Point 67 of Policy Related emails issued by SEBI Master Circular dated June 27, 2024 has clarified that Cash Equivalent shall consist of Government Securities, T-Bills and Repo on Government Securities.

In case of change in the constituents of Nifty 50 due to periodic review, the portfolio of the Scheme will be rebalanced within 7 calendar days. Further, any transactions undertaken by the Scheme in order to meet the redemption and subscription obligations will be done such that post such transactions, replication of the portfolio of the Scheme with Nifty 50 index is maintained at all times.

B. Where will the scheme invest?

The corpus of the Scheme will be invested in:

1. Securities which are constituents of Nifty 50 in the same proportion as in underlying Index.
2. Equity Derivatives
3. Debt and Money Market Instrument
4. Debt Derivative Instrument

7. Pending deployment of funds as per the investment objective of the Scheme, the funds may be parked in short term deposits of scheduled commercial banks, subject to guidelines and limits specified by SEBI.

For details, refer Section II.

C. Investment Strategy

The Scheme will follow a passive investment strategy and will invest in companies which are constituents of Nifty 50 in the same weights as in the Index with an endeavor to track the benchmark index with as low tracking error as possible. The Scheme may, for a temporary period, take exposure to derivatives of the index or its constituent stocks when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions and when it makes economic benefit for the Scheme. The Scheme in order to meet liquidity and expense requirements may also invest in debt and money market instruments.

Tracking Error

The Tracking Error based on past one year rolling data shall not exceed 2%. In case the tracking error of the Scheme exceeds 2% due to unavoidable circumstances in the nature of force majeure which are beyond the control of the AMC, then the same will be brought to the notice of the Trustees with the corrective action by the AMC.

Risk Control

Risk is an inherent part of the investment function. Effective risk management is critical to fund management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objectives of the Scheme and provisions of SEBI regulations. AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. The risk control process involves identifying & measuring the risk through various risk measurement tools like but not limited to VAR, tracking error etc. Further AMC has implemented Bloomberg Portfolio Management System as Front Office System (FOS) for managing risk. The system has inbuilt feature which enables the fund manager to calculate various risk ratios, average duration and analyze the same.

Portfolio Turnover

The Scheme is a passively managed Scheme and the Fund Manager will generally follow fully invested approach. The Scheme being an open ended scheme, it is expected that there would be a number of subscriptions and redemptions on a daily basis by Market Maker and Large Investors. Generally, portfolio turnover would depend upon rebalancing of the portfolio due to change in composition of underlying Index

(as a result of maintenance of Index by NSE Indices) or due to corporate actions in the constituents of Nifty 50 Index. The fund manager will endeavour to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. However, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio of the Scheme.

D. Benchmark Index

Benchmark Index	Justification

The Net Asset Value (NAV) per Unit of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation day. The Mutual Fund will value its investments according to the principle of fair valuation as specified in Schedule VIII of the SEBI (MF) Regulations or such norms as may be specified by SEBI / AMFI from time to time.

The Net Assets Value (NAV) per unit Units of the Scheme shall be calculated by either of the following methods shown below:

$$\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Scheme's Investments} + \text{Current Assets including Accrued Income} - \text{Current Liabilities and Provisions}}{\text{No. of Units outstanding under Scheme on the Valuation Day}}$$

Or

$$\text{NAV (Rs.)} = \frac{\text{Unit Capital + Reserves and Surplus}}{\text{No. of Units outstanding under the Scheme on the Valuation Day}}$$

Illustration of Computation of NAV:

The computation of NAV per unit using various components is explained as follows:

Particulars	Amount in Rs.
Market or Fair Value of Scheme's Investments(A)	10,00,00,000.00
Add: Current Assets including Accrued Income(B)	75,34,345.00
Less: Current Liabilities and Provisions(C)	(30,00,000.00)
Net Assets (A+B-C)	10,45,34,345.00

No. of Units outstanding under Scheme on the Valuation Day: 1,00,00,000.

The NAV per unit will be computed as follows: 10,45,34,345.00 / 1,00,00,000 = Rs. 10.4534 p.u. (rounded off to four decimals).

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI.

Methodology for calculation of sale and re-purchase price of the units:

I. Ongoing price for subscription (purchase) / redemption by investors

Units of the Scheme in less than Creation Units size cannot be purchased from/redeemed directly with the Fund and can be purchased/ sold only on the Stock Exchange(s) where the Units are listed. However, Large Investors can subscribe / redeem directly with AMC for the amount greater than Rs. 25 Crores. However, pursuant to para 3.6.2.2 of SEBI Master Circular for Mutual Funds dated June 27, 2024 and SEBI letter dated October 29, 2024, the following investors can continue to subscribe / redeem units of the Schemes directly with the AMC in multiples of Creation Unit Size till February 28, 2025.

1. Schemes managed by Employee Provident Fund Organisation, India and
2. Recognised Provident Funds, approved gratuity funds and approved superannuation funds under Income tax act, 1961.

