intention of protecting the interest of Unit holders. The fund manager will restore asset allocation in line with the asset allocation pattern within 30 days.

Rebalancing due to Passive Breaches:

Further, as per para 2.9 of SEBI Master Circular dated June 27, 2024, as may be amended from time to time, in the event of deviation from mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager shall rebalance the portfolio of the Scheme within 30 Business Days. In case the portfolio of the Scheme is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee of the AMC. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to sixty (60) Business Days from the date of completion of mandated rebalancing period. Further, in case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in para 2.9 of SEBI Master Circular dated June 27, 2024.

B. Where will the scheme invest?

The corpus of the Scheme will be invested in:

1. Shares issued by Invesco Pan European Equity Fund, an equity fund which invests primarily in equity securities of European companies with an emphasis on larger companies.
The Scheme may also invest in shares of other similar Overseas Mutual Fund with similar objectives, strategies and attributes.
2. Debt & Money Market Instruments
3. Units of debt/income schemes or liquid schemes of Invesco Mutual Fund.
4. Pending deployment of funds as per the investment objective of the Scheme, the funds may be parked in short term deposits of scheduled commercial banks, subject to guidelines and limits specified by SEBI.
5. Any other securities / instrument as permitted by SEBI/RBI from time to time.

Investment in overseas securities shall be made in accordance with the requirements stipulated by SEBI and RBI from time to time.

For details, refer **Section II**.

C. Investment Strategy

The Scheme is passively managed. The primary investment objective of Scheme is to generate capital appreciation by investing predominantly in units of Invesco Pan European Equity Fund, an overseas equity fund which invests primarily in equity securities of European companies with an emphasis on larger companies.

The Scheme may invest part of its corpus in debt and money market instruments or units of debt/income schemes or liquid funds of Invesco Mutual Fund.

RISK CONTROL

Risk is an inherent part of the investment function. Effective risk management is critical to fund management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objectives of the Scheme and provisions of SEBI regulations. AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. The risk control process involves identifying & measuring the risk through various risk measurement tools like but not limited to VAR, tracking error etc. Further AMC has implemented Bloomberg Asset and Investment Manager System as Front Office System (FOS) for managing risk. The system has inbuilt feature which enables the fund manager to calculate various risk ratios, average duration and analyze the same.

Portfolio Turnover

The Scheme, being an open-ended Scheme, it is expected that there would be a number of subscriptions and redemptions on a daily basis. The Scheme would be pre-dominantly investing in the shares of Underlying Fund. However, it is difficult to measure with reasonable accuracy the likely turnover in the portfolio of the Scheme.

D. Benchmark Index

Benchmark Index	Justification
MSCI Europe Index-Net Total Return	<p>As the Scheme will be predominantly investing in shares of Invesco Pan European Equity Fund and the reference index for Underlying Fund is MSCI Europe Index-Net Total Return, it is best suited index for the Scheme.</p> <p>The MSCI Europe Index captures large and mid cap representation across 15 Developed Markets (DM) countries in Europe. DM countries in Europe include: Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the UK. With 414 constituents, the index covers approximately 85% of the free float-adjusted market capitalization across the European Developed Markets equity universe.</p>

The Trustee / AMC reserve the right to change the benchmark for evaluation of performance of the Scheme from time to time in conformity with the investment objective and appropriateness of the benchmark subject to the SEBI Regulations and other prevailing guidelines.

Based on quarterly review, shortfall in value of investments, if any, shall be made good

within 7 days of such review. Further, the AMC may withdraw any excess investments than what is required pursuant to such quarterly review. PART III. OTHER DETAILS

A. Computation of NAV

The Net Asset Value (NAV) per Unit of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation day. The Mutual Fund will value its investments according to the principle of fair valuation as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI / AMFI from time to time.

