Further, any transactions undertaken by the Scheme in order to meet the redemption and subscription obligations will be done such that post such transactions, replication of the portfolio of the Scheme with BSE Top 10 Banks Index is maintained at all times.

Investment Strategy of the Scheme

The Scheme will follow a passive investment strategy and will invest in companies which are constituents of BSE Top 10 Bank Index in the same weights as in the Index with an endeavor to track the benchmark index with as low tracking error as possible. The Scheme may, for a temporary period, take exposure to derivatives of the index or its constituent stocks when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions and when it makes economic benefit for the Scheme.

Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

1. The Scheme is a passively managed scheme and provides exposure to the benchmark and tracks its performance as closely as possible. The Schemes performance may be affected by a general price decline in the stock markets. The Scheme invests in stocks comprising the index regardless of their investment merit. The Mutual Fund does not attempt to take defensive positions in declining markets.
2. As per the asset allocation pattern, the scheme proposes to invest minimum 95% of the net assets in securities comprising of BSE Top 10 Banks Index in same proportion. Any addition or deletion of stocks from BSE Top 10 Banks Index may require sudden and immediate acquisition or liquidation of such stocks at the prevailing market prices irrespective of whether valuation of stocks is attractive enough. This may not always be in the interest of unitholders.
3. Performance of the underlying Index will have a direct bearing on the performance of the Scheme. The Scheme invests in securities which are constituents of its underlying Index regardless of its investment merit, research, without taking a view of the market and without adopting any defensive measures. The AMC does not attempt to individually select securities or take defensive positions in declining markets.
4. The decision of the Fund Manager to execute trades including rebalancing required will be purely driven by the inflows and outflows in the Scheme and composition of the underlying Index. Further, it is pertinent to note that there is no element of research recommendations involved before the execution of trades in the Scheme.
5. The Index reflects the prices of securities at a point in time, which is the price at close of business day on the stock exchange. The Scheme, however, may at times trade these securities at different points in time during the trading session and therefore the prices at which the Scheme trade may not be identical to the closing price of each scrip on that day on the NSE and BSE. In addition, the Scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance, from NSE and BSE closing prices.
6. Investment in ETFs is subject to tracking error. Tracking error may have an impact on the performance of the scheme. Factors such as the fees and expenses of the Scheme, corporate actions, cash balance, changes to the Underlying Index and regulatory policies may affect the AMC's ability to achieve close correlation with the Underlying Index of the Scheme. However, the Fund would monitor the tracking difference of the Scheme on an ongoing basis and would seek to minimize tracking difference to minimum practicable.
7. In the event the Underlying Index, is dissolved or is withdrawn or is not published due to any reason whatsoever, the Trustee reserves the right to modify the Scheme so as track a different and suitable index or to suspend tracking the index till such time it is dissolved/ withdrawn or not published and appropriate intimation will be sent to the Unitholders of the Scheme. In such a case, the investment pattern will be modified suitably to match the composition of the securities that are included in the new index to be tracked and the Scheme will be subject to tracking errors during the intervening period.

Tracking Error and Tracking Difference Risk:

"Tracking Error" is defined as the annualized standard deviation of the difference in daily returns between the underlying Index and NAV of Scheme.

"Tracking Difference" is defined as the annualized difference of daily returns between the index and the NAV of Scheme.

The Fund Manager may not be able to invest the entire corpus of the Scheme in securities exactly in the same proportion as in the underlying Index due to certain factors such as rounding off, fees and expenses of the Scheme, changes to the underlying Index and regulatory policies which may affect AMC's ability to achieve close correlation with the Underlying Index. The Scheme's returns may therefore deviate from those of its Underlying Index.

Tracking Error / Tracking Difference may arise due to the following reasons:

- Transaction Cost and Recurring expense of the Scheme.
- The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.
- The Scheme may not be invested at all times as it may keep a portion of the Scheme in cash to meet redemptions or for corporate actions.
- Corporate actions such as debenture or warrant conversion, rights, merger, change in constituents etc.
- Rounding off of quantity of shares in Underlying Index.
- Dividend received from underlying securities. Dividends are assumed to be reinvested into the BSE Top 10 Banks Index after the ex-dividend date of the constituents. However, in practice, the dividends are received with a lag.

- Index providers may either exclude or include new scrips in their periodic review of the scrips that comprise the underlying index. In such an event, the Scheme will try to reallocate its portfolio but the available investment/reinvestment opportunity may not permit absolute mirroring immediately.
- The Scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to: circuit filters in the securities, liquidity and volatility in security prices.
- The Index reflects the prices of securities at a point in time, which is the price at close of business day on NSE and BSE. The Scheme, however, may at times trade these securities at different points in time during the trading session and therefore the prices at which the Scheme trade may not be identical to the closing price of each scrip on that day on the NSE and BSE. In addition, the Scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance, from NSE and BSE closing prices.

The tracking error based on past one year rolling data shall not exceed 2%. In case the tracking error of the Scheme exceeds 2% due to unavoidable circumstances in the nature of force majeure which are beyond the control of AMC, the same shall be brought to the notice of Trustees.

However, the Fund will endeavor to limit the tracking error within 2% limits. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index. The Scheme existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data.