From March 1, 2025 or such other date as may be prescribed by SEBI from time to time, the above investors can subscribe / redeem units of the Schemes directly with AMC only for amount greater than Rs. 25 Crores.

Ongoing price for subscription by Market Maker and Large Investors will be at Applicable NAV and redemption will be at Applicable NAV minus applicable Exit Load, if any.

Sale / Subscription Price:

Purchase Price = Applicable NAV

Example: The applicable NAV of the Scheme is Rs. 11.00 p.u. Since Entry load is not applicable, the sale / subscription price will be calculated as follows:

Sale / Subscription Price = Applicable NAV*(1+ Entry Load)

$$\begin{aligned} &= \text{Rs. } 11*(1+0) \\ &= \text{Rs. } 11.00*1 \\ &= \text{Rs. } 11.00 \end{aligned}$$

Further, for subscription / redemption by the Market Maker and large investors directly with the Fund / AMC for cash, Intra-Day NAV will be applicable.

The investors should also note that stamp duty at the applicable rate will be levied on applicable transactions i.e. purchase, switch-in, IDCW reinvestment, instalment of Systematic Investment Plan, Systematic Transfer Plan. Accordingly, pursuant to levy of stamp duty, the number of units allotted will be lower to that extent. For more details & impact of stamp duty on number of units allotted, please refer SAI.

Repurchase / Redemption Price

Redemption Price = Applicable NAV*(1-Exit Load, if any)

Example 1: The applicable NAV of the Scheme is Rs. 11.00 p.u. If the applicable Exit Load at the time of investments is 1%, then the repurchase / redemption price will be calculated as follows:

Repurchase / Redemption Price = Applicable NAV*(1-Exit Load)

$$\begin{aligned} &= \text{Rs. } 11.00*(1-0.01) \\ &= \text{Rs. } 11.00*0.99 \\ &= \text{Rs. } 10.89 \end{aligned}$$

Example 2: The applicable NAV of the Scheme is Rs. 11.00 p.u. If the applicable Exit Load at the time of investment is Nil, then the repurchase / redemption price will be calculated as follows:

Repurchase / Redemption Price = Applicable NAV*(1-Exit Load)

$$\begin{aligned} &= \text{Rs. } 11.00*(1-0) \\ &= \text{Rs. } 11.00*1 \\ &= \text{Rs. } 11.00 \end{aligned}$$

**Goods & Services Tax on investment and advisory fees will be in addition to maximum limit as mentioned above.

The expenses to the scheme can be charged as Investment Management and Advisory Fees under Regulation 52 (2) and the various sub-heads of recurring expenses mentioned under Regulation 52 (4) of SEBI (MF) Regulations. Thus, there shall be no internal sub-limits within the expense ratio for expense heads mentioned under Regulation 52 (2) and (4) respectively. Further, the additional expenses under Regulation 52(6A)(c) shall also be incurred towards any of these expense heads.

The purpose of the above table is to assist the investor in understanding various costs and expenses that an investor in the Scheme will bear directly or indirectly. These estimates have been made in good faith as per the information available with AMC based on past experience and are subject to change inter-se. The total recurring expenses that can be charged to the Scheme will be subject to limits prescribed from time to time under the SEBI (MF) Regulations.

Annual recurring expenses including investment management and advisory fees that can be charged to the Scheme shall be subject to limit prescribed by Regulation 52 of the SEBI Regulations, as amended from time to time, which is presently 1.00% of daily net assets of the Scheme.

In addition to TER within the limits specified under regulation 52 (6) of the Regulations, the AMC may charge expenses not exceeding 0.05% of daily net assets of the scheme as permitted under Regulation 52 (6A) (c), towards investment & advisory fees as specified under regulation 52(2) of the Regulations and/or towards recurring expenses as specified under 52(4) of the Regulations. **However, such additional expenses will not be charged if exit load is not levied / not applicable to the Scheme.**

Additional Distribution Expenses in case of new inflows from specified cities

In addition to total expenses ratio (TER) as specified above, the AMC will charge expenses not exceeding 0.30% of daily net assets if the new inflows in the scheme from such cities, as specified by SEBI from time to time, are at least:

- (i) 30% of gross new inflows in the scheme, or;
- (ii) 15% of the average assets under management (year to date) of the scheme,

whichever is higher.

In case, inflows from such cities is less than the higher of (i) or (ii) of above, such expenses on daily net assets of scheme will be charged on proportionate basis in accordance with para 10.1.3 of SEBI Master Circular dated June 27, 2024.

The additional expenses on account of inflows from such cities charged will be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment.

The additional expenses charged in case of inflows from such cities will be utilized for distribution expenses incurred for bringing inflows from such cities.