The Net Assets Value (NAV) per unit of the Scheme shall be calculated by either of the following methods shown below:

$$\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Scheme's Investments} + \text{Current Assets including Accrued Income} - \text{Current Liabilities and Provisions}}{\text{No. of Units outstanding under Scheme on the Valuation Day}}$$

Or

$$\text{NAV (Rs.)} = \frac{\text{Unit Capital + Reserves and Surplus}}{\text{No. of Units outstanding under the Scheme on the Valuation Day}}$$

Illustration of Computation of NAV:

The computation of NAV per unit using various components is explained as follows:

Particulars	Amount in Rs.
Market or Fair Value of Scheme's Investments(A)	10,00,00,000.00
Add: Current Assets including Accrued Income(B)	75,34,345.00
Less: Current Liabilities and Provisions(C)	(30,00,000.00)
Net Assets (A+B-C)	10,45,34,345.00

No. of Units outstanding under Scheme on the Valuation Day: 1,00,00,000.

The NAV per unit will be computed as follows: $10,45,34,345.00 / 1,00,00,000 = \text{Rs. } 10.4534 \text{ p.u.}$ (rounded off to four decimals).

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI.

Methodology for calculation of sale and re-purchase price of the units:

- **Ongoing price for subscription (purchase) / switch-in (from other schemes/plans of the mutual fund) by investors.**

Purchase Price of Units is the price at which an investor can subscribe /purchase Units of the Scheme. During the continuous offer of the Scheme, the Units will be available at the Applicable NAV. Pursuant to para 10.4.1.a of SEBI Master Circular dated June 27, 2024, there is no entry load for purchase of Units of the Scheme. Accordingly, Purchase Price will be equal to Applicable NAV.

Example: The applicable NAV of the Scheme is Rs. 11.00 p.u. Since Entry load is not applicable, the sale / subscription price will be calculated as follows:

$$\begin{aligned} \text{Sale / Subscription Price} &= \text{Applicable NAV} \times (1 + \text{Entry Load}) \\ &= \text{Rs. } 11 \times (1 + 0) \\ &= \text{Rs. } 11.00 \times 1 \\ &= \text{Rs. } 11.00 \end{aligned}$$

The investors should also note that stamp duty at the applicable rate will be levied on applicable transactions i.e. purchase, switch-in, IDCW reinvestment, instalment of Systematic Investment Plan,

Systematic Transfer Plan. Accordingly, pursuant to levy of stamp duty, the number of units allotted will be lower to that extent. For more details & impact of stamp duty on number of units allotted, please refer SAI.

- **Ongoing price for redemption (sale) / switch outs (to other schemes/plans of the Mutual Fund) by investors**

Ongoing price for redemption /switch out (to other schemes/plans of the Mutual Fund) is price which a Unit holder will receive for redemption/switch-outs. During the continuous offer of the Scheme, the Unit holder can redeem the units at applicable NAV, subject to payment of Exit Load, if any. It will be calculated as follows:

Redemption Price = Applicable NAV*(1-Exit Load, if any)

Example 1: The applicable NAV of the Scheme is Rs. 11.00 p.u. If the applicable Exit Load at the time of investments is 1%, then the repurchase / redemption price will be calculated as follows:

$$\begin{aligned} &= \text{Rs. } 11.00 * (1 - 0.01) \\ &= \text{Rs. } 11.00 * 0.99 \\ &= \text{Rs. } 10.89 \end{aligned}$$

Example 2: The applicable NAV of the Scheme is Rs. 1100.00 p.u. If the applicable Exit Load at the time of investment is Nil, then the repurchase / redemption price will be calculated as follows:

$$\begin{aligned} \text{Repurchase / Redemption Price} &= \text{Applicable NAV} * (1 - \text{Exit Load}) \\ &= \text{Rs. } 11.00 * (1 - 0) \\ &= \text{Rs. } 11.00 * 1 \\ &= \text{Rs. } 11.00 \end{aligned}$$

The securities transaction tax levied under the Income-tax Act, 1961 at the applicable rate on the amount of redemption will be reduced from the amount of redemption.

Since the Scheme is not an equity scheme, Securities Transaction Tax (STT) is not applicable.

The Redemption / Repurchase Price will not be lower than 95% of the Applicable NAV.

B. New Fund Offer (NFO) Expenses

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid, marketing and advertising, registrar expenses, printing and stationery, bank charges etc.

*All fees and expenses charged in a Direct Plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under such heads in a Regular Plan. Commission and distribution expenses will not be charged to the Direct Plan. Further, Direct Plan under the scheme will have a separate NAV.

**For payment of Agents Commission, MF / AMC has adopted full trail model of commission without payment of any upfront commission or upfronting of any trail commission, directly or indirectly, in cash or kind, through sponsorships, or any other route. However, upfronting of trail commission will be allowed for inflows through Systematic Investment Plans (SIPs) from new investors, up to 1% payable yearly in advance, for a maximum period of three years subject to guidelines provided by SEBI, as amended from time to time. The upfront trail commission shall be paid from the books of the AMC and amortized on daily basis to the scheme over the period for which the payment has been made.

The expenses to the scheme can be charged as Investment Management and Advisory Fees under Regulation 52 (2) and the various sub-heads of recurring expenses mentioned under Regulation 52 (4) of SEBI (MF) Regulations. Thus, there shall be no internal sub-limits within the expense ratio for expense heads mentioned under Regulation 52 (2) and (4) respectively. Further, the additional expenses under Regulation 52(6A)(c) may be incurred either towards investment & advisory fees and/or towards other expense heads as stated above.

As the Scheme is an open ended Fund of Fund scheme, the total expenses of the Scheme including weighted average of charges levied by Underlying Fund shall not exceed 2.25% of the daily net assets of the Scheme (excluding additional expenses under regulation 52(6A)(c) and additional distribution expenses for gross inflows from specified cities).

Provided that the TER to be charged over and above the weighted average of the TER of the underlying scheme shall not exceed two times the weighted average of the TER levied by the underlying scheme, subject to overall ceiling as stated above.

In terms of Para 3.1 of SEBI Master circular dated June 27, 2024, investors are informed that they shall bear the recurring expenses of the Scheme in addition to expenses of the Underlying Fund in which the Scheme will make investment.

The purpose of the above table is to assist the investor in understanding various costs and expenses that an investor in the Scheme will bear directly or indirectly. These estimates have been made in good faith as per the information available with AMC based on past experience and are subject to change inter-se. The total recurring expenses that can be charged to the Scheme will be subject to limits prescribed from time to time under the SEBI (MF) Regulations.

In addition to TER within the limits specified under regulation 52 (6) of the Regulations, the AMC may charge expenses not exceeding 0.05% of daily net assets of the scheme as permitted under Regulation 52 (6A) (c), towards investment & advisory fees as specified under regulation 52(2) of the Regulations and/or towards recurring expenses as specified under 52(4) of the Regulations. **However, such additional expenses will not be charged if exit load is not levied / not applicable to the Scheme.**

Additional Distribution Expenses in case of new inflows from specified cities

In addition to TER as specified above, the AMC will charge expenses not exceeding 0.30% of daily net assets if the new inflows in the scheme from such cities, as specified by SEBI from time to time, are at least:

- (i) 30% of gross new inflows in the scheme, or;
- (ii) 15% of the average assets under management (year to date) of the scheme,

whichever is higher.

In case, inflows from such cities is less than the higher of (i) or (ii) of above, such expenses on daily net assets of Scheme will be charged on proportionate basis in accordance with para 10.1.3 of SEBI Master Circular dated June 27, 2024.

The additional expenses on account of inflows from such cities charged will be credited back to the Scheme in case the said inflows are redeemed within a period of one year from the date of investment.

The additional expenses charged in case of inflows from such cities will be utilized for distribution expenses incurred for bringing inflows from such cities.

The additional TER in terms of Regulation 52(6A)(b) of SEBI (Mutual Funds) Regulations, 1996 shall be charged upto 30 basis points on daily net assets of the scheme based on inflows only from retail investors beyond Top 30 cities (B 30 cities). Inflows of amount upto Rs. 2,00,000 per transaction by individual investors shall be considered as inflows from retail investors. Top 30 cities shall mean top 30 cities based on Association of Mutual Funds in India (AMFI) data on 'AUM by Geography - Consolidated Data for Mutual Fund Industry' as at the end of the previous financial year.

The additional commission for B 30 cities shall be paid as trail only.