The additional TER in terms of Regulation 52(6A)(b) of SEBI (Mutual Funds) Regulations, 1996 shall be charged upto 30 basis points on daily net assets of the scheme based on inflows only from retail investors beyond Top 30 cities (B 30 cities). Inflows of amount upto Rs. 2,00,000 per transaction by individual investors shall be considered as inflows from retail investors. Top 30 cities shall mean top 30 cities based on Association of Mutual Funds in India (AMFI) data on 'AUM by Geography - Consolidated Data for Mutual Fund Industry' as at the end of the previous financial year.

The additional commission for B 30 cities shall be paid as trail only.

Note: Pursuant to AMFI email dated March 2, 2023 with respect to keeping the B-30 incentive structure in abeyance, the AMC will not charge additional 30 bps on new inflows garnered from retail investors from B-30 cities till further notice.

All Scheme related expenses including commission paid to distributors, by whatever name it may be called and in whatever manner it may be paid, shall necessarily be paid from the Scheme only within the regulatory limits and not from the books of the AMC, its Associate, Sponsor, Trustee or any other entity through any route.

However, expenses that are very small in value but high in volume may be paid out of AMC's books at actuals or not exceeding 2 bps of respective Scheme AUM, whichever is lower. A list of such miscellaneous expenses will be as provided by AMFI in consultation with SEBI.

The Fund will update the current expense ratios on its website atleast three working days prior to the effective date of the change. The investors can refer to <https://www.invescomutualfund.com/about-us?tab=Statutory> for Total Expense Ratio (TER) details.

Additionally, the Fund will disclose the Total Expense Ratio (TER) of the Scheme on daily basis on the website of AMFI (www.amfiindia.com).

Further, any change in the base TER (i.e. TER excluding additional expenses provided in Regulation 52 (6A) (b) and 52 (6A) (c) of SEBI (Mutual Funds) Regulations, 1996 and Goods & Services Tax on investment and advisory fees) in comparison to previous base TER charged to the Scheme/Plan shall be communicated to investors of the Scheme/Plan through notice via email or SMS and will be uploaded on the website (<https://www.invescomutualfund.com/about-us?tab=Statutory>) at least three working days prior to effecting such change.

Illustration of impact of expense ratio on Scheme's returns is as follows:

Investment Value (Rs.)	10,00,000.00
Annualized Gross Return (Assumed)	10.00
Annual Recurring Expenses (Rs.)	1.00
Gross Appreciation for the day @ 10% (Rs.)	273.97

Expense Amount for the day @ 1% (Rs.)	27.40
Net Appreciation for the day (Rs.)	246.57
Return (Net OF Expenses) for the day in % (Annualized)	9.00

Note: The above is just an illustration to explain the impact of the expense ratio on the performance of the Scheme. The actual returns generated by the Scheme will change from time to time.

D. Load Structure

Exit Load is an amount which is paid by the investor to redeem the Units from the Scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (www.invescomutualfund.com) or you may call at 1800 209 0007 (toll-free) or you can contact your distributor.

Type of Load	Load chargeable (as % of NAV)
Exit Load [^]	Nil

[^]Exit Load charged, if any, will be credited back to the scheme, net of Goods & Services Tax.

However, in case of the following scenarios Investors can directly approach the AMC for redemption of units of ETFs for transaction of upto Rs. 25 crores without payment of any exit load:

- Traded price (closing price) of the units of the Scheme is at discount of more than 1% to the day end NAV for 7 continuous trading days, or
- No quotes for the Scheme are available on NSE for 3 consecutive trading days, or
- Total bid size on the exchange is less than half of creation units size daily, averaged over a period of 7 consecutive trading days.

The intimation of the same will be displayed on our website (www.invescomutualfund.com).

The investor is requested to check the prevailing Load structure of the Scheme before investing. Investors may refer to the current applicable Load structure by referring to the SID or the AMC website or by calling at 1800 209 0007 (toll-free).

Under the Scheme, the AMC reserves the right to introduce / modify the Load depending upon the circumstances prevailing at that time subject to maximum limits as prescribed under the SEBI Regulations. The Load may also be changed from time to time and may be linked to the period of holding.

The Redemption / Repurchase Price shall not be lower than 95% of the Applicable NAV.

Any imposition or enhancement of Load in future shall be applicable on prospective investments only. At the time of changing the Load Structure:

- The addendum detailing the changes will be displayed on the Website of the Fund (www.invescomutualfund.com).
- The addendum detailing the changes will be attached to SID and Key Information Memorandum. The addendum will be circulated to all the distributors / brokers so that the same can be attached to all SIDs and Key Information Memorandum already in stock.
- Arrangements will be made to display the addendum in the form of a notice in all the Investor Service Centres and distributors / brokers office.
- The introduction of the exit load along with the details will be stamped in the acknowledgement slip issued to the investors on submission of the application form and will also be disclosed in the accounts statement issued after the introduction of such load.
- Any other measure which the Mutual Fund may consider necessary.

B. Risk Factors

- **Scheme specific risk factors:**

- **Risk associated with Equity and Equity Related Instruments:**

Equity and Equity Related Instruments by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of Equity and Equity Related Instruments may fluctuate due to factors affecting the securities markets such as volume and volatility in the capital markets, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAV of the Units issued under the Scheme may be adversely affected.