Note: Pursuant to AMFI email dated March 2, 2023 with respect to keeping the B-30 incentive structure in abeyance, the AMC will not charge additional 30 bps on new inflows garnered from retail investors from B-30 cities till further notice.

The total expenses of the Scheme including the Investment Management and Advisory Fee shall not exceed the limits stated in Regulation 52 of the SEBI (MF) Regulations.

All Scheme related expenses including commission paid to distributors, by whatever name it may be called and in whatever manner it may be paid, shall necessarily be paid from the Scheme only within the regulatory limits and not from the books of the AMC, its Associate, Sponsor, Trustee or any other entity through any route.

However, expenses that are very small in value but high in volume may be paid out of AMC's books at actuals or not exceeding 2 bps of respective scheme AUM, whichever is lower. A list of such miscellaneous expenses will be as provided by AMFI in consultation with SEBI.

The Fund will update the current expense ratios on its website atleast three working days prior to the effective date of the change. The investors can refer to <https://www.invescomutualfund.com/about-us?tab=Statutory> for Total Expense Ratio (TER) details.

Additionally, the Fund will disclose the Total Expense Ratio (TER) of the Scheme on daily basis on the website of AMFI (www.amfiindia.com).

Further, any change in the base TER (i.e. TER excluding additional expenses provided in Regulation 52 (6A) (b) and 52 (6A) (c) of SEBI (Mutual Funds) Regulations, 1996 and Goods & Services Tax on investment and advisory fees) in comparison to previous base TER charged to the Scheme/Plan shall be communicated to investors of the Scheme/Plan through notice via email or SMS and will be uploaded on the website (<https://www.invescomutualfund.com/about-us?tab=Statutory>) at least three working days prior to effecting such change.

The AMC has not entered into any revenue sharing arrangement with Underlying Fund in any manner and shall not receive any revenue by whatever means/head from the Underlying Fund. Any commission or brokerage received from Underlying Fund shall be credited into the respective Scheme's account.

Illustration of impact of expense ratio on Scheme's returns is as follows:

Particulars	Regular Plan	Direct Plan

Annualized Gross Return (Assumed)	10.00%	10.00%

B. Risk Factors

• Scheme specific risk factors

Risk Factors of a Fund of Funds Scheme

- The Scheme will invest primarily in Underlying Fund and the performance of the Scheme will predominantly depend upon the performance of Underlying Fund.
- Any change in the investment policies or fundamental attributes of Underlying Fund may affect the performance of the Scheme.
- Investments in Underlying Fund, which is an equity fund, will have all the risks associated with investments in equity and offshore markets.
- Portfolio disclosure of the Scheme will be largely limited to units of Underlying Fund and investments by the Scheme in money market instruments. Therefore, Unit holders may not be able to obtain specific details of the Scheme in respect of portfolio of Underlying Fund.
- In addition to recurring expenses of the Scheme, the Unit holders shall also bear the applicable expenses of Underlying Fund. Therefore, the returns that the Unit holder of the Scheme may receive shall be substantially impacted or may, at times, be lower than the returns that a Unit holder could obtain by directly investing in Underlying Fund.

Risks associated with investing in Overseas Mutual Fund Units

- Within the investment objective of the Scheme, the Scheme will be investing in overseas markets (i.e. in units of Underlying Fund). As the units of Underlying Fund are denominated in foreign currency, the value of those investments, distributions, income and net assets when converted to Indian Rupee (INR) may fluctuate due to changes in exchange rate of base currency of Underlying Fund vis-à-vis INR. Investments in overseas markets carry risks related to fluctuations in foreign exchange rates, nature of securities market of the country, restrictions on repatriation of capital due to exchange controls and the political environment.
- Further the repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances. The Scheme's NAV may also be affected by a fluctuation in the general and specific level of interest rates internationally or change in credit profiles of the issuer.
- The liquidity of the Scheme will be affected if there is a non-Business Day of Underlying Fund. The Scheme shall have non-Business Day on all the days on which Underlying Fund has non-Business Day.
- In case of unforeseen events like system breakdown, natural calamities etc. which could delay NAV of Underlying Fund, NAV of the Scheme may also be delayed and the AMC shall suitably intimate AMFI / SEBI in this regard.
- In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilisation of overseas financial assets and prevalent tax laws of the respective jurisdictions for the execution of trades or otherwise.
- As the Scheme invests in overseas securities, the Scheme is subject to limits prescribed by SEBI from time to time for investment in overseas securities. If on any day the maximum limit for investment in overseas securities is reached, then the investor may get pro-rata allotment or his application may be rejected in total. In such an event, applicant's money relating to unused portion of original allotment request will be refunded to investors, subject to SEBI Regulations. Please refer the details under the heading 'Monitoring Limits on Investments in Overseas Securities' in section 'Information About the Scheme'.

The performance of Underlying Fund will be affected by a number of risk factors including the following:

Risk associated with Equity and Equity Related Instruments

Equity and Equity Related Instruments by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of Equity and Equity Related Instruments may fluctuate due to factors affecting the securities markets such as volume and volatility in the capital markets, interest rates, currency exchange

rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, general decline in the global markets, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAVs of units issued under Underlying Fund and in turn of the Scheme may be adversely affected.

Further, the Equity and Equity Related Instruments are risk capital and are subordinate in the right of payment to other securities including debt securities.

Equity and Equity Related Instruments listed on the stock exchange carry lower liquidity risk; however Underlying Fund's ability to sell these investments is limited by overall trading volumes on the stock exchanges. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of Underlying Fund to make intended securities purchases due to settlement problems could cause Underlying Fund to miss certain investment opportunities. Similarly, the inability to sell securities held in Underlying Fund portfolio may result, at times, in potential losses to Underlying Fund, should there be a subsequent decline in the value of securities held in Underlying Fund's portfolio.

Underlying Fund may invest upto 10% of its net assets in securities which are not listed on the stock exchanges. These securities may be illiquid in nature and carry a higher amount of liquidity risk, in comparison to securities that are listed on the stock exchanges or offer other exit options to the investor. The liquidity and valuation of Underlying Fund's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Currency Risk

- Underlying Fund's assets may be invested in securities denominated in currencies other than the base currency of Underlying Fund and any income from these investments will be received in those currencies. The performance of Underlying Fund may therefore be affected by movements in the exchange rate between the currencies the assets are held and the base currency of Underlying Fund and hence there can be the prospect of additional gain or loss for the Unit holder than what may be normally derived from the assets in which Underlying Fund invests. The performance of Underlying Fund may also be affected by change in exchange control regulations.
- Conversion into foreign currency or transfer of proceeds received from the sale of securities cannot be guaranteed.
- Exchange rate fluctuations may also occur between the trade date for a transaction and the date on which the currency is acquired to meet settlement obligations.
- Movements in currency can adversely affect the return on your investments. The currency hedging that may be used to minimise the effect of currency movements may not be always successful.

Political and Economic Risks

- Economic and/or political instability could lead to legal, fiscal and regulatory changes or the reversal of legal/fiscal/regulatory/market reforms. Assets could be compulsorily re-acquired without adequate compensation.
- Administrative risks may result in the imposition of restrictions on free movement of capital.
- A country's external debt position could lead to sudden imposition of taxes or exchange controls.
- High interest and inflation rates can mean that businesses have difficulty in obtaining working capital.
- Local management may be inexperienced in operating companies in free market conditions.
- A country may be heavily dependent on its commodity and natural resource exports and is therefore vulnerable to weaknesses in world prices for these products.

Legal Environment

- The interpretation and application of decrees and legislative acts can be often contradictory and uncertain particularly in respect of matters relating to taxation.
- Legislation could be imposed retrospectively or may be issued in the form of internal regulations not generally available to the public.
- Judicial independence and political neutrality cannot be guaranteed.
- State bodies and judges may not adhere to the requirements of law and relevant contract. There is no certainty that Unit holders will be compensated in full or at all for any damages incurred.
- Recourse through the legal system may be lengthy and protracted.
- In certain circumstances, Underlying Fund or certain share classes of Underlying Fund may be liquidated or merged which are detailed in the prospectus of Underlying Fund. In such cases, the costs and expenses of any such liquidation or merger may be borne by Underlying Fund or share class of Underlying Fund up to

the limit specified in the prospectus of Underlying Fund. Any unamortized costs resulting from closure may be charged as an expense in full against the assets of Underlying Fund. In such a case, the amount distributed to shareholders of Underlying Fund (including the Scheme) may be less than their original investment.