Further, the Equity and Equity Related Instruments are risk capital and are subordinate in the right of payment to other securities including debt securities.

Equity and Equity Related Instruments listed on the stock exchange carry lower liquidity risk, however, the Scheme's ability to sell these investments is limited by the overall trading volume on the stock exchanges. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio may result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio.

The Scheme would invest in the securities which are constituents of underlying Index in the same proportion as the securities have in the underlying Index. Hence, the risk associated with the corresponding underlying Index would be applicable to the Scheme.

- **Risk associated with Fixed Income and Money Market Instruments:**

Interest - Rate Risk

Fixed Income and Money Market Instruments run interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rate falls, the prices increase. The extent of rise or fall in the price is a function of existing coupon, days to maturity, increase or decrease in the level of interest, credit quality, demand and supply. However, in case of Government securities since credit risk remains zero, their prices are influenced by the movement in interest rates in the financial system.

Credit Risk

Credit risk or default risk refers to the risk that the issuer of a fixed income security may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may be affected because of change in the credit rating of the issuer/instrument and the price of a security goes down if the credit rating agency downgrades the rating of the issuer. In case of Government securities, there is minimal credit risk to that extent.

Liquidity or Marketability Risk

This refers to the ease with which a security can be sold at or near to its valuation i.e. yield-to maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer.

Securities which are not quoted on the stock exchange(s) may be illiquid and can carry higher liquidity risk in comparison with securities which are listed on the stock exchange(s) and offer exit option to the investor including put option.

Re-investment Risk

This refers to the interest rate risk at which the intermediate cash flows received from the securities in the Scheme including maturity proceeds are reinvested. Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the debt security. Consequently, the proceeds may get invested at a lower rate.

- **Risk Factor associated with investing in Securities Segment and Tri-party Repo trade settlement**

Clearing Corporation of India Ltd. ('CCIL') is providing clearing and settlement services, for Triparty Repo trades in Government Securities, under its Securities Segment. CCIL would act as a Central Counterparty to all the borrow and lend Triparty Repo trades received by it for settlement. CCIL would also be performing the role responsibilities of Triparty Repo Agent, in terms of Repurchase transactions (Repo) (Reserve Bank) Directions, 2018 as amended from time to time. CCIL would settle the Triparty Repo trades, in terms of its Securities Segment Regulations.

The funds settlement of members is achieved by multilateral netting of the funds position in Triparty Repo with the funds position in Outright and Market Repo and settling in the books of RBI for members who maintain an RBI Current Account. In respect of other members, funds settlement is achieved in the books of Settlement Bank. Securities settlement for Triparty Repo trades shall be achieved in the Gilt Account of the Member maintained with CCIL. Securities obligation for outright and market repo trades shall be settled in the SGL / CSGL account of the Member with RBI.

Invesco Mutual Fund is a member of securities segment and Tri-party Repo trade settlement of the CCIL. Since all transactions of the Fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL, it reduces the settlement and counterparty risks considerably for transactions in the said segments.

To mitigate the potential losses arising in case any member defaults in settling the transactions routed through CCIL, CCIL maintains a Default Fund. CCIL shall maintain two separate Default Funds in respect of its securities segment, one to meet the losses arising out of any default by its members from outright and repo trades and other for meeting losses arising out of any default by its members from Triparty Repo trades.

In case any clearing member fails to honor his settlement obligations, the Default Fund is utilized to complete the settlement applying the Default Waterfall Sequence. As per the said waterfall mechanism, after the defaulter's margins and defaulter's contribution to default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution, if there is still a loss to be met, then contribution of non-defaulting members to Default Fund is utilized to meet the said loss.

The Scheme is subject to the risk of losing initial margin and contribution to Default Fund in the event of failure of any settlement obligation. Further the Scheme's contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

Further, CCIL periodically prescribes a list of securities eligible for contribution as collaterals by members. Presently, all Central Government Securities and Treasury Bills are accepted as collaterals by CCIL. The above risk factor may undergo a change in case the CCIL notifies securities other than Government of India Securities as eligible for contributions as collateral.

- **Risks associated with investing in Derivatives**

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly.

Other risks include risk of mispricing or improper valuation and the inability of the derivative to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby the Scheme may not be able to sell or purchase derivative quickly enough at a fair price.