- In certain circumstances as specified in the prospectus of Underlying Fund, the right of investors of Underlying Fund (including the Scheme) to redeem their units may be suspended.
- Underlying Fund is governed by European Union legislation, specifically EU Council Directive 2009/65/EC of July 13, 2009 on Co-ordination of Laws, Regulations Administrative Provisions relating to Undertaking for Collective Investments in Transferable Securities and is Luxembourg domiciled. The regulatory protections provided by their local regulatory authorities may differ or may not apply.

Accounting Practices

- The accounting, auditing and financial reporting system may not accord with international standards.
- Even when reports have been brought into line with international standards, they may not always contain correct information.
- Obligations on companies to publish financial information may also be limited.

Shareholder Risk

- Existing legislation may not yet be adequately developed to protect the rights of minority shareholders.
- There is generally no concept of any fiduciary duty to shareholders on the part of management.
- Liability for violation of what shareholder rights of Underlying Fund there are, may be limited.

Market and Settlement Risks

- Lack of liquidity may adversely affect the ease of disposal of assets. The absence of reliable pricing information in a particular security held by Underlying Fund may make it difficult to assess reliably the market value of assets.
- The share register of Underlying Fund may not be properly maintained and the ownership or interest may not be (or remain) fully protected.
- Registration of securities may be subject to delay and during the period of delay it may be difficult to prove beneficial ownership of securities.
- The provision for custody of assets may be less developed than in other more mature markets and thus poses an additional level of risk for Underlying Fund.
- Settlement procedures may be less developed and still be in physical as well as in dematerialised form.

Other risk associated with Underlying Fund

- The investors will be exposed to the risk of global markets arising out of investment by Underlying Fund in securities which are denominated in foreign currencies. These markets and/or assets may act with more or less volatility than the core investments and performance will, in part, be dependent on these investments. All investments involve risks and there can be no guarantee against loss resulting from an investment in any share of Underlying Fund, nor can there be any assurance that Underlying Fund's investment objectives will be attained in respect of its overall performance. In certain circumstances, the right of investors of Underlying Fund may be suspended.
- The value of assets of Underlying Fund may be affected by uncertainties such as changes in government policies, taxation, fluctuations in foreign exchange rates, the imposition of currency repatriation restrictions, social and religious instability, political, economic or other developments in the law or regulations of countries in which Underlying Fund may invest and, in particular, by changes in legislation relating to level of foreign ownership in countries in which Underlying Fund may invest.
- Accounting, auditing and financial reporting standards, practices and disclosure requirements applicable to some countries in which Underlying Fund may invest may differ from those applicable in India or Luxembourg that less information is available to investors and such information may be out of date.

Taxation

- Investors should note in particular that the proceeds from the sale of securities in some markets or the receipt of any dividends and other income may be or may become subject to tax, levies, duties or other fees or charges imposed by the authorities in that market, including taxation levied by withholding at source. As a result, Underlying Fund (and therefore the Scheme) could become subject to additional taxation in such countries that is not anticipated either at the date of this SID or when investments are made, valued or disposed of.
- Prospective investors should note that there may be additional taxes, charges or levies applied in respect of the Scheme's investment in Underlying Fund depending on the location of assets of Underlying Fund and

the jurisdiction in which Underlying Fund is located, registered or operated. Investors should also note that Underlying Fund's investment managers and the Scheme's ability to provide tax information and audited accounts in respect of Underlying Fund to Unit holders of the Scheme is dependent on relevant tax and other information being provided by Underlying Fund in timely fashion. Accordingly, delays may occur in respect of delivery of such information to the Scheme's Unit Holders.