- **Risks associated with investing in SO Rated Papers**

In addition to all the risks associated with the plain vanilla instruments like NCDs / Money market instruments etc., any instrument rated with the suffix (SO) is subject to certain additional risks like:

- Underlying loan pools in case of SO rated securities can be of varying types and nature. SO securities are rated and assessed based on assumption around homogeneity of the underlying loan pools. In certain cases, the loan pools can show behavioral characteristics which are very different from initial assumptions and as such increase the credit risks inherent in the transaction. Additionally, the loan pools may have pre-payments which can increase the interest rate risk in the securities.
- In case of SO rated securities, the structure of the transaction carries comingling risk and risk of the servicer of the transaction. As such, legal clauses and structural features are very important in addition to issuer credit risk since lack of sufficient structural protection can cause leakage of cash and / or security being available for investors.
- SO rated securities are complex structures with a variety of credit enhancements. Debt securities lack a well-developed secondary market in India, and due to structured nature of SO securities, the liquidity in the market for these instruments is limited compared to similar rated normal debt instruments. Thus, lower secondary market liquidity in such instruments could cause challenges in timely selling by the scheme. Additionally due to limited liquidity, schemes may incur higher impact costs when such instruments are traded due to wider bid-offer spreads.

- **Additional risks associated with the CE rated papers**

In addition to all the risks associated with the plain vanilla instruments like NCDs / Money market instruments etc., any instrument rated with the suffix (CE) is exposed to various additional risks on the basis of the explicit underlying Credit enhancement (CE) from a third party/ parent/ group company, in the form of corporate guarantee/ letter of comfort/ pledge of shares etc. The risk involved are:

- if the Credit Enhancement is in the form of Corporate Guarantee / Letter of Comfort, then there is a legal risk of enforcing the Corporate Guarantee / Letter of Comfort along with the credit risk pertaining to the Credit Enhancement provider.
- If the Credit Enhancement is in the form of pledge of shares, then the additional risks are those associated with equity price movement, share collateral cover, liquidity of shares pledged as collateral in the secondary market, availability of free shares with the CE provider to be provided as additional collateral. Further there is also a legal risk of enforcing the pledge of shares, operational risk in selling the shares in secondary market & the underlying impact cost.
- If the Credit Enhancement is in any other form, then there is a risk pertaining to legal enforceability of the credit enhancement and credit risk of the credit enhancement provider.

- **Risks associated with Securities Lending**

As with other modes of extensions of credit, there are risks inherent to securities lending. During the period the security is lent, the Scheme may not be able to sell such security and in turn can not protect from the falling market price of the said security. Under the current securities lending and borrowing mechanism, the Scheme can call back the securities lent any time before the maturity date of securities lending contract. However this will be again the function of liquidity in the market and if there are no lenders in the specified security, the Scheme may not be able to call back the security and in the process, the Scheme will be exposed to price volatility. Moreover, the fees paid for calling back the security may be more than the lending fees earned by Scheme at the time of lending the said security and this could result in loss to the Scheme. Also, during the period the security is lent, the Fund will not be able to exercise the voting rights attached to the security as the security will not be registered in the name of the Scheme in the records of the Depository/issuer.

- **Risks associated with Short Selling**

The Scheme may enter into short selling transactions, subject to SEBI and RBI Regulations. Short positions carry the risk of losing money and these losses may grow unlimited theoretically if the price of the stock increases without any limit. This may result in major loss to the Scheme. At times, the participants may not be able to cover their short positions, if the price increases substantially. If numbers of short sellers try to cover their position simultaneously, it may lead to disorderly trading in the stock and thereby can briskly escalate the price even further making it difficult or impossible to liquidate short position quickly at reasonable prices. In addition, short selling also carries the risk of inability to borrow the security by the participants thereby requiring the participants to purchase the securities sold short to cover the position even at unreasonable prices.

- **Passive Investments**

The Scheme is passively managed Scheme. The Scheme's performance may be affected by a general decline in the Indian markets relating to its underlying Index. The Scheme invests in securities which are constituents of its underlying Index regardless of its investment merit, research, without taking a view of the market and without adopting any defensive measures. The AMC does not attempt to individually select stocks or take defensive positions in declining markets.

- **Tracking Error Risk**

"Tracking Error" is defined as the annualised standard deviation of the difference in daily returns between the underlying Index and the NAV of Units of the Scheme. The fund manager may not be able to invest corpus of the Scheme in securities exactly in the same proportion as in the underlying Index due to certain factors such as rounding off, fees and expenses of the Scheme, corporate actions, cash balance, changes to the underlying Index and regulatory policies which may affect AMC's ability to achieve close correlation with the Underlying Index. The Scheme's returns may therefore deviate from those of its Underlying Index.

Tracking Error may arise due to the following reasons: -

- Recurring expenses of the Scheme.
- The Scheme may not be invested at all times as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- Securities trading may halt temporarily due to circuit filter rules.
- Corporate actions such as debenture or warrant conversion, rights, merger, change in constituents etc.
- Rounding off of quantity of shares in underlying Index.
- Dividend payout.
- Changes to the constituents of underlying Index as a result of Index maintenance by NSE Indices. NSE Indices undertakes a periodical review of the scrips that comprise the underlying Index and may either include new scrip or exclude existing scrip.

The Tracking Error based on past one year rolling data shall not exceed 2%. In case the tracking error of the Scheme exceeds 2% due to unavoidable circumstances in the nature of force majeure which are beyond the control of the AMC, then the same will be brought to the notice of the Trustees with the corrective action by the AMC.

- **Risk Factors associated with Trading of Units on Stock Exchange(s)**

- Although Units of the Scheme are listed on the Stock Exchange(s), there can be no assurance that an active secondary market will develop or be maintained.
- The Units of the Scheme may trade at a premium/discount to NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holding. The trading prices of Units of the Scheme will fluctuate in accordance with changes in their NAV as well as demand and supply of the Units in the market(s). However, the Units of the Scheme can be subscribed / redeemed in Creation Unit size directly with the Fund which provides efficient arbitrage between the traded prices and the NAV thereby reducing the incidence of Units of the Scheme being traded at premium/discounts to NAV. However, any changes in the trading regulations by NSE/ Stock Exchange(s)/SEBI may affect the ability of the market makers to arbitrage resulting into wider premium or discount to NAV.
- Trading in Units of the Scheme on the Exchange may be halted because of market conditions or for reasons that in view of Exchange authorities or SEBI, trading in Units of the Scheme is not advisable. In addition, trading in Units of the Scheme is subject to trading halts caused by extraordinary market volatility and pursuant to Exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of Exchange necessary to maintain the listing of Units of the Scheme will continue to be met or will remain unchanged.
- The Units will be issued in demat form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund will depend upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control.

- **Redemption Risk**

Investors may note that even though this is an open-ended scheme, the Scheme would repurchase Units in Creation Unit size only from Market Maker. Further, large Investors can redeem directly with AMC / MF only for the amount greater than Rs. 25 Crores. Thus, unit holdings less than the Creation Unit size / upto Rs. 25 crores (other than Market Makers) can only be sold through the secondary market on the Stock Exchange where these units are listed, subject to the rules and regulations of the Exchange.

C. Risk Mitigation Strategies

Type of Risk	Risk Mitigation Measures
Volatility	The Scheme is a passively managed scheme and hence volatility risk will be lesser as compared to actively managed schemes.
Concentration	The Scheme will invest in securities which are constituents of underlying Index in the same proportion as the securities have in the underlying Index. Hence, concentration risk will be the same as that of underlying index, subject to tracking error.
Liquidity	The Scheme will invest in securities which are constituents of Nifty 50 in the same weightage as that of Index. As per Index eligibility criteria for Nifty 50 Index, constituents of Index have good liquidity in the market. Therefore, the Scheme does not envisage liquidity risk.

II. INFORMATION ABOUT THE SCHEME:

A. Where will the scheme invest

The corpus of the Scheme will be invested in:

1. Securities which are constituents of Nifty 50 in the same proportion as in underlying Index.
2. Equity Derivatives are financial instrument, generally traded on an exchange, the price of which is directly dependent upon (i.e. “derived from”) the value of equity shares or equity indices. Derivatives involve the trading of rights or obligations based on the underlying, but do not directly transfer property.
3. The Scheme will invest in debt and money market instruments. These instruments may include certificate of deposits, commercial paper, cash management bills, treasury bills, Tri-party Repo, non-convertible debentures as well as bonds, floating rate debt instruments, repo* or reverse repo, bills rediscounting, securities created and issued by the Central and State Governments as may be permitted by RBI, securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills), debt derivative instruments etc.
4. Debt derivative instruments:
5. Debt Instruments having Structured Obligation (SO rating) and / or Credit Enhancements (CE rating)

D. Disclosure Regarding Index

1. About the index

The Nifty 50 is the flagship index on the National Stock Exchange of India Ltd. (NSE). The Index tracks the behaviours of a portfolio of blue-chip companies, the largest and most liquid Indian securities. It includes 50 of the all companies listed and/ or traded on the NSE, captures approximately 66% of its float-adjusted market capitalization and is a true reflection of the Indian stock market.

The Nifty 50 covers major sectors of the Indian economy and offers investment managers exposure to the Indian market in one efficient portfolio. The Index has been trading since April 1996 and is well suited for benchmarking, index funds and index-based derivatives.

2. Index eligibility criteria

- Constituents of Nifty 100 index that are available for trading in NSE’s Futures & Options segment are eligible for inclusion in the Nifty 50 index. The latest composition of Nifty 100 including most recent changes whether announced or yet to be announced shall be considered eligible subject to availability of trading in NSE’s Futures & Options segment in such stocks.
- **Differential Voting Rights:** Equity securities with Differential Voting Rights (DVR) are eligible for inclusion in the index subject to fulfilment of specified DVR related criteria.
- **Trading Frequency:** The company’s trading frequency should be 100% in the last six months.
- **Liquidity:** For inclusion in the index, the security should have traded at an average impact cost of 0.50 % or less during the last six months for 90% of the observations for a portfolio of Rs. 10 crores.

Impact cost is the cost of executing a transaction in a security in proportion to its index weight, measured by market capitalization at any point in time. This is the percentage mark-up suffered while buying/selling the desired quantity of a security compared to its ideal price -- (best buy + best sell)/2.