Hedging Risk

The investment manager of Underlying Fund is permitted, but not obliged, to use hedging techniques to attempt to offset market and currency risks. There is no guarantee that hedging techniques will achieve the desired result.

Risks Associated with Derivatives

- Underlying Fund may use derivatives in connection with its investment strategies. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the investment manager of Underlying Fund to identify such opportunities. Identification and execution of strategies to be pursued by the investment manager of Underlying Fund involve uncertainty and decision of the investment manager of Underlying Fund may not always be profitable. No assurance can be given that the investment manager of Underlying Fund will be able to identify or execute such strategies.
- The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments. Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic or market conditions than other types of investments and could result in losses that significantly exceed Underlying Fund's original investment. Certain derivatives may give rise to a form of leverage. Due to low margin deposits normally required in trading financial derivative instruments, an extremely high degree of leverage is typical for trading in financial derivative instruments. As a result, Underlying Fund may be more volatile than if Underlying Fund had not been leveraged because the leverage tends to exaggerate the effect of any increase or decrease in the value of Underlying Fund's portfolio. A relatively small price movement in a derivative contract may result in substantial losses to the investor.
- Derivatives are also subject to risk that changes in value of a derivative may not correlate perfectly with the underlying asset, rate or index. The use of derivatives for hedging or risk management purposes or to increase income or gain may not be successful, resulting in losses to Underlying Fund and cost of such strategies may reduce Underlying Fund's returns and increase Underlying Fund's potential for loss.
- Underlying Fund may use derivatives to hedge market and currency risk and for the purposes of efficient portfolio management. The use of derivatives may expose Underlying Fund to a higher degree of risk. In particular, derivative contracts can be highly volatile and the amount of initial margin is generally small relative to size of contract so that transactions are geared.
- Underlying Fund may take short positions on a security through the use of financial derivative instruments in the expectation that their value will fall in the open market. The possible loss from taking a short position on a security differs from the loss that could be incurred from a cash investment in the security, the former may be unlimited as there is no restriction on the price to which a security may rise, whereas the latter cannot exceed the total amount of the cash investment. The short selling of investments may also be subject to changes in regulations, which could impose restrictions that could adversely impact returns to investors.

Right of Exchange to Suspend Trading in Securities listed

The securities exchange on which shares of Underlying Fund may be listed may have right to suspend or limit trading in all securities which it lists. Such suspension would expose Underlying Fund to losses and delays in its ability to redeem shares of Underlying Fund.

Dividends

Underlying Fund may distribute not only investment income but also realised and unrealized capital gains or capital. Where capital is distributed, this will result in a corresponding reduction in the value of shares of Underlying Fund.

Warrants

Underlying Fund may invest in warrants and the value of these warrants is likely to fluctuate more than the prices of underlying securities because of greater volatility of warrant prices.

Futures and Options

Underlying Fund may use options and futures on securities, indices and interest rates for the purpose of efficient portfolio management. Transactions in futures and options carry a high degree of risk. A relatively small market movement will have a proportionately larger impact which may work for or against the investor. The placing of

certain orders which are intended to limit losses to certain amounts may not be effective because market conditions may make it impossible to execute such orders.

Listing

In case the shares of Underlying Fund are listed, the exchanges on which those shares are listed will have no responsibility for contents of any prospectus issued by Underlying Fund or will make no representations as to its accuracy or completeness and expressly disclaim any liability whatsoever for any kind of loss arising from or in reliance upon any part of any such prospectus.

For additional risk factors of Underlying Fund, investors are requested to refer to the offering document or the website (www.invesco.com) of Underlying Fund.