- **Float-Adjusted Market Capitalization:** Companies will be eligible for inclusion in Nifty 50 index provided the average free-float market capitalisation is at least 1.5 times the average free-float market capitalization of the smallest constituent in the index.

- **Limit on total number of changes:** As part of the semi-annual reconstitution of the index, a maximum of 10% of the number of companies in the index (i.e. five companies) may be added in a calendar year.

Where the committee considers that the number of changes at the first semi-annual rebalance might restrain the second semi-annual rebalance, it retains the right to reduce the number of constituent changes at the first review in reverse order of the free-float capitalisation. (In other words, the largest eligible company will be added and the smallest company removed, and then the next largest added and next smallest removed, and so on until the committee deems that the appropriate number of changes have been made.

At the second semi-annual rebalance, the same principle applies, however once a total of five companies have been added to the index across the two semi-annual reviews, no further additions (or deletions) will be made.

However, the limit of maximum 10% change shall not be applicable for any exclusion of a company due to it not meeting the eligibility criteria on account of factors such as non-availability of F&O, higher impact cost, lower trading frequency; scheme of arrangements such as merger, demerger, delisting, specific cases of capital restructuring etc.; shifting to BZ series; trading suspension; adverse regulatory findings or orders issued against any of the index constituent as stated earlier, etc.

3. Index methodology

The Nifty 50 is computed using a float-adjusted, market capitalization weighted methodology, wherein the level of the index reflects the total market value of all the stocks in the index relative to a particular base period. The methodology also takes into account constituent changes in the index and corporate actions such as stock splits, rights issuance, etc., without affecting the index value.

4. Index Review frequency

The review of Nifty 50 is undertaken semi-annually based on data for six months ending January and July. The replacement of stocks in Nifty 50 (if any) is implemented from the last trading day of March and September. In case of any replacement in the index, a four weeks' prior notice is given to the market participants.

Additional index reconstitution may be undertaken in case any of the index constituent undergoes merger, demerger, delisting, specific cases of capital restructuring etc., in case any of the index constituent is moved to BZ series, if trading permission of any of the index constituent is withdrawn from F&O segment, if a security is suspended for trading from Capital Market for any reason and in case of any adverse regulatory findings or orders issued against any of the index constituent that necessitates removal of such stock from the index. In case of a capital restructuring or voluntary delisting, equity shareholders' approval is considered as a trigger to initiate the replacement of such stock from the index through additional index reconstitution. For all other cases, replacements will be initiated based on notifications issued by the Exchange.

Further, additional index reconstitution may be undertaken to screen to continued eligibility of an index constituent that may have undergone corporate action involving demerger in accordance with the guidelines prescribed under a separate section 'Corporate actions involving demerger/ spin-off' of this document.

II. Subscription / Redemption of Units for Cash directly with the Mutual Fund

The Mutual Fund allows cash subscription of Units of Invesco India Nifty 50 Exchange Traded Fund by Market Maker and Large Investors. Such investors shall make subscription request to the Mutual Fund/AMC whereupon the Mutual Fund/AMC will arrange to purchase the underlying portfolio securities. The Portfolio Deposit and Cash Component will be exchanged for Invesco India Nifty 50 Exchange Traded Fund in Creation Unit size with the Mutual Fund.

Also, the Mutual Fund allows cash redemption of Units of Invesco India Nifty 50 Exchange Traded Fund by Market Maker and Large Investors. Such investors shall make redemption request to the Mutual Fund/AMC whereupon the Mutual Fund/AMC will arrange to sell underlying portfolio securities on behalf of the investor. Accordingly, the sale proceeds of portfolio securities, after adjusting Cash Component for redemption, necessary charges/costs and prevailing exit load will be remitted to the investor.

The subscription / redemption request for cash can be made to the Mutual Fund in a duly filled application form. Application form for cash subscription / redemption of Units of the Scheme can be obtained from the office of the AMC and Registrars and Transfer Agents.

For subscription / redemption of Units for cash directly with the Fund, Intra-Day NAV will be applicable.

Intra-Day NAV will be based on the executed price at which the securities representing underlying index (Portfolio Deposit) are purchased / sold and shall include Cash Component. This is explained by way of an example as follows:

Creation Unit Size: 5,000 Units
Transaction Date: November 27, 2024

Subscription Transaction

Particulars	Amount in Rs.
Executed Price of Securities constituting underlying portfolio	1,35,43,471.01
Add:	
Brokerages @ 0.03%*	4,063.04
Securities Transaction Tax@ 0.10%*	13,543.00
Total Purchase Cost of securities	1,35,61,077.05
Cash Component recoverable from the investors (Based on closing NAV of November 26, 2024)	69,559
Total	1,36,30,637
Number of Units	5,000
Intra-Day NAV	2,726.1273

Note: In addition to above, the investor will also bear stamp duty* @ 0.05% towards subscription of units and Rs.1,180 towards other transaction charges* which will be recovered as a part of Cash Component.

Redemption Transaction

Particulars	Amount in Rs.
Executed Price of Securities constituting underlying portfolio	1,35,43,471.01
Less:

Securities Transaction Tax@ 0.10%	13,543.00
Total Sale Value	1,35,25,864.97
Cash Component payable to the investors (Based on closing NAV of November 26, 2024)	69,559.49

Intra-Day NAV	2,719.0849

Note: In addition to above, the investor will also bear Rs.1,180 towards transaction charges which will be recovered as a part of Cash Component.

*Brokerage, Securities Transaction Tax, Stamp Duty and other transaction charges are as per current prevailing rate and subject to change from time to time.

It is clarified that the above is just an example to explain how intra-day NAV will be calculated for subscription / redemption in Creation of Unit Size directly with the fund in cash. The actual prices at which the purchase / sale transactions are executed will differ for each investor and will be based on the time at which the transaction is executed on the stock exchange(s).

Purchase / Sale of units on the Exchange

The Units of the Scheme are listed on the Capital Market Segment of NSE. An investor can buy/sell Units on a continuous basis on NSE during the trading hours like any other publicly traded stock.

The price of Units on NSE will depend on demand and supply at that point of time and underlying NAV. There is no minimum investment although Units are purchased /sold in round lots of 1 Unit.

The Mutual Fund may at its sole discretion list Units under the Scheme on any other recognized Stock Exchange(s) at a later date.

Settlement of Purchase / Sale of the units of Scheme on NSE

Buying / Selling of Units of the Scheme on NSE is just like buying / selling any other normal listed security. If an investor has bought Units, an investor has to pay the purchase amount to the broker such that the amount paid is realized before the funds pay-in day of the settlement cycle on NSE. If an investor has sold Units, an investor has to deliver the Units to the broker before the securities pay-in day of the settlement cycle on NSE. The Units (in the case of Units bought) and the funds (in the case of Units sold) are paid out to the broker on the pay-out day of the settlement cycle on NSE. NSE regulations stipulate that the trading member should pay the money or Units to the investor within 24 hours of the pay-out.

If an investor has bought Units, he should give standing instructions for “Delivery-In” to his/her DP for accepting Units in his/her beneficiary account. An investor should give the details of his/her beneficiary account and the DP-ID of his/her DP to his/her trading member. The trading member will transfer the Units directly to his/her beneficiary account on receipt of the same from Stock Exchange’s Clearing Corporation.

An investor who has sold Units should instruct his/her Depository Participant (DP) to give “Delivery-Out” instructions to transfer the Units from his/her beneficiary account to the Pool Account of his/her trading member through whom he/she have sold the Units. The details of the Pool A/C (CM-BP-ID) of his/her trading member to which the Units are to be transferred, Unit quantity etc. should be mentioned in the Delivery Out instructions given by him/her to the DP.

The instructions should be given well before the prescribed securities pay-in day. SEBI has advised that the Delivery Out instructions should be given at least 24 hours prior to the cut-off time for the prescribed securities pay-in to avoid any rejection of instructions due to data entry errors, network problems, etc.

Rolling Settlement

As per the SEBI’s circular dated September 7, 2021, the rolling settlement on T+1 basis for all trades has commenced from January 27, 2021 onwards. The Pay-in and Pay-out of funds and the securities/units takes place within 1 working days after the trading date.

The pay-in and pay-out days for funds and securities are prescribed as per the Settlement Cycle. A typical Settlement Cycle of Rolling Settlement is given below:

Day Activity

T	The day on which the transaction is executed by a trading member
T+1	Confirmation of all trades including custodial trades latest by 7.30 a.m.
T+1	Processing and downloading of obligation files to brokers /custodians latest by 7.30 a.m.
T+1	Pay-in of funds and securities by 7.30 a.m.
T+1	Pay-out of funds and securities by 1.30 p.m.

While calculating the days from the Trading day (Day T), weekend days (i.e. Saturday and Sundays) and bank holidays are not taken into consideration.

Role of Market Maker

The AMC has appointed two Market Makers to provide continuous liquidity on NSE on an ongoing basis. The AMC may appoint more than two market makers.

Currently, the AMC is not giving any incentives to the Market Makers for providing continuous liquidity on the Stock Exchanges. As and when AMC puts in place incentive structure for the market makers, the addendum to that effect will be issued and uploaded on the website of the AMC.

The role of Market Makers is to ensure liquidity in units of the Scheme on the Stock Exchange(s) where the Units of the Scheme are listed. Market Makers will offer buy and sell quotes (bid and ask quotes) on the Stock Exchange on continuous basis and shall guarantee execution of orders at quoted price and quantity. The Market Makers may, for the purpose of creating liquidity, subscribe or redeem the Units of

the Scheme directly with the AMC in multiples of creation unit size e.g. if the Market Maker's net delivery obligation is more than the Units of the Scheme available with it, Market Maker may place subscription request with the AMC. Similarly, if the Market Maker has a net buy position and the same is to be settled in cash, it may redeem Units directly with the AMC.