Risk associated with Debt and Money Market Instruments:

- Investment in debt and Money Market Instruments would have credit risk. Credit risk or default risk refers to the risk that the issuer of a fixed income security may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of security may be affected because of change in the credit rating of issuer/instrument and the price of security goes down if the credit rating agency downgrades the rating of the issuer. In case of T-Bills, there is minimal credit risk to that extent.
- Debt and Money Market Instruments also have liquidity or marketability risk. This refers to the ease with which a security can be sold at or near to its valuation, i.e. yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between bid price and offer price quoted by a dealer.
- The NAV of the Units, to the extent the corpus of the Scheme is invested in debt and Money Market Instruments, will be affected by changes in the level of interest rates. When interest rate in the market rise, the value of a portfolio of debt and Money Market Instruments can be expected to decline. The extent of rise or fall in the price is a function of existing coupon, days to maturity, increase or decrease in level of interest, credit quality, demand and supply.
- Investments in debt securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the debt security. Consequently, the proceeds may get invested at a lower rate.
- Securities which are not quoted on the Stock Exchange(s) may be illiquid and can carry higher liquidity risk in comparison with securities which are listed on the Stock Exchange(s) and offer exit option to the investor including put option. The Scheme would invest in the securities which are not listed but offer attractive yields. This may however increase the risk of the portfolio.

Risk Factor associated with investing in Securities Segment and Tri-party Repo trade settlement

Clearing Corporation of India Ltd. ('CCIL') is providing clearing and settlement services, for Triparty Repo trades in Government Securities, under its Securities Segment. CCIL would act as a Central Counterparty to all the borrow and lend Triparty Repo trades received by it for settlement. CCIL would also be performing the role responsibilities of Triparty Repo Agent, in terms of Repurchase transactions (Repo) (Reserve Bank) Directions, 2018 as amended from time to time. CCIL would settle the Triparty Repo trades, in terms of its Securities Segment Regulations.

The funds settlement of members is achieved by multilateral netting of the funds position in Triparty Repo with the funds position in Outright and Market Repo and settling in the books of RBI for members who maintain an RBI Current Account. In respect of other members, funds settlement is achieved in the books of Settlement Bank. Securities settlement for Triparty Repo trades shall be achieved in the Gilt Account of the Member maintained with CCIL. Securities obligation for outright and market repo trades shall be settled in the SGL / CSGL account of the Member with RBI.

Invesco Mutual Fund is a member of securities segment and Tri-party Repo trade settlement of the CCIL. Since all transactions of the Fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL, it reduces the settlement and counterparty risks considerably for transactions in the said segments.

To mitigate the potential losses arising in case any member defaults in settling the transactions routed through CCIL, CCIL maintains a Default Fund. CCIL shall maintain two separate Default Funds in respect of its securities segment, one to meet the losses arising out of any default by its members from outright and repo trades and other for meeting losses arising out of any default by its members from Triparty Repo trades.

In case any clearing member fails to honor his settlement obligations, the Default Fund is utilized to complete the settlement applying the Default Waterfall Sequence. As per the said waterfall mechanism, after the defaulter's

margins and defaulter's contribution to default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution, if there is still a loss to be met, then contribution of non-defaulting members to Default Fund is utilized to meet the said loss.

The Scheme is subject to the risk of losing initial margin and contribution to Default Fund in the event of failure of any settlement obligation. Further the Scheme's contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

Further, CCIL periodically prescribes a list of securities eligible for contribution as collaterals by members. Presently, all Central Government Securities and Treasury Bills are accepted as collaterals by CCIL. The above risk factor may undergo a change in case the CCIL notifies securities other than Government of India Securities as eligible for contributions as collateral.

Risks associated with segregated portfolio

- a) Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.
- b) Security(ies) held in segregated portfolio may not realize any value.
- c) Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

C. Risk Mitigation Strategies

Type of Risk	Risk Mitigation Measures
Concentration Risk	As the Scheme will predominantly invest in units of Underlying Fund, the Scheme carries concentration risk. However, Underlying Fund will have diversified portfolio comprising of equity securities of European companies and concentration risk to that extent is minimized.
Currency Risk	As the Scheme will be predominantly investing in overseas mutual fund, the Scheme will be exposed to fluctuations in currency of Underlying Fund vis-à-vis INR. As per the current regulations, the Scheme is not allowed to use currency derivatives to hedge against currency risk and hence currency risk would be inherent risk of the Scheme.
Liquidity Risk	Underlying Fund in which the Scheme will invest is an open ended scheme which provides for subscription and redemption on all Business Days. Further the Scheme will maintain some % of its net assets to meet liquidity requirements for the purpose of repurchase or redemptions.
